WORK IN THE KITCHEN.

How the Labor of Washing Pots and

Take a new whisk broom and cleans It thoroughly in a hot suds; dry it and hang it on a nail over the sink where it is within easy reach. At mealtime as you dish the food for the table, set the kettle in which it was cooked im mediately in the sink and draw it full of water, so that every part which the food has touched will be in soak. Ket tles that are left to stand unwashed without any water in them during the mealtime hour are ten times the trouble to clean afterward. It takes only a moment to turn the faucet, and the kettle will be full probably by the time you have emptied the next one. Treat the frying pans-everything in which you have cooked-in the same way Hot water is the best. If you have s good sized boiler, you can easily spare

When you are ready to begin washing the utensils, take the whisk broom and run it around the kettle, removing all the bits of food that cling to the edge of it; then around the sides and bottom in the same way. You will find the broom to be far more useful than a cloth or than the arrangement of metal rings which does duty in the same way. The metal rings are an im provement on the cloth, but not so good as the broom. After you have emptied the rinsing water draw fresh hot water from the faucet into the kettle make a suds with the soap shaker and with the broom wash the kettle al! over, rinse off the soap under the faucet and dry.

How to Whiten Clothes

Into a large saucepan-porcelain is best-put four pounds of bicarbonate of soda and four quarts of hot water. Stir frequently with a wooden stick occasionally until the solids are dissolved. Then let the liquid cool in a kettle. Strain the clear part through cheesecloth into wide mouthed bottles. Put the stoppers in and set away until for cleaning white floors and the tables. It is also good for cleaning the don't cry when your hair is combed sink, traps, etc.

THE WRITERS.

James Whitcomb Riley, the poet, now rarely wears the buttonhole bouquet which he used never to be without. He dresses very simply and wears the flow ers but seldom.

Punch announces the immediate publication of a three part serial by Frank R. Stockton. It is entitled "The Gilded Idol ever saw. and the Conch Shell" and deals with "Well, 3 American life on the side of politics. Miss Beatrice Harraden, the novelist

who was recently severely injured while mountaineering in Norway, has returned to England and is rapidly recovering. She found while in Norway that the Nor-wegian translator of her first novel had omitted its last chapter, saying that thus the story was much improved.

Mme. Sarah Grand will make her debut upon the lecture platform in the United States. Her lectures, it is said, will not consist of mere readings from her novels or essays, with anecdotes in-terpolated, but will comprise a series of carefully prepared addresses upon literary, artistic and sociological subjects.

Rudyard Kipling says his second trip to South Africa is made simply for rest wife and two daughters early in May I propose traveling extensively in all phases of the closing scenes of the war but as a spectator only. I have no intention of writing a book on what I may see. I am going out simply for a good loafing spell."

Care of Palms,

Once every week the surface of the leaves should be sponged off. Gloves should be worn when this operation is performed, as contact with the hand turns the edges of the leaves yellow. Palms should not be watered from above unless they are immediately wiped off, as each drop of moisture al turn yellow. When a room is swept or

lowed to stand on the leaf causes it to dusted, the plants should be covered. as the dust will otherwise settle on the fuls of flour, one-half cupful of chopleaves and clog the pores, through which the plant breathes. Most palms and ferns do not like gaslight and often the beaten whites of four eggs and one when left in an atmosphere charged teaspoonful of vanilla. with it will droop. The windows should be opened and the room well aired twice a day. The plants should b turned around each day, so that one side after another is exposed to the light, as the leaves will naturally grow out toward the sunlight.

How to Conquer or Die.

"I was just about gone," writes Mrs Rosa Richardson, of Laurel Springs, N C., "I had Consumption so bad that the best doctors said I could not live more than a month, but I began to use Dr King's New Discovery and was wholl cured by seven bottles and am well now and stout." It's an unrivaled life-save in Consumption, Pneumonia, La Gripp and Bronchitis: infallible for Cough Colds, Asthma. Hay Fever. Croup or Whooping Cough. Guaranteed bottles 50c. and \$1.0). By Hattie E. Briggs.

