About six years ago he began to take a prominent part in the local organization of the miners and in a short time was elevated to a place in the state organization, of which he soon became the chief officer. In 1897 Mitchell was elected vice president of the United Mine Workers national union, and when in 1898 President Ratchford resigned to accept a place on the National industrial commission, appointed by President McKinley, he succeeded to the presidency of the organiza tion. At the convention of 1899 he was elected to the presidency for the full

Carleton's Anchor to Windward. Henry Guy Carleton is not only a playwright, but also the president of an electric company that does business in a large Broadway office building. The company is devoted to the manufacture of certain of Mr. Carleton's own inventions which are designed to serve a multitude of useful purposes. Mr. Carleton is not yet so well known as an electrician as he is as a writer for the stage, although he is working seriously in this field, and has had the reputation of possessing a talent for invention greater than his plays have always shown. Mr. Carleton divides his time between his literary work and his electric company and finds one an admirable relief to fatigue caused by the other. Playwrights with another occupation are regarded as fortunate, because the proportion of plays that will succeed can never be determined. A succession of failures leaves an author without income, and he will find it more difficult to get rid of his products. So an alternative occupation is looked upon in the profession as an excellent anchor to windward.

The Governor of Stricken Texas. Honors are almost always accompanied by responsibilities, and sorrows. impersonal in their character, sometimes follow these. It is an honor to hold the responsible position of governor of the great state of Texas, but the incumbent, Hon. Joseph D. Sayers, is a sorrowing man. A great calamity has visited his beloved state. One of her handsomest and most prosperous cities lies stricken, a maimed and crippled plaything of the unmindful wind.

HON. JOSEPH D. SAYERS. Thousands of Texans have fallen to rise no more in the sunny clime of the Lone Star State, wives are widowed, husbands have lost their best loved, little children have been orphaned and the great heart of Texas is sad and sore. But a nation has extended its sympathy to a stricken daughter of the family of states, and all that man can do to assuage grief and repair damage is being done. And it is through her governor that Texas is today receiving the evidences of the whole country's sympathy and eagerness to help. The present position of Governor Sayers is indeed one that calls for the display of the better qualities of man.

An illustration of the new lights which science throws upon old questions is the modern explanation of an experiment made nearly three centules ago by the Flemish physician Van In a pot of earth weighing 200 pounds he planted a willow branch weighing five pounds. He kept the plant well watered, and in five years he willow had gained 164 pounds in veight, while the earth in the pot had ost only two ounces. Van Helmont nferred that the plant's gain was due nly to the water which had been suplied. Modern botanical science proves hat the gain was in a great measure ue to the carbon absorbed from the

The quality of the poultry is uch improved over what it was in revious years and shows that the andard is steadily being raised in all ne leading producing sections.

Everybody's proud of this sort of Grandpa, and he's proud of himself; proud of his clear brain and active body. There are other kinds of grandparents that we can't be proud of. Weak of body and feeble of mind, we can only pity them. They no more live; they only exist. What makes the difference between these two classes of old man. only exist. What makes the difference between these two classes of old men? A sound stomach and a plentiful supply of pure, rich blood. Dr. Pierce's Golden Medical Discovery strengthens the stomach, purifies the blood, and increases the activity of the blood-making glands. It won't make old men young, but it will enable old men to assimilate the food they eat, and so strengthen them for a life of reasonable exertion.

sonable exertion.

"I suffered for six years with constipation and indigestion, during which time I employed several physicians, but they could not reach my case." writes Mr. G. Popplewell, of Eureka Springs, Carroll Co., Ark. "I felt that there was no help for me: could not retain food on my stomach; had vertigo and would fall helpiess to the floor. Two years ago I commenced taking Dr. Pierce's Golden Medical Discovery and little 'Pellets,' and improved from the start. After taking twelve bottles of the 'Discovery' I was able to do light work, and have been improving ever since. I am now in good health for one of my age—60 years. I owe it all to Dr. Pierce's medicines.

Old people often need a laxative nedicine. The best for them is Dr. Pierce's Pleasant Pellets.

A Scheme That Failed. With a market basket filled with pieces of bank and treasury notes an old woman, who said she lived in Camden, appeared at the subtreasury and stated that she wanted the bits of money redeemed, says the Philadelphia Record. It required only a hasty examination for the efficials to determine that the pieces of notes were all from the edges and corners of bills of various denominations.

The woman was asked how she be came possessed of the pieces, which information she failed to give. Then she was bluntly told that the government would allow her nothing for the remnants of money, because it was plainly evident that the pieces were all clipped from whole notes. This the woman denied, yet she was obliged to go away without receiving passable cash for her offering.

The officials found that, though there were corners and edges from \$20, \$10, \$5, \$2 and \$1 notes, there was not a piece of a center in the entire collection, so that it would be impossible to make even one bill by pasting pieces together. There were enough bits, however, to equal a hundred notes in size. Judging from the paper and style of notes, it had required about 20 years to collect the pieces.

DIAMOND DIGEST de Possum publicans."

gist.

Gentlemen:—I have been taking your DIAMOND DIGEST TABLETS for two months past and am practically a well man for the first time in 10 years. Everything I ate distressed me, more or less, and I was all run down from lack of proper nourishment. I am eating everything that comes my way now, without the slightest inconvenience. Two tablets after a hearty meal and one after a light meal seem to thoroughly digest everything, and I am daily gaining fiess. My daughter commenced taking them about two weeks ago for constipation, and while they do not act as quickly as some powerful cathartic, they are positive, and much more satisfactory, because they do not gripe or distress her in any way, and the relief seems to be of a permanent nature. All other medicines have left her in worse condition after taking than before.

Something more than pandemonium broke loose as the speaker finished. This was the third attempt at betrayal, and, being unable to get at the betrayers, the crowd turned on each other. Detroit Free Press. Some curious expedients are neces sary at times in the medical applications of electricity. It is not uncommon now for the electric cabs in New York to be pressed into service as perambulating sources of electric power by physicians who are called upon suddenly to make X ray examinations of patients who are in localities where electricity from street circuits is no on tap. Recently on a steamboat ply ing from New York to a neighboring town a passenger undertook to commit suicide by swallowing laudanum. Among those on the vessel a physician was discovered, but naturally he did not have with him the apparatus for shocking the patient into sensibility. It was for awhile an even chance whether or not the suicide would be successful. Finally the electric light man on the boat bethought himself of his testing magneto, which is the same in construction as the calling part of the ordinary telephone-a box with two little gongs in front and a crank to turn. This machine can give a lively shock; so, armed with a few feet of wire and a husky deckhand to turn the crank, the electric light man ap peared on the scene and offered the service of his apparatus. It was prompt ly accepted, and by dint of vigorous grinding of the crank the patient was shocked to the extent of keeping him
