FOREIGN FARMERS FIRST During the ten months of the fiscal year 1913, under the Republican protective tariff there was imported into this country meat and dairy pro ducts to the value of \$12,000.000. The bulk of his was foreign cheeses. Sev en of the ten months ended April, 1914, were under the Democratic tar-· less than revenue law, with of these products on the free and for this ten months period foreign competitors sent meat dairy products into the American marto the value of \$28,000,000, the bulk of them being meats. Nine of the ten months ended April, 1915, were under European war conditions. Not with-standing this, our imports of these products reached the astonishing fig-ure of \$38,000,000, an increase of 217 per cent over the 1913 period. Argentine meats and Canadian milk and cream accounted for the larger part of of these imports. About this time the emands of the belligerents for Argentine meats became heavier, and her trade in these products veered toward Europe, as did much of that from Ca ada. For ten months ended April, 1915 our imports of Argentine meats were just 50 per cent of what they were just 50 per cent of what they were during the 1914 period, and our total imports of meat and dairy products were \$21.000.000. The principle after ture and his suggestions along that war problem, which Argentina will line have merited his call to more respectively. have to meet is how to get rid of her sponsible work, for his executive atablished that a general appeal has vast surplus of farm products, the bility is recognized. production of which, during the past ar Black has a lovely country two years has been so wonderfully in-home three miles from Meyersdale the two years has been so wonderfully in Bone three mines that the broadening of the institution creased. With a Democratic free and near Garrett It was here that work has become necessary by the trade law on the statute books, the Governor Brumbaugh was entertain increasing demands on it and those trade law on the statute books, the Governor Brumbaugh was entertain increasing demands on it and those United States is the logical market ed last summer for a short time by for these products and that spells Mr. and Mrs. Black. CASTORIA For Infants and Children In Use For Over 30 Years

THE BUFFALO.

The Buffalo, whose right name is Bison, is the only well-known American animal except the Goat who still wears whiskers. The Buffalo is related to the Kak a mild-mannered beyine which furnishes the motive power for Asiatic jitney buses. The Yak is of great economic value when aliva, and when dead his tail still wags in the form of a fly swatter—and there and when dead his tail still wags in the form of a fly swatter—and there are some flies to swat in Asia, believe us! The only thing that is left of the Buffalo, so to speak, is a tale. Fifty years ago, when beards were a mark of masculine distinction and family portraits hung in the parlor, when the plush-covered album was a torm of nanular diversion, the Buffalo when the plush-covered album was a form of popular diversion, the Buffalo pawed the western plains in millions. But with the passing of physiognomic drapery the Buffalo went down and out, until, like the Bull Moose, there is nothing left of his former greatness save a few live samples in captivity and some mounted specimens in museums.

The trouble with the Buffalo was that he had enough size and speed, but he lacked direction. His head was big, but there was nothing of value inside of it. When the mighty hunter sneaked up on a band of six Bullalo and picked off one of them with his to usty rifle, the other five would stick around and look foelish, until the whole screte were ready to be made. into Buffalo robes. This behavior was called courage, and maybe it was; but the fellow who doesn't know when to beat it is made of stuff that undertakers delight in and cemetery associa-tions pay dividends on. The Buffalo-has always been regarded as a heroic figure, but all he ever got for his courage was to have a village in New York named for him and get his picture on a five-cent nickel. Courage, my son, is a fine thing; but remember that is pleasanter to be a live politician with a large income than a dead stateman with a large monument. Don't be a Buffalo.—From Judge.

THE AMERICAN STIGMA OF "HIGH BROW."

The worst fault, however, into which our age-long service of mediocrity has led us is a weak-kneed, pusillanimous erence to mediocrity itself. college has borrowed the vice from everyday American life. For example, the most deadly weepon in the yellow journalists armory is the term "high-hrov." A politician may be called "grafter," "boss," or even "muckrak-er," and escape unscratched; but if he demounced as a "high-brow" and the is demounced as a "mign-brow" and the label sticks, his career is ended. A playwright or a novelist may be writ-ten down as "cheap," he may be said to plaqiarize, he may be shown to be-vicious or unclean, without serious to placinarize, he may be shown to be victous or unclean, without serious damage to his reputation; but let him be proved a "high-brow" and the public will fiy from him as if he were a book-agent. Now the wide-spread American belief that knowledge makes a man impractical is responsible for some of this curious odium; but far more is due to our servile deference to mediocrity. The weight of public opinion is usually against the expert, the specialist, the thinker, the exceptional man in general, for public opin ion, whether right or wrong, is always mediocre; and there are few among us who do not in this respect yield somehow, somewhere, to public opinion. The doctor distrusts the advanced political theorist, the politician distrusts the advanced dramatist, the dramatist sneers at the innovation of science. We are all made timid by the enormous majorities which uphold mediocrity.-Henry Seidel Canby in Harper's Magazine