"Harry Walling, I don't believe one word you say about fairy godmothers. cried Vira Stephenson excitedly. "It is just one of his wicked stories to frighten us and make us unhappy, isn't it, Jo sie?" And Vira only stopped speaking from lack of breath and the immediat presence of tears.
"I'm afraid so," sobbed Jessie, will

never could endure either Harry's teas ing or Vira's censure of him without cry

"Well, of course, it is nothing particular "Every replied the boy. body has a fairy godmother, and she set to it that somebody is appointed to loc after us, take care of us when we are i trouble, and give us advice whenever need it. Some have one kind of a friend and some another. Mine happens to be a man, an Indian chief, named Newargo He told me that Vira's godmother is an Indian woman—a celebrated squaw of the Chippewa tribe. I also happen know that she will be in High Banks this afternoon. At 2 o'clock she will be a the big elm back of the playhouse

Would you like to see her?"
"Yes; tell her I'll come," called Vira "Yes; tell her i'll come, as Harry again started away with S yer's harness, "but Harry," she add ver's harness, "but Harry," severely, "don't you stay around. I don want you to hear what she says." "Don't you worry," was the gruff ply, "I'm not dying to hear any of you

At 2 o'clock Jessie and Vira their homes, casting furtive glances about to make sure that Harry was not water house what seemed an interminable length of time, Vira's heart almost stoped beating, to see coming to her, slow skirting the kitchen garden, a tall figu clothed in the garb of an Indian woman Her bright blanket glittered in the st light, and as she neared the appointed meeting place the girls saw that her face was of a dusky hue. Large beads hung about her neck, and her short hair was oiled so smoothly as to bring out every line of the bright penciling which adorned

Vira went carefully forward, fairly faint with awe and surprise; for in all her life she had never before seen a squaw, and that this one should be her god-

"You Vira?" queried the squaw, taking a swift step forward and grasping the little girl's hand. "Yes," was the child's almost inaudible

reply.
"I am your godmother," the squaw went on, in remarkably good English. "Newargo is Harry's fairy—I am yours. You," seating herself on the ground and looking fixedly at Vira, "are a good girl, but not pretty. Too dark to be pretty," she mut-"Most brown enough to be my

A flush came to Vira's cheek, for her dark little face had always been a sensi-tive point with her. She mentally decided that Indian godmothers were not an unmixed blessing after all, if they would

discuss facts so freely.
"You have many faults, Vira," the woman continued, looking at her narrowly, "which I hope you will correct before I visit you again. You don't like to get up in the morning, and you are never ready to go to bed at night. You read too much when you should be at your music And," she went on, "both you and Jessie are too selfish about things where Harry is concerned. He is a good boy, but it was only last night that you and his sister fairly quarreled with him because he ate your pieces of cake. A growing boy needs a great deal of cake." Jessie and Vira looked at each other in astonishment. How did the Indian wo man know so well what had happened?

"And now, my child," she said, "before I leave you, is there anything you want to ask me?"
"Tell me," the little girl stammered. "how-er-long have you been my god

"Always, Vira, always," was the reply "You were given to me because of your dark skin, and it has often been a ques-tion with us whether or not we better until the soda is dissolved. Then add take you to live with us. Would you like to live with me?" she asked, looking

eagerly into Vira's face.
"Oh, no!" gasped the no!" gasped the girl, clutching "Well," continued the squaw, "unles you and your little playmate beco selfish you will be separated, and now used. Any part that is not clear can till I see you again, remember these be put into separate bottles and used things: Rise more cheerfully mornings

"Why, Harry Walling!" screamed the girls in unison, as a sudden gust of wine blew the gay blanket apart and revealed the well known garments of their play

"Oh, you mean, horrid thing!" wailed Jessie, while Vira flew at him in a sud den fury and stripped the blanket and trappings from him till nothing remained but the brilliant penciling which gave his face the appearance of being the most vicious Indian woman the Chippewas

"Well, you need not kill a fellow," cried Harry, "because he has told you a few truths," as Vira's blows descended on his

"I'll never speak to you again, Harry Walling!" screamed his assailant.
"Nor I," echoed Jessie.
"Yes, you both will," answered the boy, grabbing the blanket and running toward the house, "the very first time

you want a drive after Silver."-Detroit Free Press. The Lamp That Wouldn't Light. A dear old country parson and his wife paid a visit to the seaside. While the simple pair were walking on the beach

one evening they suddenly noticed the revolving light of a lightship.

The old lady gazed at it with open eyes for some minutes, then she turned to her husband with a puzzled look:
"Well," she exclaimed, "if the man in
that ship hasn't lit that light this 40 times, and it has gone out every time."-London Answers.

PECULIARITIES THAT HEDGE ABOUT THREE, SEVEN AND NINE.

You believe that winds in part the by by They Have Been Favorite Numerals at All Times All the World Over and Disclose Some Queer Results When Twisted About a Bit.

