Submarine Telephony. Advices from France state that an engineer in that country of the name of Maiche claims to have solved the problem of telephoning by submarine cables to great distances. He has been carrying on some exhaustive experiments on the point, and it is stated that at Calais recently M. Maiche succeeded in transmitting a telephonic message with perfect distinctness through a cable 400 miles long.

A Boon to Automobilists.

A Parisian scientist has patented an automatic generator of electricity for supplying current to the automobile as it runs. It is claimed that a few tea-spoonfuls of water only are required for generating the necessary motive power and that the French government is so favorably impressed with its operation that it is considering the advisability of its use on naval vessels.

OCTOBER DAYS

... AT THE ...

PAN=AMERICAN

T Chicago October was the ndance at the World's There is every reasult will come to the Pan-American Exposition at Buffalo, where October is always a month of delightful weather. The Exposition in point of beauty and die interest is at its climax, and the programme of special events is such as to attract and please. September started with great crowds, and only the tragedy in the Temple of Music, which stunned and shocked a world, halted an overwhelming success in that month. The Exposition management as a tribute of respect closed the gates for one day, Thursday, when the state funeral of the third martyred president took poured to Buffalo. The Temple of kirl Music, now hallowed and historic w ground, has been the Mecca of thou-

sands. Buffalo has demonstrated her ability to care for great crowds satisfactorily, not only in hauling them to the Exposition by street car and steam railway at a fare of but 5 cents from any part of the city, but to house and feed them at prices in the reach of all. The stories freworks. of exorbitant prices were long ago New shown to be fables, and every visitor who makes the slightest effort to get accommodation can do so wholly with-

The Exposition itself, with its beautiful buildings, its coloring by day, its magic lighting at night, its walks and courts, its canals and lakes, its fountains and statuary, its exhibits and its amusements, has been a delight to the 5.000,000 visitors who have already

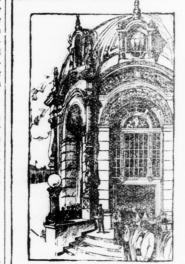

been to the Pan-American. The Exposition Company opened up the month of October, beginning Monday, Sept. 30. with a Carnival week of splendid events, including a baby coach parade, with 3,000 school children singing in the procession, a mon results being obtained when the skin ster pageant with the floats used in the New Orleans Mardi Gras and allegorical parade and the feature of the beautiful floral parade at Saratoga. It is well known that the higher the temperature of the source the more Saturday, Oct. 3 and 5, but every day economical is the resultant light. Electricity From Coal.

A solution to the problem of how to obtain electricity from coal has, it is reported, been offered by Hugo Jones, a Chicago chemist. He has procured a patent on a battery which he declares will revolutionize modern methods of procuring power, and which will make futile Edison's labors for the last few years in trying to solve the problem. The cumm is made for Mr. Jones hattery that it will yield 35 per cent of the energy that is stored up in coal, or four times as much as the present combination of boiler, steam engine and making osmium exactly suitable for work of the heroic men who guard the

bination of boiler, steam engine and buildings every visitor can spend a Eve day. No exposition has ever provided the air will do. Don't be in a hurry to

NEW SHORT STORIES

Lorillard's Bluff Was Called. lard once met his match when he ran up against gray bearded James E. Kelly, who introduced bookmaking into country, relates the New York Times. It was nearly a generation ago and at Jerome park. Kelly was laying 2½ to 1 against one of Lorillard's horses in a big stake event. The news went to Mr. Lorillard, seated on his

coach on the clubhouse lawn. "I'll just take a little of the conceit out of that sawed off individual," said Lorillard to Wright Sanford, Newbold Morris, John Hunter and a few other congenial spirits. They started for the ring together.

"I'll lay \$10,000 on my horse at that price, Kelly," said Mr. Lorillard in his princely fashion, expecting to see Kelly wilt and refuse to take the wager. "Certainly, Mr. Lorillard." Then turning to his sheet writer Kelly said, "Twenty-five thousand dollars against \$10,000, Pierre Lorillard." Quickly he turned to the tobacco magnate, with a

"I CLAPPED LOUDER THAN EVER." got up an interesting subject there was a tremendous clapping of hands. I had hardly ever heard such applause be fore. I straightened up and set to clapping with the rest, and I noticed good many people round me fixing their attention on me, and some or them laughed in a friendly and encou aging way. I moved about in my chair and clapped louder than ever. "'Who is it?' I asked the gentleman

on my right. 'Samuel Clemens, better known in England as Mark Twain,' he replied. "I stopped clapping. The life seemed to go out of me. I never was in such a fix in all my days."

Pipe Smoking. There are many pipe smokers who do not know how to get the best there is out of their indulgence. The great point in pipe smoking is to smoke slowly. Nervous smokers smoke too rapidly and burn their tongues with hot smoke besides failing entirely to get the fullest and best flavor out of the tobacco. It is all a matter of habit, but slow smoking is a habit which it is hard for some people to acquire. In some cases pipe smokers have tried for years to check their smoking speed without success. They began too late, and the nabit of rapid smoking is shaken off with difficulty when it is once acquired. Rapid smoking is as bad as rapid Whether it is cigar, pipe or cigarette, the smoking should be deliberate in order to get the fullest enjoyment. It is especially so with a pipe.—New York

REVENGE OF THE WIND.

