"When I commenced taking your medicines, ghteen months ago, my health was completely oken down," writes Mrs. Cora I. Sunderland, 'Chaneyville, Calvert Co., Md. "At times I uild not even walk across the room without time in my chest. The doctor who attended me id I had lung trouble, and that I would never be dil again. At last I concluded to try Doctor erce's medicines. I bought a bottle of 'Gold-I Medical Discovery,' took it, and soon comenced to feel a little better, then you directed e to take both the 'Golden Medical Discovery' and the 'Favorite Prescription,' which I i. Altogether I have taken eighteen bottles 'Golden Medical Discovery,' twelve of the avorite Prescription,' and five vials of 'Pelsy.' I sam now almost entirely well, and do all p work without any pain whatever, and can me with more case than I could formerly walk."

FOOD IN FRUIT SKINS. Nutritive Qualities In Them Believed

to Be a Brain Food. There are more nutritive qualities hidden in the skins of fruits, cereals and vegetables than the average person is aware of. In fact, the great bulk of the brain building foods are in

the skins of the fruits and vegetables we eat. If, as Savarin says, "the destiny of nations depends on their food," then the destiny, whether a healthy long life or insanity or suicide of every unit of the United States depends on how he or she is fed.

If the breed so much depends upon food, why should not every person capable of normal thought seek to procure such food as best sustains his or her normality? Brain starvation, through the lack of suitable brain and nerve nourishment in our daily food, is the sole cause of the craving for stimulants to supply, as they do, artificially and improperly what nature has provided in a natural form in the skin of the grape, which contains the best part of the wine; in the skins of all fruits and vegetables, and if not in the skins of the cereals, how comes it that stimulating properties are extract- Lime kidge...... ed from them, as the inner kernel, the starch, is devoid of anything other

It has been proved by chemical analvsis and demonstrated by microscopic experiments that the most valuable brain sustaining properties are resident in all skins of cereals, fruits and vegetables, and as an instance of the side opposite the seal.
