There are at least 20 lost gold mines in various parts of the world. Many of them have yielded rich ores and then have been deserted and entirely

Transvaal, for instance, that was discovered by accident in the eighties by two Englishmen. The finders had enthought, securely tethered their horses when they suddenly heard a loud neigh later saw them both racing away apparently in the greatest terror.

Soon after dawn they were up and after an hour's tramp found one of the poor beasts lying on the ground with a broken leg. In its struggles it had kicked up the ground and had exposed rich gold quartz only a few inches below the surface.

returned to the district a month later to start work on the mine. But in spite of all their efforts they could not find the place, and to this day the mine has not been rediscovered.

In the late seventies there was tremendous excitement in California when a prospector described a gold mine he had found. A party soon prepared to set out, with the discoverer of the mine as guide, but the mine has never been discovered, though thousands of dollars have been spent in prospecting for it.—Stray Stories.

Time to Leave.
The late D'Oyly Carte always safeone who had not an appointment or stated his or her business on a printed form supplied at his office. Alfred Cellier used to tell a delightful story in this respect. He had a manservant, a Swiss Italian, and one day, having been invited to dine with Mr. and Mrs. Carte on Adelphia terrace and forgotten the time, he sent down his hench-This was about 10 in the morning. The day went on, and no emissary appeared till past 5 in the evening, when the henchman crept wearily in. "Where have you been, you rascal?"

asked Cellier indignantly. "Ah, sare," replied the poor fellow, "I go Mistare Carte. I go in room. A gentleman 'e come and say, 'Vhat name?' I tell him and say, 'I vant see Mistare Carte.' He say, 'All in good time; vait for your name; sit down.' I sit down. Lots gentlemen and ladies. I vait, I vait, I vait. I get ongri and doorsti, but still I vait, I vait, I vait. Den at last I 'ear my name. I go in leetel room. Gentleman 'e say, 'Vat voce?' I say, 'I not know.' 'E say, 'Den vhat come here for?' I say, 'I vant know vhat time Mistare Carte

'ave dinner?' Den 'e svare, and I come

"Henry IX." It is interesting to recall that, just as Edward VII of England chose his second baptismal name as the one by which he wished to be designated when he mounted the throne, so likewise his great-uncle, William Henry, would have preferred to be known as Henry IX. One of the reasons for this prize. preference was the desire to establish lawful right to a title which had already been arrogated by the cardinal of York, the last of the Stuart pretenders. When the question, however, came up for discussion in the privy council, the latter decided in favor of King William IV. This story was told by the king himself to Miss Helen Lloyd, the governess of his children. He added that the privy council was moved to this choice partly by fear of exciting the superstitious fears of the populace, who still bore in their memory a prophecy dating from the seventeenth century, which runs as follows:

Henry the Eighth pulled down monks and their Henry the Ninth shall pull down bishops and

Roads of Mississippi.

Dr. J. A. Rowan, a prominent physician, has the following to say about the roads of the state:

"From my experience as a country physician in traveling over the roads I am convinced that the present system of working roads in Mississippi is a farce. The inexperience and apathy on the part of overseers and the indifference on the part of hands should convince any ordinarily intelligent person that new methods will have to be adopted. The contract system, with improved implements, is the remedy. In my opinion broad tired wagons would do much toward keeping roads in good repair, and our legislature the money to build a sanitarium.

should enact a law requiring the narrow tire to be replaced by the broad after three or four years or one allowing parties using them a credit on their road tax. I often go double the distance over our best roads rather than go half as far over the average, saving time and comfort thereby. The people will have to be educated along the line of better roads, and new methods will

have to be forced upon them."

NEW IDEA IN IRRIGATION

Successful Scheme of a Texas

Runs the Water Around, but Not on, His Plants-F. F. Collins of San Antonio Has Rented His Property In Plots to Thrifty Belgians, Who son 12 months old, for when Raise Remarkable Crops.

HE USES TWO ARTESIAN WELLS.

