CONDENSED NEWS

This year is almost at an end, only 82 days remaining.

House keepers complain of the high prices for good white potatoes. The cold snap will do much toward

eliminating the germs of malaria. Many of our business men are re painting their places of business.

Many chestnuting parties to the surrounding hills will soon be arranged. The opening of the shooting season is watched for by many local sportsmen.

Between 1400 and 1500 cars of soft coal are passing over the Reading road at Tamaqua every day. They are sent over the Catawissa division.

The "Germania Verein" have elected the following officers: President, William Andress; Vice President, Christian Loeh; Secretary, Carl Molter; Treasurer, Andrew Schatz; Financial Secretary, Paul Knoch; Trustees, Paul Swentek, J. Wilhelm and Herbert Wyle.

The peaches are about over for this season. A few stragglers still remain on our market stands, looking somewhat in the order of the last run of shad.

"The Man from Mexico" which Walter E. Perkins and his company will present at the opera house Saturday evening is described as one of the funniest comedies ever offered to theatre goers in this country. It is in no sense an experiment as it has been played with great success in all the principal cities of the country and has been given the utmost limit of praise for the humor of its situations.

Water Board Hold Meeting. Following upon the meeting of water committee of the Council Tuesd evening, the Board of Water Comm sioners convened at the Council cham-

works building. With the exception of a few changes the plans were approved and Superintendent Keefer was instructed to start the excavation, preparatory to the construction of the foundations.

Organization is Possible.

Miss Margaret Bogenrief, Assistant Director in the department of Physical Training of the State Normal school of Bloomsburg, met several of the young ladies of this city yesterday afternoon in the parlors of the Y. M. C. A. and talked over the advisability of organizing a club in Indian club swinging.

Miss Bogenrief was very favorably im pressed with the outlook and at her next visit here it is almost certain that such a club will be perfected.

Disagreement Over Mixture.

The men in the old puddle mill at the Reading Iron works did not charge their furnaces last night owing to a disagree ment with the company.

The puddlers claim that they have been working a mixture of low phos phorous iron and steel scale from which they cannot make the same tonnage as they do when working pig iron. They are of the opinion that \$3.50 per ton should be paid for this work.

New Degree Worked.

Fifteen members of Mahoning Tribe No. 77, Improved Order of Red Men, were given the Haymaker's degree after the regular lodge meeting in their hall in the Lyon's block last evening. About eighteen members of the Sunbury lodge were in charge of the new work, which is of a social nature entirely. Later in the evening a lunch was served at the Palace Hotel.

Enjoyed a Pleasant Day.

Liveryman Raymond Ikeler drove the following hack party to the home of Ambrose Miller near Washingtonville vesterday morning where they were very pleasantly entertained: Mesdames M. D. L. SCARCITY OF WATER IN THE RIVER

Remedy For It.

Some apprehension is being felt by many of our citizens in regard to the o'clock Saturday afternoon at the Will- water supply for the coming winter. The Susquehanna is lower now than it has

Despite the rainfall of Monday, the rise in the river is hardly perceptible and as the equinoctial storms have as yet made no appearance, many are inclined to believe that the river will remain low freeze-up should occur before there is water enough to cover the wells on the west side of the bridge, it will necessitate the laying of a pipe from the wells to a point between the first and second piers where the water is deepest. It is seldom we have heavy rains at this

procedure may have to be adopted.

Important Invention. Letters patent have been granted to Lewis Morgan, of Reading, Pa., for an improvement in spring appliances for rolling mill couplings. The invention consists in the application of metal band springs to roll trains; whereby loose couplings are firmly held during the revolutions of the train; preventing as in the present way, those counter rotary motions of the boxes and spindle, resulting in the "backlash" which is the cause

This device is readily attached or removed without disconnecting the train and does away with the usual noise and clatter of the machinery. Mr. Morgan was for many years employed as a one time occupying the position of Supis now assistant Superintendent of the Spruce street sheet mill of the Reading

Iron company at Reading.
