The Brisk Smoke—"Bull" Durham

When you see an alert-looking young man in a lively argument roll a "Bull" Durham cigarette—it's the natural thing. He likes to punctuate a crisp sentence with a puff of "Bull" Durham. His mind responds to the freshness that's in the taste of it, and his senses are quickened by its unique aroma. A cigarette of "Bull" Durham just fits in with keen thinking and forceful action.

Hope and Faith.

Hope is the boy, a blind, hendlong, pleasant fellow good to chase swallows with salt; Faith is the grave, experienced yet smiling man. Hope lives on ignorance; open eyed Faith is built upon a knowledge of our life, of the tyranny of circumstance and the failure of human resolution. Hope looks for unqualified success, but Faith counts certainly on failure and takes honorable defeat to be a form of victory. Hope is a kind old pagan, but Faith grew up in Christian days and early learned humanity. In the one temper a man is indignant that he cannot spring up in a clap to heights of temper a man is indignant that de cannot spring up in a clap to heights of elegance and virtue; in the other, out of a sense of his infirmities he is filled with confidence because a year has come and gone and he has still preserved some ray of honor. — Robert

Crest of the Bloody Hand.

The noted Binglish family of the Holtes has for its badge a bloody hand, and this shifter badge commemorates a wager that ended in a crime. Sir. Thomas Holte one day in 1612 was hunting. He invited his comrades home with him to dinner, and as he rode along he made a heavy bet on his cook's punctuality. But the cook failed him for once. When he got home dinner was not ready. The jeers of bis companions at this failure, to gether with his huse loss in the matter of the wager, enraged him so that he ran into the kitchen, seized a cleaver and solit the cook's head open with it. Airerward his family, to keep this crime alive, adopted for its crest the bloody hand of the cook killer.

Potato salid in the American style is a good example The potato is composed chiefly of starch. That is digested in the second stomach where the secretions are alkaline. If you soak the potato in vinegar you have something whose inture is strictly opposite to the alka line, which it fights. Therefore, you are materially delaying the digestive process.

Poor cooking often makes proper food either difficult or impossible to digest. The hard earned money of the household goes to the purchas of good food which is often ruined by the housewife ignorant in the art of cooking. Good cooking is not a matter of whim or flattering the palate. It is to health. an absolute essential Therefore the ant should be taught in our public and parochial schools.

If you eat too fast when the body is overtired, heated, or chilled, you will often suffer distressing indigestion. Eating in impure or stale air will interfere with the digestion. If you are compelled to take a meal under such circumstances, the quality of the food should be reduced to a
