To Meet Miners in Conference Milly

Wilkesbarre, Pa., Aug. 18.-It was stated authoritatively last night that the coal operators of the anthracite region will not accept the invitation of the United Mine workers to meet in joint conference to discuss grievances. The operators will say that there are no grievances to discuss. A list of answers have been prepared by the operators in reply to each grievance put forth by the convention of the United Mine workers held in Hazleton this week

hard coal region. In the second place, there is an appreciable difference in the conditions of bituminous and anthracite miners, but always in the former's favor. There is a reason of course, but the operators in the anthracite field are not respon soft coal and in consequence the miner engaged in the west works a greater a higher wage. Anthracite is the bet-ter coal, but the fact remains it is not in demand and perhaps because it is considered a luxury, it is not used only when it becomes an actual necessity.

The price per car has not been reduced in years, they are numbered and the dockage does not exceed 4 per say that it reaches 25 p er cent. Sooner than take 25 cars from an output of 100, the companies would tell the man his services were no longer needed. There are printed rules which vary according to the vein. In some veins the coal is dirter than in others. A man is suspended for one day when his coal contains slate or dirt in excess of 200 pounds per car. In veins where the coal is very dirty the companies allow 800 pounds to the car. For the second offense three days, and so until the miner shows no disposition to clean his coal, he is discharged.

A prominent operator said last night that he did not think the failure of the operators to join the miners in conference would result in a strike
