

ARM AGENTS' NEWS LETTER

Get Cows Ready for Winter Milking

Cows which freshen during the fall early winter should be well-fed if the maximum production throughout the winter months is desired. Such cows should be dried off about two months before freshening time, if at all thin, they should have rations until a short time before calf is due. Feed liberally of silage and all the grain necessary to get the cow into good flesh. Good grain mixture is 100 pounds of good meal, 100 pounds of ground corn, 100 pounds wheat bran, and 75 pounds oil meal.

About a week before freshening reduce the amount of grain and only wheat bran, or bran and a little oil meal, until the silage is about a week old when a gradual change can be made to regular ration. In silage feeding it is entirely safe to begin immediately after the silo is filled. Cows freshening in good condition give more than enough extra feed to pay double prices for all extra feed used to get them ready for a full pail later.

Select Vegetables For Winter Storage

Although the dry summer season greatly reduced the yield of vegetables in home gardens, careful attention to garden crops during the season of growth may insure a sufficient quantity for use during fall

and winter months. All vegetables not needed for immediate use should be either canned or stored for later use.

Vegetables which may be stored for winter use in the home include beets, cabbage, celery, horseradish, leeks, onions, parsnips, potatoes, pumpkins, winter radishes, winter squash, sweet potatoes, and turnips. Other vegetables, such as cauliflower, eggplant, peppers, spinach and tomatoes, may be kept for several weeks.

Care must be exercised in handling vegetables which are to be stored. Decay usually starts when vegetables have been bruised. With certain vegetables, the stage of maturity at the time of harvest is very important. Beets, carrots, and turnips should not be allowed to become fully matured as woodiness will develop. These vegetables will keep better under good storage conditions and be of high edible quality if they are harvested in immature condition.

Cabbage, onions, squashes, and pumpkins, on the other hand, will not keep well under the best storage conditions unless they are well-matured at the time of storage. Tender vegetables will not keep well if exposed to a heavy frost, and even the hardy vegetables, such as beets, cabbage, turnips and celery, may be injured by freezing before being stored.

Most vegetables require a low temperature to keep well in storage. A temperature just above freezing and a moist but not wet atmosphere are best for beets, carrots, parsnips, salsify, turnips, cabbage, and celery.

Onions keep well only when in a dry, cool place which has plenty of ventilation. Squashes, pumpkins, and sweet potatoes require a warm dry atmosphere for storage. Parsnips and salsify will stand freezing and are often left in the garden until spring. Tomatoes, eggplants, and

peppers may be stored until November or December. The plants are pulled and hung in a cool, dry place which is well ventilated, or the green fruits are picked and placed carefully in small baskets or crates or spread out on a shed floor or in a coldframe.

Vegetable Storage Meetings

Vegetable storage meetings will be held at the following places: Monday Sept. 30, Simon Maust, Springs, I.P.M. Reverend Rhoads, Brotherton, T.P.M., Tuesday Oct. 1 Harry Tospon, Somerset, 8 A. M. Mr. J. M. Huffington of State College, will be present at these meetings to explain the proper kind of storage for vegetables for winter use.

State Poultry Tour

The State Poultry Tour comprising fifty people passed through Somerset County Tuesday and stopped to see the largest turkey farm East of the Mississippi River.

Show Your Products

There are three places where 1929 products can be shown: Somersets Indoor Industrial Exposition and Fair, The Pittsburgh Apple and Potato Show, and The State Farm Products Show. Somerset County should be well represented in the display of these three shows. The best time to make this selection is at harvest time. For example, while you are picking potatoes, when you come to one which looks like a show tuber, put it in your pocket or put it to one side; then when a rainy day comes make your final selection from this three or four bushels which you have previously laid aside.

C. C. McDowell, County Agent

The way the American people are becoming air-minded it wouldn't surprise us if the next popular sport would be airplane polo.

A GUARANTEED REMEDY FOR PILES

Go to Collins Drug Store today, hand them 3¢ and say "I want a jar of San Cura Ointment" and if you aren't satisfied your money back.

"For twenty years I suffered with bleeding and itching piles; at times I was confined to the house for more than a month. Two years ago I began using San Cura Ointment and one 60c jar made a firm and permanent cure. I have not been troubled since."—Rev. W. F. Gilbert, Titusville, Pa.