F. F. Collins, a prominent manufacturer at San Antonio, Tex. is trying an experiment with irrigation which promses to make the country around San Antonio a paradise for truck gardeners and farmers, says the St. Louis Post-Dispatch. Mr. Collins' project can hardly be called an experiment now, since its success has been demonstrated. The only difficulty in the way of ny one else doing the same that he has done is the uncertainty of finding water by boring. With an artesian well Mr. Collins' performances can be du-

plicated by any one. He has a ranch about five miles from San Antonio upon which he bored two wells, striking a good flow of water at a depth of 800 feet. He divided 160 acres into tracts of 121/2 acres each and rented them, the tenants being chiefly Belgians, who understand thoroughly the best methods of using water in the growing of vegetables and farm prod-

Irrigation has been conducted here since there was a settlement, the early Spaniards, Mexicans and Indians using it with a degree of success that provided for all their wants. In modern times the old Mexican ditches have been used south of the city by Germans and Ital-

ians with success. But their methods produced no such results that have followed Mr. Collins' experiment. He discovered the secret of "intensive cultivation" with this soil when he found that the best results could be attained if the water was never allowed to touch the plant and if as little water as possible was allowed to stand on the surface. His tenants each have a connection with the main ditch, which is supplied by the artesian wells They cultivate their plants, corn, okra, melons, cotton, beans-in fact, everything that will grow in this country in rows well banked up, with deep furrows between.

Each tract is given water for 55 minutes once in six days. The water is run into alternate rows for that time. It has been ascertained that all the water that will run in 55 minutes will be immediately absorbed, and none will stand on the surface. The water running into alternate furrows percolates through the dry furrow, wetting the soil around the roots thoroughly.

At a meeting of the Business Men's club Mr. Collins showed samples of the products of his farm-luscious cantaloupes, beans, peas and okra. He has cotton 12 inches high that shows from 12 to 16 squares to the plant. Corn grows luxuriantly. His tenants told the Business Men's club that the yield was worth from \$100 to \$500 per acre annually. They expect to gather four crops every year from it.

The report of this enterprise, just made public, has opened the eyes of the people of San Antonio, and already others are arranging to follow Mr. Collins' example. His profit is not a small one, as he is paid \$20 an acre rental for all the land, his only expense being the original cost of the two wells, about \$3,000. Much of the land now used for this purpose could have been leased three years ago for 50 cents an acre and could have been bought outright for

from \$2 to \$5 an acre. about finding water, it has been struck in many different localities at a depth danger in this direction is not that water will not be found, but that it will be impregnated with minerals, making it unfit for use in irrigation.

TEMPERING COPPER.

Young Elmer McCroy Said to Have An accidental discovery of Elmer McCroy promises to revolutionize tool manufacture throughout the world,

says a Binghamton (N. Y.) dispatch to the New York Sun. For years scientists and others have been endeavoring anxiety. And there was Poker Jim to discover a process for tempering copper. Recently Elmer McCroy, a 17year-old lad of Ballstead, while at work near Binghamton, made the discovery. How it was done or what the process is will not be told until such steps gang, rushed up so overcome with emohave been taken as will insure to Mc-

Croy the benefits of his discovery. Friends of McCroy say that the government has a standing offer of \$6,000 for the man who will furnish it with a successful formula for hardening cop- tune. Nasty Jack's cry of gold meant

A Large Dredge Building. At the Polsom shipyards, Toronto, is building the largest dredge in America the government dredge, J. Israel Tarte. She will be launched in August and will be used on the lower St. Lawrence, says a Montreal dispatch to the New York Tribune. The Tarte is 160 feet long and 42 feet beam and draws 12 feet 6 inches of water. She has a well in the center, through which her suction pipe is handled. The pipe can be dropped 70 feet if necessary and is hauled up into the well when the dredge is moved. The dredge is equipped with triple expansion engines of 1,100 horsepower to operate the pipe and is capable of discharging 2,000 cubic yards of earth in an hour. The pipe is operated with a centrifugal pump 15 feet in diameter. The engines are supplied with steam by four locomotive boilers 6 feet in diameter and

police station. When the American consul was informed of the trouble, he sent Mr. Bowen to look after the prisoner, and no sooner had that gentleman heard the story than he advised our friend to close the case at once by paying his bill as charged and giving the waiter a handsome tip to soothe his injured feelings. Some diplomacy was required sian dress materials. The commander of complaint, but in the end everything was settled for about \$50. The deputy consul general said privately as he and the victim of French persecution left the station: "You got off light. In Paris never strike a Frenchman. As for that peach, you were absolutely wrong. Why didn't you call for a messenger and send the basket to your hotel?" basket to my hotel? Why, man, at \$3 a peach it would have cost me \$25 or \$30." "No, no. You don't understand. When you took the peach, you spoiled the decoration of the table, therefore the basket and its contents were your property for the \$3." "Why in thunder didn't the scoundrel say so?" "It is hardly to their interest to educate for-

