Useful Knowledge.

Every housekeeper should know that when an article of food scorches in cook-ing, if the vessel containing it be immediately uncovered and set into a pan of cold water for a few minutes, carefully removed from the vessel without stirring the food which has been scorched, it will not taste of the scorch. Thorough mastication was of the utmost importance, and, of course, this presupposed a proper condition of the teeth. Gastric digestion was often weakened and much distress was caused by

Another factor in causing dyspep sia was the habit of eating food in silence or without that mirth and good fellowship so necessary to insure a nervous condition to the normal action of the digest-ive organs. Care of China.

The care of china is not so simple as it appears. Some paste is so perfectly hard that it never "takes" dirt, other specimens are very absorbent. Of course, chi-na must not be rubbed with anything very gritty or the glaze will be destroyed,

The Great Preacher.

It is reported that a young man, being examined preparatory to joining the church, was asked, "Under whose preach-ing were you converted?" "Under nobody's preaching," was the prompt reply. "I was converted under my mother's practicing." Did any preacher ever utter so powerful a sermon as the young man embodied in those few words?

Heathen mythology cannot be assumed to be historically correct, although it is often interesting. The legend of the Hindoos concerning the creation of woman is one of the most entertaining of myths that have been preserved through the ages. It relates that at the beginning of time Twashtri, the prototype of Vulcan of more recent mythology, created the world. When he found that his work would be incomplete without woman, all his material had been exhausted. There was not a single solid element remaining. Much perplexed, Twashtri, after pro found meditation, took the roundness of the moon, the undulations of the sernent the entwinement of creeping plants, the trembling of the grass, the slenderness of the rose vine and the velvet of the flower, the lightness of the leaf and the glance of the fawn, the gayety of the sun's rays and the tears of the mist, the inconstancy of the wind and the timidity of the hare, the vanity of the peacock and the softness of the down on the free from sogginess. throat of the swallow, the hardness of field was a union bricklayer, and had no part in the fight. I remember she danced before me, singing. I recall how she glanced at me from the corner of her eye, that she played with me, clung to me." And Twashtri returned the woman to him. Three days only passed, and T. saw the man coming to him again. "My lord," said he, "I do not understand exactly how, but I am sure that the woman causes me more annoyance than pleasure. I beg of you relieve me of her.

But Twashtri cried, "Go your way and do your best." And the man cried, "I cannot live with her!" "Neither can you live without her," replied Twashtri.