The winds refused to blow;
"No use," said they, "to try
From north or south or east or west
These folks to satisfy.
The north wind is 'too cold!'
The west wind 'bold and rough!'
The south 'not cool enough!'
The south 'not cool enough!'

And so the windmills stopped,

And so the windmills stopped,
And ships lay idly by;
The sun beat down from morn till night
Because no clouds could fly.
The people sighed for wind.
"Blow hot or cold," said they,
"From north or south or east or west;
'Twill be the wisest way!"

FOR LITTLE FOLKS.

A Peculiar Spider, Far up in the mountains of Ceylon.

there is a spider that spins a web like bright yellowish silk, the central net of which is 5 feet in diameter, while the supporting lines, or guys, as they are called, measure sometimes 10 or 12 feet, and, riding quickly in the early morning, you may dash right into it, the stout threads twining round your face like a lace veil, while, as the creature who has woven it takes up his position in the middle, he generally catches you right in the nose, and though he seldom bites or stings the contact of his large body and long legs is anything but pleasant. If you for-get yourself and try to catch him, bite he will, and though not venomous his jaws are as powerful as a bird's beak and you are not likely to forget the

his first great London banquet, at handsomely decorated, being bright gold or scarlet underneath, while the admits that, not having been used to upper part is covered with the most delicate slate colored fur. So strong are the webs that birds the size of larks body read out a list of the chief guests are frequently caught therein, and even the small but powerful scaly lizard falls a victim. A writer says that he has often sat and watched the yellow monster-measuring, when waiting for his prey, with his legs stretched, fully six inches-striding across the middle of the net and noted the rapid manner in which he winds his stout threads

round the unfortunate captive. He usually throws the coils about the head until the wretched victim is first blinded and then chocked. In many unfrequented dark nooks of the jungle you come across most perfect skeletons of small birds caught in these terrible

SEVEN DEVELOPED GOLD MINES.

60 ACRES OF GOLD ORE. \$\$\$\$\$\$**\$\$\$\$\$\$\$\$\$\$\$\$**\$\$\$\$\$\$

-THE ARENA-

Gold Mining & Milling Company CRIPPLE CREEK, COLORADO.

********* This Property is Estimated to be now Worth More than

\$10,000 per Acre and will be Worth over One Hundred Thousand Dollars per Acre, with Proper Development ****

CAPITAL STOCK, \$1,000,000. Divided into Shares of \$1.00 Each, Full Paid and Non-Assessable.

****** The Arena Company offers 50,000 Shares at 50 cents each in a Property that is Worth over \$600,000.

For the purpose of raising money to purchase the necessary machinery to make the mines produce daily fully Three Thousand Dollars in Gold, thus enriching every individual shareholder according to the shares he holds.

You can buy any number of Shares you Wish, and make more money than can be made in any other line of investment. The gold ore is in these seven developed mines. There are 3,000 feet of ore in a vein, and these veins are true mother veins, held within walls of granite, placed there by nature. The Company has already developed this property to demonstrate that it is one of the largest gold properties of the Cripple Creek District which is the greatest gold-producing camp on early, its output las year aggregating \$24,000,000 or nearly double the amount produced in the whole State of Cali

At 50 cents per share the Company is giving you a discount of 10 cents per Share to start with, making 20 cents on the dollar. As already stated, this is done for the purpose of raising \$25,000 to purchase improved machinery, air-compressor drills, and electric plant. We nave two large hoisting engines on this property, a commodious shaft-house, office buildings, boarding house for the men, stables, a powder-house, a large quantity of tools, etc. The reports on these mines, made by one of the best mining engineers in the State, succinctly describe these improvements.

NAMES OF MINES

AZTEC, 210 feet in depth, with shaft-house, boiler and engine for hoisting, well timbered all

AZTEC, 210 feet in depth, with shalt-house, other and engine for housing, were timbered and the way down.

BONDHOLDER, 260 feet deep, hoisting engine and boiler, large iron shaft-house.

MEXICO and MANHATTAN, both over 100 feet deep, on some vein as the Aztec mine.

CRYSTAL, JASPER and GREAT EASTERN, on the same vein as the Bondholder and opened in depth to over 100 feet, and developments altrady made show over 4,600 feet of ore.

If you want to make money out of nature, become a producer of gold out of her treasure raults. The Arena group of mines will do it for you.

We can furnish the best of references—bank and mining engineers—and our title in the property is perfect, coming, as it does through a patent from the Government. With more improved machinery, from \$3,000 to \$5,000 per day will be a conservative estimate of the output of these mines.

Remember that only 50,000 Shares of this Stock are for sale at 50 cents on the dorders or the number of shares desired, accompanied by Draft, Money Orders, Expressash in Registered Letters, can be sent to The Arena Gold Mining & Milling Company 501 Equitable Building, DENVER, COLORADO.