Nobody has ever satisfactorily accounted for the popular partiality for odd numbers. "This is the third time!" exclaims Falstaff, on the occasion of a crisis in his relations with one of the merry wives of Windsor. "I hope good luck lies in odd numbers: they say there's a divinity in odd numbers, either in nativity, chance or death." And it is scarcely necessary to say that the belief is much older than Sir John Falstaff. Three, seven and nine appear to have been the favorite numbers all the world over. The ancients had three fates, three furies and three graces; Neptune's trident had three prongs, Jupiter's thunderbolt three forks, and Cerberus three heads. We have three estates of the realm, a man who accepts a bill has three days' grace, and three persons congregated together may make a riot. Shakespeare was well aware that he must have neither more nor less than three witches in "Macbeth" and that the brindled cat must mew thrice, and our popular folklore insists upon three merry men, three blind mice and three wise men of Gotham. Three meals a day is the usual scale of feeding. Of a more mystical character than three is the figure seven, or, at any rate, it has a larger number of religious appli-cations. Noah had seven days' warning

of the coming of the flood, and when it came he took fowls by sevens and clean beasts by sevens into the ark; the ark touched on Mount Ararat in the seventh month, and after seven days a dove was sent out followed seven days afterward by another. In Pharaoh's dream there were seven fat and seven lean kine, which Joseph interpreted to mean seven years of plenty and seven years of famne. At the destruction of Jericho seven priests bore seven trumpets sever days, and on the seventh day they walked round the city seven times, after which the walls fell. In the apocalypse almost To keep piano keys clean and prevent everything is seven, except the number of rub the keys. The alcohol can do no sort the beasts. There are seven churches, seven golden candlesticks, seven lamps be-fore seven spirits, the book with seven of damage to the ivory, and if it is frequently applied the keys will stand in want of no other treatment; but, if they seals, the lamb with seven horns and seven eyes, seven angels with seven seals, have already begun to turn yellow, then try rubbing them with a piece of cotton seven kings, seven thunders, seven thousand slain, the dragon with seven heads flannel wet in cologne water. Even old and seven crowns, seven angels bring

seven plagues, and there are seven vials of wrath In merely secular matters seven occurs frequently enough. We have seven won-ders of the world, seven champions of Christendom, seven sleepers, seven wise men, seven planets, seven deadly sins, seven ages of man, and our ordinary

of seven years. But however mystically significant three and seven may be, they cannot lay claim to any such peculiarities as are the of the figure nine. That the ancients had nine muses, nine rivers in the infernal regions, a hydra with nine heads and nine gods for Lars Porsena to swear One tenspoonful of the oxalic acid and water to make a saturated solution are the only needfuls. Dip a finger in the by, or that in modern times a cat has nine lives, that it takes nine tailors to make a man, or that possession is nine points of the law, are facts that pale into insignificance after one has once sat down with pencil and paper to investigate some of the special peculiarities of the figure nine. For instance, if you mulfrom paper is to mix a teaspoonful of chloride of lime with water just suffi-cient to cover it. Apply this with a soft tiply nine by any other number you will find that the figures composing the product when added together will always amount to nine. Thus:

 $9 \times 2 = 18$ and 1 + 8 = 9, $9 \times 3 = 27$ and 2 + 7 = 9, $9 \times 4 = 36$ and 3 + 6 = 9,

and so on to any extent. On arriving at 11 times 9 we find what appears to be an exception, for the digits of 99 equal 18. composing it add up to 9. Another pe-culiarity of this figure is discovered by a bit of cloth dampened in the oxalic acid and water solution. If by any mis-chance a large and obnoxious grease spot taking any number of two figures of which the first figure is of greater value should fall upon a page or some pages of a book, it may be removed. Put a piece than the second, reversing these figures of which the first figure is larger than the second is 21. Reverse the figures, hot, then apply it to the still warm and and we get 12. Subtract 12 from 21, and the remainder is 9. The largest similar number is 98. Reverse these, and we get greasy leaf of the book, spreading it on both sides with a clean brush. More clean blotting paper and a warm iron will 89. Subtract 89 from 98, and again the remainder is found to be 9.