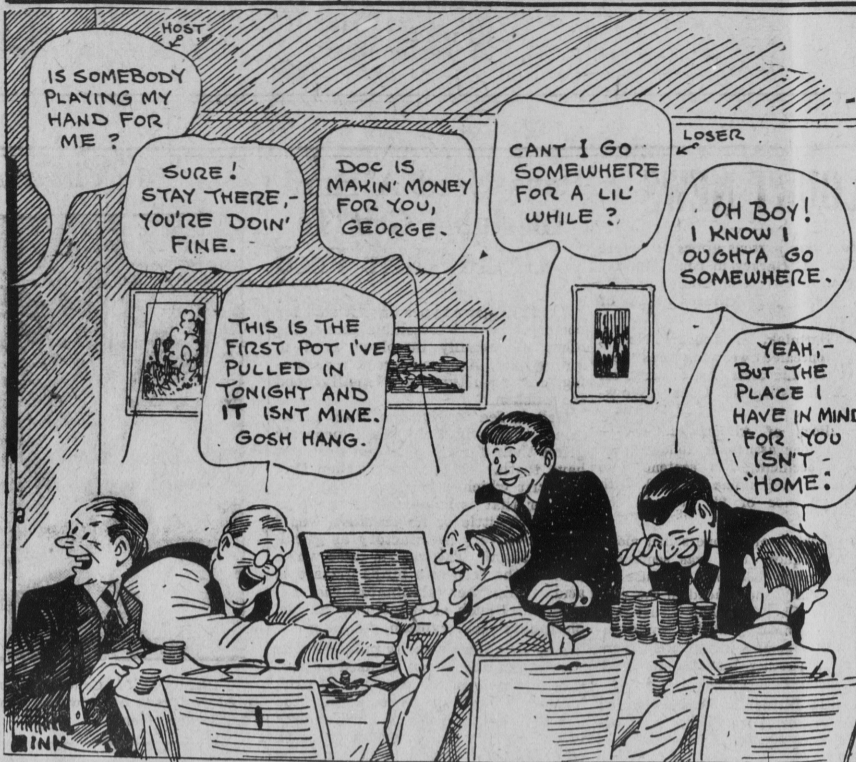

It draws out poison; that's the secret of the wonderful success of San Cura Ointment; that's why it so quickly heals scalds, burns, cuts, bruises and eczema. It's best to use San Cura Soap at all times; it is a great aid in banishing pimples, blackheads and the germs of disease. 25 cents. Collins Drug Store.

Cured of Eczema

I Am Often Laughed At

for being such a strong advocate of San Cura Ointment. "I had doctored four years before getting San Cura Ointment and I was suffering intensely at the time I started to use them. In a few moments I was very much relieved. I continued using them and was completely cured of Eczema. I cannot get along without either San Cura Soap or Ointment. They are good for burns or sores of any kind."—Mrs. Sara R. Byerly, Greensburg, Pa. San Cura Ointment relieves itching, skin, old running and fever sores, cuts, burns, bruises, boils, piles, chilblains, catarrh and chapped skin and Sunburn. 30c and 60c. San Cura Soap is fine for skin eruptions and for babies' tender skin. 25c per cake, all druggists.

SOMERSET BUSINESS COLLEGE NEWS

The evening session of the Somerset Business College commenced Monday evening with a record enrollment. There are still a few vacancies and the individual system of instruction permits students to enter any time.

A meeting of the student council was held on Monday morning, at which an election of officers was held. Miss Dorothy Lint was elected president. Miss Lint in her speech of acceptance stated that she would do everything she could to make this year a successful one and to promote as much as possible the student activities. Miss Lint is a graduate of the Somerset High School, where she was president of the Varsity S. Club, president of the Worth While Club, business manager of the Girls Glee Club, secretary of the Dramatic Club and also an honor student. Miss Pauline Mathias was elected secretary. Miss Mathias is a graduate of the Somerset High School and was connected with the French and Latin Club. Miss Doris Shaulis was elected treasurer, Miss Evelyn Knepper, auditor, and Miss Mary Louise Shaffer, assistant auditor.

The following were appointed members of the Social Committee: Mr. Charles Cage, Miss Elizabeth Cupp,

Miss Mary Louise Shaffer. A meeting of the social committee was held on Friday at which was decided to hold a corn and weiner roast and marshmallow toast. At the end of the day sessions the students will leave by automobiles for Walters grove where they will engage in various social and athletic activities.

Not only is the Somerset Business College receiving calls for its graduates from business concerns in Somerset and vicinity but also it is being recognized by concerns in other cities. A few days ago the Somerset Business College received a call from one

of the largest corporations in Pittsburgh, for one of our graduates to fill a secretarial position with a great opportunity.

Allan Hoover, son of President and Mrs. Hoover has entered the Harvard School of Business Administration. He completed his academic course at Stanford University early last summer.

William Emmet Dever, Mayor of Chicago from 1923 to 1927, died on September 3, at his home in Chicago.

Don't Worry About Moths —mothproof cloth itself

Larvex actually mothproofs clothes, rugs, furniture, so that moth-worms won't even begin to eat them. New and sure way to prevent moth damage.
