CHIMES TO STRIKE THE PASSING HOURS

Second National Bank Puts Illuminated Clock on Its Building

The SECOND NATIONAL BANK has erected a magnificent electric illuminated clock on the front of its bank building on Center street, not only adding materially to the appearance of the busiest section of our city but providing a convenience that will undoubtedly be greatly appreciated by the general public.

The most distinctive feature of the clock, other than its unusually artistic appearance and the perfection of its construction and mechanism, is the complete set of Westminster chimes with which it is equipped. These ring every quarter hour and may be heard practically as far as the clock may be seen.

The big clocks are operated by electricity from a master clock inside the building, in the main banking room. This is an especially handsome structure of mahogany and plate glass construction, with a 13-inch dial and guaranteed to keep perfect time. Every minute the hands of the big clocks are sent ahead one minute by electricity governed by the master clock within, the connection between the two instruments being perfect and insuring correct time on the large clock on the outside as well as the master clock inside.

The clock is attached to the front of the SECOND NATIONAL BANK building at a sufficient elevation to be plainly visible from all parts of the middle section of Centre street. The clock is nine feet in height, by three feet in width, of dark green bronze, with copper hood at top and bottom. Both faces of the clock are alike, the dial being surmounted by the words "SECOND NATIONAL BANK" in large illuminated letters. This is provided by a sheet of copper in which are cut the letters laid over pure pearl white glass, with crystal plate glass on the outside.

President N. E. Miller of the SECOND NATIONAL BANK, offers the following explanation of the beautiful Westminster chimes, consisting of five tubular chime bells, with which the clock is equipped, giving interesting information regarding the chimes themselves as well as explaining the objects which have prompted the bank to offer the public the many advantages to be derived and enjoyed from the beautiful clock:—

"As a home institution serving the people of this locality—enjoying your good will and business favors, we have in the past endeavored to show our appreciation by presenting our patrons with calendars and novel-

ties and otherwise recognizing your co-operation in making this a serviceable and successful banking house.

"Years of prosperous banking have been made possible only by your support. We wanted to show our appreciation in a substantial way and have therefore purchased of the manufacturers, the McCintock—Loomis company of Minneapolis, Minnesota, including the exclusive rights for this city, a large handsome clock combined with a set of the softest and most beautiful chimes ever heard in any city of the old or the new world.

The Chimes. "Lord through this hour, Be Thou our guide So, by Thy power No foot shall slide."

"Everyone who has lived within the sound of the bells of Westminster is familiar with the verse given above. The origin of the carillon has never been positively established. Some credit it to Mr. Crouch who was a pupil of Dr. Randall, Regius professor of Music. This, however is disputed by other writers who credit it to Dr. Randall's conception of the idea taken from a movement in the fifth bar of the opening of Handel's Symphony, "I know that my Redeemer liveth." The chimes were first fitted to the clock of the University church, St. Mary's the Great in Cambridge, but were not copied until they were reproduced on a very large scale in the Victoria clock tower of the house of parliament.

"At the quarter, half and three-quarter hour, these chimes will ring out in various musical combinations. At a quarter past the hour, four strokes—Westminster; at half past the hour, eight strokes—Reveille; at three-quarters past the hour, 12 strokes—Cathedral peal and on the hour 16 strokes—Westminster followed by the striking of the full hour in a clear vibrant tone.

"May we hope that the chimes will mean something to all of our people; that they will have a message for the youngster on his way to school, a thought for the business man who hustles through his day; a solace for the old; an inspiration for all.

"Every day of the week the chimes will be sounding their message, the note of warning spoken in time; the chime of rejoicing; the lament in the time of sorrow. The chime will be all things to all men for it is going to belong not to us alone, but to men and women and children of our community."

Quemahoning, \$827,457; Rockwood, Clearfield has taken the initiative \$338,170; Salisbury, \$185,393; Shady, for military preparedness in forming \$991,029; Shanksville, \$64,070; Somersetfield, \$34,235; Somerset Borough, \$1,200,700; Somerset Township, \$1,644, 899; Southampton, \$148,397; Stonycreek, \$822, 689; Stoyestown, \$155,787; Summit, \$761,136; Upper Turkeyfoot, \$374, 704; Wellersburg, \$45,953; Ursina, \$57,356; Windber, \$1,850,599.
