- ----CROSS BREEDING.

An Iowa Farmer Tells Some Interesting Experiences. The question is often asked, "Does cross breeding weaken or strengthen our stock?" Some think that the cross breeding of swine is one cause of swine diseases, such as cholera, thumps, etc., writes John H. Curl of Iowa in The Prairie Farmer. Others think that cross breeding has a tendency to destroy the size of the offspring. I am not as old as some who give their experience on such subjects, neither have stipation. I made farming my business from boybood, but from my personal experience and knowledge I find in many cases mat cross breeding strengthens not only in regard to health, but in general endurance. The mule is by far the superior of the horse when it comes to hardiness, strength and stamina. I have never owned a bunch of pure bred hogs of any of the many breeds, and yet I have owned and cared for hogs for 40 years, and I have never had a case of hog cholera and frequently had a herd of 75 or 100 on the place while cholera was raging all around. I do not mean, however, to advance cross

breeding as a preventive of swine

I attribute my escape to the fact that I allow nature to take its course in regard to the wishes of my hogs. They like freedom, and I give it; they like to root, and I have usually allowed it, but to the detriment of my pasture. Above all, through the hot weather they like the wallow and shade. This is a point upon which I lay great stress. Give the hog plenty of clear water to drink, plenty of blue grass or clover pasture and a good wallow and do not give any sour swill, and there will be less com-

plaint in regard to cholera. In regard to crossing to improve the size of the hog, many breeders of pure breeds may differ with me when I make the assertion that many are finding that a pure bred Chester White boar crossed with a Poland-China or some other good breed of sow makes larger hogs than when bred to one of its own breed, but such is the case. Last January I turned a pure bred Chester boar in with three Duroc Jerseys, three grade Polands and one black Essex. They were all about alike in size and bone. The Essex showed the best pigs from the start up to the present time. The next best are those of the Poland. I could not be induced to cross with the Duroc again, as the size is not there. I am not mapping out a line of breeding for any one to follow, but only giving my experience,

The popular idea expressed in the phrase, "the art of self-defense," shows the opinion that the chief enemies a man has to defend himself from are visible and external. But the real danger of

every man is from minute and often in-visible foes. In the air we breathe and the water we drink are countless minute nisms leagued against the health of organisms the body. The one defense against these enemies

is to keep the blood pure. Dr. Pierce's Golden Medical Discovery thoroughly purifies the blood, removing poisonous substances and accretions. When the purnes the blood, removing poisonous substances and accretions. When the blood is pure there is no harborage for the germs of disease which find a lodg-ing only when the blood is impure and corrupt.

sider your 'Golden Medical Discovery' corrupt. "I consider your 'Golden Medical Discovery' one of the best medicines on the face of the earth," writes Mr. Wm. Floeter, of Redoak, Montgomery Co., Iowa. "While in the south-west, three years ago, I got poisoned with poi-son ivy. The poison settled in my blood and the horrors I suffered cannot be told in words. I thought I would go crazy. I tried different kinds of medicine, tried different doctors, but all the relief they could give me was to make my pocket-book lighter. I then began taking Dr. Pierce's Golden Medical Discovery. Took four bottles without relief. Kept taking it. I took in all ten bottles and got entirely cured." Dr. Pierce's Pleasant Pellets cure con-Dr. Pierce's Pleasant Pellets cure con-
