ROOSEVELT'S ACCEPTANCE. Declares the Republican Policy Was

Established by Jefferson. Oyster Bay, L. I., Sept. 17.—The letter of acceptance of Theodore Roosevelt accepting the Republican nomina-tion for vice president is a document of over 4.000 words, devoted mainly to the Philippines question. He appeals to "all good citizens who are far sighted enough to see what the honor and interest of the nation demand." and interest of the nation demand."

After asserting that the re-election of President McKinley is "of vital importance to the whole country," that to put into practice the principles of the Kansas City platform would mean grave disaster to the nation, that the policy of 16 to 1 is fraught with destruction to every home in the land, and that men who refuse to make the financial issue paramount have no excuse for raising it

every home in the land, and that men who refuse to make the financial issue paramount have no excuse for raising it at all. Mr. Roosevelt discusses briefly the question of trusts, declaring that publicity as to capitalization, profits, etc., is the most useful measure for their control. Discussing the Philippines he says that "The parallel between what Jefferson did with Louislana and what is now being done in the Philippines is exact. Discussing this question further he says."

The constitution has never yet "followed the flag;" the army officer and the civilian agent still exercise authority, without asking the "consent of the governed." We must proceed in the Philippines with the same wise caution, taking each successive step as it becomes desirable, and accommodating the details of our policy to the pseudiar needs of the situation. But as soon as the present revoit is put down and order established, it will undoubtedly be possible to give the islands a larger measure of self government than Jefferson originally gave to taking a single step which in any way affects our institutions or our traditional policies. From the beginning we
