NOTICE IN DIVORCE.

TO CHARLES OTT

You are hereby notified that the Court of Common Pleas of Somerset County, Pennsylvania, has appointed the undersigned as master to take testimony, find the facts, and report the same to said Court, with an opinion, in the action in divorce by Wilhelmina Wiland Hott against you, at No. 7, December Term, 1918, in said Court. In pursuance of said appointment, I shall take the testimony at my office in Somerset Borough said County, on Tuesday, June 25th, 1918, at one o'clock in the afternoon; at which hearing you may appear if you see fit.

ERNEST O. KOOSER,
 Master.

Bridging the Gap From Steer to Steak

Live stock is raised on the farms and ranches of the West.

Meat is eaten in the large cities of the East, and by our boys in France — thousands of miles away.

The day of transporting live animals from ranch to seaboard and overseas has passed. There was too much waste. The modern packer locates his large and specialized plants in the producing regions. He ships the dressed beef in refrigerator cars, and holds it in his own refrigerated branch warehouses until delivered to the retailer. For shipment to foreign ports, he transfers the meat to refrigerated ships.

By means of his nation-wide organization the modern packer maintains a continuous flow of meats to all parts of the country, so that each retailer gets just the quantity and quality of meat his trade demands, and at the time he wants it.

Swift & Company recently shipped 1,000 carloads of meat products in one week to our Armies and to the Allies.

Bridging the gap from ranch to consumer can be done successfully—and at low unit costs and profits—only by large business organizations.

Swift & Company's profit on meat, always so small as to have practically no effect on prices, is now limited by the Government to about 2 cents on each dollar of sales.

CAN'T GET ALONG WITHOUT HERMAN.

Although defeated for election to the office of Tax Collector of Elk Lick Township last fall by a combination of the old political parties and the marriage to their party name of some voters, Herman G. Leppley, Editor of The Commercial, has been retained by the School Board to collect the school taxes for the township, a recent ruling having been made which gives the Board authority to select its collector.

To Train America's Future Men and Women

There is no more important work—at any time—than the training of the youth of a nation. We must win the war, but while we are winning it, we must preserve Democracy and prepare for a better Democracy for the future. Teaching is now more than ever a patriotic calling, and a national necessity. Trained workers are the only kind that are wanted. A course of study and training—including actual teaching experience—at the

STATE NORMAL SCHOOL of Indiana, Pa.

Will fit you for this national service. The demand for trained teachers greatly exceeds the supply. The work is inspiring, noble and patriotic. Indiana is a school of ambitious workers under the guidance of a faculty of fifty experienced teachers. Beautiful and healthful location. Christian influences. Athletics. Modern buildings splendidly equipped. \$240 covers all expenses (excepting rental of books) for school year of forty weeks for one preparing to teach, and includes board, room, laundry and term fees. In connection with the Normal School are—The Indiana Conservatory of Music, The Indiana School of Business, and a Domestic Science School.

The Indiana Catalog—one of the most beautiful and interesting of books about schools ever published—free on request.

JOHNSTOWN

Sells the Champion Cream Saver

THE NEW DE LAVAL

NINE separator users out of ten turn the handles of their machines too slowly, and when this is done, not only will the machine not skim as clean as it should, but the thickness of the cream will vary.

While it is possible to adapt the capacity of the machine to the speed, it is not desirable to do this, because even if fairly clean skimming is accomplished at varying speeds, the cream will not be uniform in thickness.

There is only one satisfactory solution, and that is to make it practically impossible for the operator to run his machine at any but the proper speed.

Every NEW De Laval is equipped with a bell speed-indicator

the "warning signal" that rings when the separator handle is being turned too slowly, preventing loss of butter-fat caused by too slow operation and insuring the delivery of a cream of uniform thickness.

This simple device is patented by the De Laval Company and is found only on De Laval machines. It is only one of the many important improvements in the NEW De Laval. If you are considering the purchase of a separator, come in and let us show you a machine that has more good features than any separator you have ever seen.
