FOX SUPER-FEATURE

Love, Romance and Intrigue.—William Fox presents the famous Idol of the silent drama, Theda Bara in the second Super De Luxe production, "The Darling of Paris." Founded upon the great French classic, "The Hunch-back of Notre-Dame" by Victor Hugo. A play of profound human interest, dramatic in action and of intense force, see the brilliant screen star, Theda Bara impersonating the beautiful Gypsy Girl, Esmaralda, the most delightful character in French Literature. What is today known in police circles as the "Third Degree" is as old as civilization. It was practised in the day of the Roman Emperors. It is shown in the career of Esmaralda in "The Darling of Paris." The gypsy girl is tortured into confessing a crime which she did not commit. "The Darling of Paris" is another Theda Bara sensation, full of big scenes, including the Soul-Stirring Tribunal Scene, there will be a Paramount feature shown along with the above making a ten reel program. Special music by the Auditorium orchestra. First show 7 p. m., admission 10 and 15 cents.

ST. PAUL
Sam Livengood and Maurice Hostetter had a narrow escape with their lives last Wednesday, when a car load of dirt came down on them. They just succeeded in extracting themselves before there was a still greater fall. Neither of them sustained any injuries.

Mrs. Monroe Kretzman of near Salesbury, and her daughter Edith were visiting Mrs. Nancy Kretzman, the former's mother-in-law on last Friday.

Mr. Ross Sechler, is visiting his wife at present who is confined in a cancer hospital in Richmond, Va. We hope he found her condition improving.

Miss Florence Sipple, who was spending some time at home, returned to her former place of employment, Morgan Walkers in Summit township.

Mrs. Mary Tenneford and her son Joseph and Margaret Lepley, were attending church at Springs on Sunday. Devotional services will be held every Wednesday evening during Lent, in the Reformed church at St. Paul.

The Dollar.
You money-mad people of Pennsylvania, won't you just for a moment put the dollar away from your eyes long enough to see, just ahead of you, the war beast plotting for your children! Your legislature is trying to pass a law to use the public schools to teach the children the art of murder. Will you not let your mighty voice be heard in protest against such a nefarious scheme?

Listen, for a moment, to the words of your superintendent of our schools, Nathan C. Schaeffer. Here is what says: "The study of war, the military drill during the most impressionable periods of adolescent life, leaves in the subconscious depths of the soul the material for war and the worst that human nature is capable of."

According to the price of sugar it looks as if we will have to stop using it for a while, and buy some good sour vinegar in its stead, which I am sure would answer just as well.

Farmers should get busy with their sugar-making, we are sure it will be a large run also a large profit this year.

POCAHONTAS POINTERS

Grayfish as a Food.
It used to be called the dogfish and was looked upon as a worthless nuisance. Now, through the efforts of Uncle Sam's bureau of fisheries, it is called the grayfish and is in great demand as a valuable food product. The grayfish contains a little less protein and a little more fat than the salmon, but in digestibility, richness and wholesomeness it equals, if it does not excel, many of our popular fish foods. One interesting result of the analysis thus far made by the government is that the grayfish is entirely free from uric acid, which is not true of meats, poultry or other fishes.

A Lonely Continent.
Australia is the most isolated of all inhabited continents and is remote from the center of all the world's activities. Northward the sailing distance to Japan is approximately 8,000 nautical miles; to India 2,500 miles. South America is 7,000 miles to the east, and Africa an equal distance west. From London to the capital of Australia ships by the Suez route traverse approximately 11,000 miles of water and by the Panama canal 12,734 miles. From California ports the routes via Samoa or Fiji or Tahiti cover a quarter of the circumference of the earth. Australia's only large civilized neighbor within a radius of 1,000 miles is Java.—National Geographic Magazine.

Willing to Bear It.
"Well, dearest, I have just asked your father for your hand."
"What did he say?"
"He asked me if I felt capable of assuming a heavy burden."
"And what did you tell him?"
"I told him I would take care of all he would give us."—Boston Transcript.

The Macaroni Record.
The "macaroni record" stands at present at 2,100 yards (just under a mile and a quarter). This is the exact mile of macaroni swallowed by a Signor Sporecambi in an eating duel with Signor Bevere a few years ago.—London Tit-Bits.

A Sad Prospect.
"They say there's no fool like an old fool."
"That makes me shudder for the future. I've already been all the other kinds."—Kansas City Journal.

Hens and Water.
From the hen's viewpoint, water is worth just as much as feed, for she can't make an egg with either one alone. Therefore the man who provides high priced feed, but neglects the water supply, is making a big mistake and will have to be content with a limited egg yield.

That's Different.
"What's the matter with me, doctor?"
"You have a stitch in the back."
"Dear me, that is prosaic. I can't tell my stylish friends. They would laugh at me."
"This is one of the fashionable new stitches."—Pittsburgh Post.

Self reverence, self knowledge, self control, these three lead life to sovereign power.—Tennyson.