> Influenza It is very well known that the influenza is not an exclusively modern complaint, but I am not sure whether a curious reference to it by Bower, the continuator of Fordun's chronicle, has been noted. Writing of the year 1420 he says that among those who died in Scotland that year were Sir Henry St. Clair, earl of Orkney; Sir James Douglas of Dalkeith, Sir William de Abernethy, Sir William de St. Clair, Sir William Cockburn and many others, all by "that infirmity whereby not only great men, but innumerable quantity of the commonalty, perished, which was vulgarly termed le Quhew [le Quhew a vurgaribus dicebatur]" (Bower, xv, Now, "quh" in Scottish texts usu-32.) Now, "quh" in Scottish texts usually represents the sound of "wh" (properly aspirated.) Therefore it seems that in the fifteenth century the influenza was known as "the whew," just as it is known in the twentieth

century as "the flue." I have refrained from quoting at length Bower's explanation of the cause of the epidemic, but there seems mine was flooded. It took three weeks crowned heads. The services of his

A very small girl raised her hand. "What is it, Martha?" asked the superintendent. "Why, Mr. Brooks, how much are those little red parasols in your window?" said Martha.

Mary was a very conscientious child One day she was allowed to go and spend the day with some little cousins about her own age. After taking off her wraps she went to her aunt and said very soberly, "Now, Aunt Cassie, if Sallie and Lizzie are bad today please don't hesitate to punish them because I am here."-Current Literature.

Whoever observes these interesting insects finds it easy enough to foretell exactly the kind of weather to be expected. At least this is the opinion of

many raisers of bees. Generally the bee stays at home when rain is in the air. When the sky is simply dark and cloudy, these busy workers do not leave their dwelling all at once. A few go out first, as though the queen had sent out messengers to study the state of the atmosphere. The greater number remain on observation until the clouds begin to dissipate, and it is only then that the battalions entire rush out in search of their nectar. A bee never goes out in a fog, because it is well aware that dampness and cold are two fearsome, redoubtable enemies. We do not mean, however, that the bee is a meteorologist in the absolute sense of the word. Its cleverness consists in never being taken unawares, for it possesses untiring vigilance. Often one may observe the sudden entrance of bees into the hive when a dense cloud hides the sun and even though the rain is not in evidence. -St. Louis Globe-Democrat.

Bismarck's Philosophy of Life. spurs and let life, like a wild horse, take you flying over hedge and ditch fearless, inasmuch as you must so time part from all that is dear to yo is near, well, let him come on, but until he arrives do not merely look bright and blessed, but be it, too, and whe sorrow comes you bear it with dignity -that is to say, with submission an hope.-Love Letters of Prince Bis

nd make more money than can be made in any other line of investment. The gold ore is in bese seven developed mines. There are 3,000 feet of ore in a vein, and these veins are true in 10 feet veins, held within walls of granite, placed there by nature. The Company has already eveloped this property to demonstrate that it is one of the largest gold properties of the ripple Creek District which is the greatest gold-producing camp on earth, its output last ear aggregating \$24,000,000 or nearly double the amount produced in the whole State of Cali-

At 50 cents per share the Company is giving you a discount of 10 cents per Share to start ath, making 20 cents on the dollar. As already stated, this is done for the purpose of raising \$25,000 to purchase improved machinery, air-compressor drills, and electric plant. We ave two large hoisting engines on this property, a commodious shaft-house, office buildings, oarding house for the men, stables, a powder-house, a large quantity of tools, etc. The reorts on these mines, made by one of the best mining engineers in the State, succinctly deribe these improvements.

NAMES OF MINES

NAMES OF MINES. AZTEC, 210 feet in depth, with shaft-house, boiler and engine for hoisting, well timbered at

AZTEC, 200 feet in depth, with shall-holder, once and boiler, large iron shaft-house.

BONDHOLDER, 260 feet deep, hoisting engine and boiler, large iron shaft-house.

MEXICO and MAN MATTAN, both over 160 feet deep, on same win as the Aztec mine.

CRYSTAL, JASPER and GREAT EASTERN, on the same vein as the Bondholder and open
ed in depth to over 160 feet, and developments already made show over4,000 feet of ore.

If you want to make money out of nature, become a producer of gold out of her treasur
vaults. The Arena group of mines will do it for you.

We can furnish the best of references—bank and mining engineers—and our title in the
property is perfect, coming, as it does through a patent from the Government. With more im
proved machinery, from \$5,000 to \$5,000 per day will be a conservative estimate of the output
