Salisbury Notes

Birthday Surprise Party The home of Mrs. Eliza Hause at West Salisbury was the scene of a delightful birthday surprise party on Friday evening when about forty neighbors and friends congregated at the Hause home in honor of Mrs. Hause's seventy-eighth birthday. The surprise was arranged by her son Samuel and was complete. She received many useful presents and was much pleased to be thus remembered and honored by her many friends. Mrs. Hause is hale and hearty for a woman of her advanced age and bids fair to be able to enjoy many more birthdays. The evening was spent in playing games and in singing and music. Mr. Samuel Hause presiding at the organ. Lunch was served about midnight. The following guests were in attendance: Mr. and Mrs. Angus McKenzie, Mrs. Wm. H. Deihl and daughter, Mrs. Cal. Rumsinger and two daughters, Mrs. Reed Livengood, Mrs. Robert Cochran and two grandchildren, Mrs. William Weimer and children, Mrs. Henry Deihl and children, Mrs. Lena Maust and daughter, Mrs. Tillie Schramm, Mrs. Wm. Haselbarth and daughter Violet, Mrs. John Burkhardt, Mrs. Agnes Harris and children, Mrs. Lena Sell, Mrs. George Schramm, Mrs. Herbert Smalley, Mrs. John Kemp, Mr. and Mrs. John Kinsinger and Samuel Hause.

West Salisbury Post Mistress Taken to Hospital Miss Ellen Rodamer, post mistress at the West Salisbury Post Office was taken to the Western Maryland hospital on Sunday on account of some inward ailment and today she is reported as being in a very precarious condition.

Salisbury Hotel Under New Management Final arrangements were made last week between Mrs. Fannie Wagner, the former manager of Salisbury Hotel and Mr. and Mrs. Ed. M. Loechel and the latter have taken over that establishment which Mrs. Wagner conducted successfully for several years. Mr. and Mrs. Wagner will locate in Ohio where they will go in the restaurant business.

Mr. Loechel is an experienced hotel man, having been associated with it for many years in his father's hotel and so the public can feel assured the new management will keep the hostelry up to the high standard maintained by the former proprietors. The handsome cement-block building in which the hotel and restaurant is housed is owned by C. M. May.

New Post Office Clerk Miss Melba Schramm, for several years an efficient clerk in the Elk Lick Drug Store, has been appointed clerk in our local post office to fill the vacancy caused by the death of Miss Evalyn Fate. Miss Schramm has taken up her new duties.

Real Estate Deal By a deal consummated lately, Darius Broadwater, one of our local butchers became owner of a parcel of ground situated in Elk Lick township and adjoining the west and south sides of the latest Beachy addition to Salisbury. The purchase was made from Frank Bomesburg, who owned it for ten or twelve years. Your scribe has not learned the purchase price.

Minor Mention Edith Martz, teacher of the Thomas school is housed up with an attack of grippe. Allen Baer of Uniontown visited his brother, Elmer Baer and family on Saturday night. Mrs. Jerry Miller has been ill for the past week and her condition is not much improved at this writing.

Miss Maud Schramm, a primary teacher in the Salisbury schools has been ill with the flu for a week or more, but she is improving rapidly now and expects to be at the head of her school in the near future. Geo. G. Bowman, one of our local coal operators is spending several days at Baltimore, Md., and other points on business. Roy Schramm and children are down with the "flu" but are improving.

Our weather prophet says their is one thing he can't understand—that is that men get the flu harder than women and men wear many more clothe than the women do. He says there is one man in this neighborhood that wore 6 pair trousers, 3 shirts, 2 sweaters, 1 blouse, 1 overcoat, 2 pairs socks, 1 pair felt shoes, 1 pair zippers, and still he is cold and got the grippe the hardest. Can any one explain?

INDUSTRY NOW GIVES WOMEN EQUAL CHANGE

Survey Shows Owners Do Not Discriminate.

New York.—Women have practically equal opportunity of employment with men in manufacturing industries where they are capable of doing the same work as men and doing it as well, in the light of a study of the subject made by the national industrial conference board. This conclusion is based on an analysis of reports of 129 manufacturing companies, 65 of which stated a preference for men, 47, however, preferring women while 17 expressed no preference. In all the plants reporting the work was of such a nature as could be done equally satisfactorily by either men or women.

Comparatively little objection was found to exist among manufacturers to the employment of married women. Out of a total of 22 companies employing women, only seven will not keep a woman worker after marriage, and the company, requires any woman employee who marries to resign within six months. Six establishments, while not following a rigid rule of discharging married women employees, follow a policy of discouraging them from remaining.

Some Want 'Em Married. On the other hand, 15 companies encourage woman workers to remain after they marry, while four companies out of the total number adapt their policy to the circumstances in each individual case. One company favors widowed woman employees. The majority of industrial managers, however, evidently do not consider a woman worker's marital status as a pertinent or important factor in determining her desirability as an employee.

But while the opportunity for employment in the manufacturing industries where the work is of such nature as can be done equally well by either men or women is practically the same for women as for men, less equality exists in the matter of wage earnings. Women's hourly earnings in the manufacturing industries range approximately 35 per cent lower than those of men. This, however, the conference board's wage studies disclose, is due to the generally smaller output of women rather than to any unwillingness on part of industrial management to pay them the same as men. The fact that earnings per hour of women working on a piece-work basis where the basic wage is the same as for men, which is the case in many instances, average less than the earnings of the men is cited in evidence. This is also the reason given by many employers for the lower wage rates allowed women where wages are paid on a flat-rate basis.

Women's Pay Boosts Greater. Women, however, have made a relatively greater economic gain in the general rise of the wage level during and since the war than have men, the average hourly wage earnings of women in the manufacturing industries now being approximately 100 per cent higher than in 1914, while those of men have advanced by only about 140 per cent. It must be taken into consideration, however, that women's hourly earnings in 1914 averaged only 60 per cent of men's earnings.

Women's total earnings over a period of time average less also because women in industry put in less time than men. The average number of hours a week worked by women wage earners during 1927 in 25 manufacturing industries was 43.3 as against 48.2 hours worked by men, with the result that the average weekly earnings of women workers were approximately 40 per cent less than those of the male workers. More frequent absences among women further contribute toward their relatively lower earning capacity in industrial pursuits.
