Week Commencing, February 26th-

Amusements. SUMMER GARDEN SATURDAY TRIANGLE PROGRAM With Lillian Gish, in "THE CHILDREN PLAY"

Much is heard of the burdens of parenthood and the selfishness of children, but it is said that Lillian Gish, in the new Triangle-Fine Arts drama, "The Children Play," brings home in striking fashion the sad handicap that the children of divorced couples are forced to struggle against. This photoplay will be shown at the Summer Garden this Saturday evening Feb. 24th, along with one of those funny always pleasing Triangle Keystone comedies, "Haystacks and Steeples." If you want a seat, you will have to get in early, as the Saturday Triangle program is growing more popular each week.

MONDAY TRIANGLE PROGRAM With Bessie Barriscale, in "HOME."

"HOME" is a Triangle play with Bessie Barriscale and Charles Ray co-starred. Two favorites are pre-

sented together who could scarcely be duplicated for popularity in all filmdom. Clara Williams, Louise Glaum, as the noted "vampire" is also a star in this Triangle feature, making "Home" a three star feature, without even considering the handsome young Mr. Ray at all. "Home" is a story of a family, husbands, wives, sisters, brothers and sweethearts, see this all-star production at the Summer Garden Monday, also one of those two-part Triangle Keystone Comedies "French Milliner."

TUESDAY TRIANGLE PROGRAM. With CLARA WILLIAMS, IN "THE CRIMINAL"

Clara Williams who is featured in our Monday Triangle program, plays the leading part in our Triangle program Tuesday Feb. 27th, where she will be seen in an all together different role in "The Criminal" a strong five part Thomas H. Ince production, along with a two part Triangle Comedy "Bombe" lots of smoke and excitement, a big seven reel program, with music by the orchestra.

Salt For Dairy Cows.
From one to two ounces of salt daily, in accord with the amount of milk produced, is sufficient to meet all requirements of a dairy cow on rations of ordinary feeds, according to Dr. E. B. Forbes of the Ohio experiment station. In nutrition studies with cows milking as much as forty-five pounds daily and fed common feeds he found that one ounce of salt a day satisfied the cow's needs.

To Keep Up a Good Milk Flow.
To keep the cow persistently in milk always milk rapidly and see that every bit of milk is taken each time. It does not pay to turn the milking over to careless and inexperienced hands.

CHICKEN CHATTER.

A few thorough applications of crude petroleum to the interior of poultry houses will destroy completely the common red mite infesting chickens. Notwithstanding that many good breeds have been imported, the fact remains that not one of them can be raised with our American production. After playing and before seedling turn the poultry in on the freshly turned up earth.

Had Him There.
The fluent spoken man in the smoke room of a certain hotel was talking of his great abilities—what he had done, what he could do, and finished up thus:
"I always go by the motto: 'if you want a thing done well, do it yourself.'"
"Nonsense," replied a man in the corner; "suppose you want a haircut?"

Took it Literally.
A country hotel proprietor, gleaning out of a rear window, saw his new waiter chasing a chicken about the yard.
"What have you in that bowl?" demanded the hotel man, referring to a utensil he was hugging.
"Mushrooms," responded the new waiter. "There's a gentleman that wants chicken smothered with mushrooms and I'm trying to smother him, sir!"

Remember, be Kind to Animals.
Mayor Amos Radcliff of Paterson, N. J., helped lower a boy on a rope from a bridge to rescue a cat on a rock in the river. Kitty sunk her claws in the seat of the boy's trousers. The breeches buoy rescue was successful.—Chicago Herald.

Young Boy (to very stout lady who finds great difficulty in getting into a valley car)—"I say, lady, if you had got more yeast when you were young, you would rise better."
Lady—"And if you had got more yeast, you would have been better bred."

ST. PAUL

(Left over from last week.)
Robert Engle, of Pittsburg spent Sunday with friends and relatives in our town. He left for Pittsburg on Monday.

The organized Sunday school class with Mrs. Stagle as teacher met at the home of Mrs. Ben Winters on Wednesday of last week and spent the time in quilting.

Mrs. Mary Tennesfoss, was on the sick list for several days last week, caused by a severe attack of tonsillitis. We are glad to say that she has fully recovered and can be about her regular duties again.

By wrapping herself in a rug, Mary the twelve year old daughter of Mr. and Mrs. Milton Bodes, saved herself from what might have been a fatal accident. While standing beside a hot stove one day last week, her dress caught fire. Her thoughtfulness prevented further harm.

Doubtless many lives could be saved every year, much suffering and bodily disfigurements prevented if children were taught in the home and the school what to do in case their clothing caught fire.

Henry Ford.

We admire the position taken by Henry Ford in the event of war between the United States and Germany. It is said that he has promised to put his whole fortune and manufacturing interests at the disposal of the government, and also his personal services free of charge. Now let all business men expecting to gain financially by war, who pose as patriots, take the same position, put themselves and their possessions at the disposal of the government free of cost, and we will have some evidence then that they are not patriots for the sake of profit. Let them go to the front and show their colors. It is for their protection and for the protection of their property that the young men will face death on the field of battle. No less a man than President Wilson himself said in a message to Congress:—"I for one do not doubt the patriotic devotion either of our young men, or of those who give them employment, those for whose benefit and protection they would in fact enlist." This was an argument which employers should favor his program of preparedness.

Let the employers show their devotion to their country, not by trying to persuade their employes to enlist but by enlisting themselves. This will indicate their sincerity in the justice of the cause and be some encouragement to their employes to do the same. "An ounce of prevention is worth a ton of cure." It is altogether possible for our representatives to avoid war and do it honorably.

If the men who earn the wealth, or who are the creators of it, were a self-conscious organization the danger of any war would be practically eliminated.

Has it come to this, that one man by insisting upon his rights, can plunge a whole nation into the jaws of death, into the mouth of hell, in order that the nation may not be dishonored. Shall the people stand for upholding laws, international laws, to which they have not given their assent, and allow themselves to be drawn into a war that is not of their making? Let the people by their own votes decide, if there occurs a violation of international law, as to whether they wish to settle the violation by means war, and let all who vote in favor of war sign their names to their vote agreeing to enlist, in case war is declared.

Would it not be better to segregate such members of society, or get rid of them altogether, if necessary, who persist in certain legal rights which may involve the whole nation, in order to save the body politic from being plunged into hell fire.