Or let us take a case in which 9 combines with the mystic 7. The number 65 is not divisible by 9. But if we add 7 to it. either in front, when it makes 705, or in the middle, when it makes 675, or at the end, when it makes 657, we shall find that every one of these numbers is divis-ible by 9. It is not every number which can thus be dealt with, and the reader may find an evening's entertainment in "It is claimed by certain theorists that people who are placed under the influence of an anæsthetic for surgical operations trying to puzzle out the reason why. An example of a higher number may be given by way of a little assistance: 896,573 is not divisible by 9, but if the mystic 7 be added to it, either in front, where it raises the amount by 7,000,000, or in any other position, each one of the eight various amounts which may thus be ob tained becomes divisible by 9.

ghastly idea, and I am glad to say that the real evidence is all the other way, but it is a pretty well established fact that certain anæsthetics—ether, for instance, The fact can be verified by any child who has mastered the first four rules of arithmetic, but the explanation of it is another matter. To Senior Wranglers or and nitrous oxide gas-will sometimes prevent suffering without destroying conciousness of pain.
"That sounds like a paradox and is even to Junior Optimes there may be nothing very mysterious about all this. somewhat difficult to explain without be-coming more paradoxical still. The ef-And it may be that if any of us would only put himself through a course of the higher algebra, digest the integral calculus and master a few amusing treatises on the theory of differences all that now pleasant. While apparently insensible, the patient is fully conscious of everything that is going on, and the nerves reseems so perplexing in the matter would become as plain as the multiplication ta spond as readily as ever, but instead of producing physical discomfort the effect ble.-London Globe.

Order! Order! The dignity of the house of commons consists in inventing all sorts of childish excuses for shouting "Order!" After a few years of it the average member seems to become a sort of automatic machine wound up to shout "Order!" The house would shout "Order!" if the place were struck with lightning, just as mechanically as it shouts "Order!" if a member puts an awkward question to a cabinet minister. - London Echo.

'I felt all the pain,' he said, 'but some-how it didn't hurt me.' 'Then it wasn't pain,' said I, endeavoring to draw him out. 'Oh, yes it was,' he replied earnest-ly, 'but I liked it; I didn't want you to stop.' He repeated a number of things A Cleveland inventor has patented a wrench which he claims will tighten or loosen the covers of Mason fruit that had been said during the operation jars in a perfect and easy manner and it was evident that he had been and without bruising the operator's nscious all the while-at least conscious

ands or upsetting her good nature. It is claimed that the wrench will stuck, and that without prying under the rubbers.

POULTRY EXHIBITIONS.

What They Teach and How They Advance the Industry.

The purpose of poultry exhibitions is to educate those interested in blooded fowls, and apart from educating their chief concern is to let the people who are interested know where and of whom they may find excellent stock. The exhibition is an open advertise-ment, and every lover of standard bred fowls should aid in making it a success. The poultry exhibition awakens enthusiasm. Not taste nor skill nor knowledge can be a substitute for enthusiasm, earnestness and zeal. The earnest men and women are so few in the world that their very earnestness is a badge of their nobility. The zealous and earnest work of our leading fanciers has made the breeding of fancy or standard bred fowls a noble vocation and one of the leading industries, if not the leading industry, of the

United States. It is not easy to produce an ideal specimen, and a true fancier feels keenly the loss of his best birds, yet there are many ignorant or inexperienced people who seem to think we should be willing to part with such specimens for almost a song to give them something to win with in a big show. Such birds cannot be purchased at a price within the limited figure of a good breeding bird if the fancier knows his business and the bird has blood back of him that will reproduce Itself. I am just beginning to realize how much I have lost by helping customers to win who did not understand

the value of a blooded bird. The zeal, earnestness and enthusiasm But it will be observed that 18 is a multiple of 9 and, moreover, that the figures the most use of the blood obtained, while a premium won in a big show may induce another to understand the value of one, but I find it is often the case that the premiums offered at our and then subtracting the number thus obof blotting paper under the spot and another piece of blotting paper over it and ever figures we may take, the result will For some fanciers the charm lies in always be 9 or some multiple of 9. The smallest possible number of two figures of money there is in the premium won. The true fancier finds poetry and song in the measure that brings his special and favorite to a point reaching near to perfection and near to his own ideal. The honor of having attained nearly perfection by his own handiwork is the premium he is seeking, and he wants the world to know it, because he believes the world will be better by knowing it. The exhibits of pure breeds in their most typical form can but win the hearts of the visitors, many of whom will become fanciers if for no other reason than the pleasure of hav-

ing them in their own homes. There are many who are timid in regard to putting birds on exhibition lest their entries should be found not what is desirable in all respects. To such let us kindly suggest the possibility of your birds being better than you may think. Again, they may be more defective than you are aware, and how are you to find out their qualities unless you show them in good company? Bring your birds and ascertain their comparative worth. It is well to remember there is always somebody who has just as fine as yours and maybe better. None of us have the "best." There should be no jealousy in these matters -rather a spirit of emulation to rival the best and still do better should prevail. Our shows should be for the encouragement and protection of the standard bred, the bird that is to supplant the mongrels, even by those who do not care to become fanciers and Doors, Sash, Shutters, Verandas, showmen, but by common poulterers. So in order "to be up to date" it is essential that every one who is breeding feathers attends some exhibition. Take the children and let them see what study and care will produce in the feathered realms .- Mrs. Ella Thomas in Reliable Poultry Journal.

How to Make Friendellas. One pound beef chopped fine, a half pound yeal, a half pound pork, three eggs, a tablespoonful butter, a teaspoonful salt, a little pepper, grated rind of ene-quarter lemon, a pinch of nutmeg, two tablespoonfuls water, two ounces of crackers, rolled fine. Mix all together, form into a ball, covering it with cracker crumbs, and roast in a tablespoonful of butter for 45 minutes.

How to Cure White Pimples. Scrub the face every night with hot water and white castile soap, using a fine face brush. Avoid all greasy of rich foods, rare desserts and pastry. remove covers no matter how tightly After meals take one teaspoonful of mixture of rhubarb and soda. After small kettle. When hot, stir in a and damaging the covers and spoiling each scrubbing dry the face with a soft damask towel and rub the skin briskly with the hand.

It is a notorious fact that the average government clerk is the most improvi dent person found in any class of employment. In proportion to the amount of pay he receives he has more debts that he is unable to meet than the man who gets 35 per cent less money.

One Too Many

In Washington one day Henry Watter son of Kentucky sat in a retired corne in Chamberlin's, drinking high balls, so they say, when Senator Thurston walker over to his table. "What is the matter

Nine ounces of sugar is the extra allowed in the British army; Russian soldiers get two gallons of beer; German, seven ounces of butter, and Spanish, three pounds of salt fish. Watterson?" he inquired. "You look down in the mouth." "I was thinking," said the great editor, "of the decay of oratory in this country Years ago we had many notable orators-Clay, Calhoun, Webster and others—but today you can count them on the fingers of one hand. Why, Thurston, I know of

but three men in all the United State who are entitled to be called orators." "Who are they?" inquired Thurston "Yourself, myself and George R. Peck. The senator from Nebraska smiled an remarked, "What in thunder is the use of dragging George R. Peck in? He is not here."-Argonaut.

A NOVEL IDEA.

MRS HELEN ROOF, of Lima, Ohio, writes that she has supplied herself and three daughters with shirt waists and earned a beautifully decorated, 100 piece dinner-set, frame, and, behold, the ugly window also a 24 piece silver-service, in three months, by simply getting a few is hidden by a glass curtain for the like of which you can give hundreds of dollars. Of course the bought one won't be homemade, and it may be made of glass that is more choice, though for that matter one can get though for that matter one can get lovely presents is that Diamond Digest Class as the as one chooses to pay for TABLETS are warranted to cure any case of Dyspepsia and restore the bowels and liver to perfectly natural action in two-weeks or the money is refunded. The tablets do exactly what is claimed for them, and a few persons once started will use enough to secure you several lovely pre-miums in a very short time. If you would like a beautiful shirt waist, very latest like a beautiful shirt waist, very latest style, color and material, just send your name and address to the Diamond Drug Co., 84 West Broadway, N. Y., requesting them to send you eight boxes of tablets to be sold at 25c. a box, and get your father, mother, brothers, uncles, cousins or your oners, so when they have caught them they let them go again. It is rather lucky for the captured men that they are not soldiers of two or three centuries ago, when a different, but effective, plan to the same end might have been pursued—one precluding the chance of catching the avery short time and absolutely without captures no money in adverse with the understanding that they pay you if found good. This they will do and want more every time. Collect the \$2 and send it in and receive your present. You can then get the 24 piece silver-service and 100 piece dinner-set in a very short time and absolutely without captures no money in adverse with the understanding that they pay you if found good. This they will do and want more every time. Collect the \$2 and send it in and receive your present. You can then get the 24 piece silver-service and 100 piece dinner-set in a very short time and absolutely without cost. This firm requires no money in advance and will mail tablets with premium offers merely upon request.
