SIGHTS OF OLD PANAMA. City Once as Beautiful as Any De-

picted In Storied Romance. Following the English style, dinner is a full dress and ceremonious affair. After dinner comes the promenade along the esplanade, a charming walk around the old battery overlooking the prison, says the Catholic World. Our way borders the sea; behind us lies the city, with its Moorish towers, its red tiled roofs; back of it rises Mount

Ancon: to our left is the little Indian hamlet of La Boca, at the mouth of the Rio Grande, and the green hills of the Andes in the distance; along the purposes of relief. horizon oceanward stretches the bay. What words can describe it? A study in color as the rays of the setting sun turn to crimson, green and gold its islands; the stately palmetto trees that fringe its banks, the white beach and far away the ancient towers of San in which small, white worms have Anastasius, sole landmark of the once beautiful city of old Panama. The story of this beautiful city, old

Panama, reads like one of the romances from the "Arabian Nights" that so delighted our childhood. Its houses of aromatic wood, hung with costly tapestries, adorned with paintings and sculptures that a king might envy; its 800 magnificent churches, with their services of silver and gold, their frescoes of pearls and precious stones: its pleasure gardens; its broad driveways,

chief of which was the king's highway, over which the royal horses bore the treasures to Puerto Bello and the ships ready to sail with them to Spain. Into the midst of this Asiatic splendor came Morgan and his buccaneers, and this struggle, one of the most memorabie on our continent, the first of white capture of Panama. So pass the glories of the world!

SWIMMERS' CRAMP.

It Is Not So Very Dangerous if the Victim Will Keep Cool.

If swimmers could be trained to keep cool under all circumstances, there would be comparatively little drowning among bathers and summer pleas ure seekers Cramp is usually assigned as the cause when some good swimmer drowns. But cramp ought in reality to be nothing serious. Usually is affects only an arm or a leg or maybe only a hand or foot. Any moderately good swimmer can keep affoat with one arm or even without the use of that, yet good swimmers drown often as a result of cramp. If such fatalities were analyzed, they would be more properly classed as drowning from fright and loss of nerve. This comes from the fact. that every one is taught in childhood to fear the water and comes as grown man and a swimmer to fear cramp. The average opinion is that ming in deep water is as good as drowned. Therefore, when a swimmer feels a leg or arm begin to cramp he i frightened in most cases entirely out of his wits. He loses his head, begins to splash and paw and struggle and then goes down.

What the swimmer should remember is that he can keep affoat with very, very little effort if he will turn on his back and keep his chest inflated. It is the simple matter of floating, which every swimmer knows and finds very easy. If the swimmer will keep cool and float, the cramping limb will frequently relax after a little and he will find himself as well as ever.—Outing.

Pat's Trouble. Pat had come over to America with the expectation of finding money lying around loose, only waiting for some one to pick it up. Of course this was long ago. Pat had soon become disillusionized and was always glad to get hold of odd jobs which would net him a little something to help him keep body and soul together. Finally, becoming tired of the struggle, he decided to end it all and was very industriously tying a rope around his waist when his landlord happened in on him. After watching him curiously for a few minutes he asked:

"What's up, Pat? What are you try-

"Troyin' to choke meself, av coorse," was Pat's answer.
"Choke yourself? You can't do it that way. You'll have to put the rope

around your neck." "Sure an' I thried that, but I couldn't breathe."-New York Times.

On Sure Ground.

A well known artist overheard a countryman and his wife ridiculing his picture, which represented a farm scene. He was so indignant that he at last interposed with the remark: "That painting is valued at £100.

Allow me to ask if you are familiar with works of art?" "Not very familiar with art," replied the farmer, "but I know something about nature, young man. When you make a cow that gets up from the ground by putting her fore feet first,

you do something that nature never

did,"-London Answers.

PLACEBO PRESCRIPTIONS.

An Old Doctor Tells a Secret of His Profession.

"Never tell a patient that there is nothing the matter with him," said the old doctor, who was revealing the se-crets of his profession. "If you do, you make a lifelong enemy and lose your patient, who sends for another doctor. Give him something, if it is only flavored water. If the disease is only imaginary, cure the imagination with a harmless dose, and your patient gets well. In the profession we call such prescriptions 'placebos,' and more wonderful cures are effected by placebos than the world wots of. So, also, when you run across a patient who an nounces the first thing that he cannot take certain sorts of medicine, don't tell him he must. Agree with him and give him the medicine, if he needs it in a disguised form.

"There are thousands of people who labor under the conviction that they cannot take quinine and will tell you that they have never taken it in their lives, while at the same time they may be taking large doses of it. The taste of quinine is hard to disguise, but if administered in a pill the patient can be made to take it and never suspect what he has swallowed. The trouble is the patient is apt to recognize a quinine pill by its appearance, to sus pect, bite into the pill and thus discover your ruse. To obviate this difficulty druggists now have pills of quinine made in odd shapes and colors Pink pills, containing nothing but qui nine and a little harmless coloring matter, are a favorite form for use in cases where an antiquinine crank has to be medicated. In giving a placebo it is not wise to have it taste too well. The pa-tient is apt to suspect if you do. And be sure that you gravely impress upon the patient that only a teaspoonful is to be taken at a time and that at stated intervals. The whole virtue of a placebo exists in the solemnity and importance with which you surround it."-New York Press.

FLOWER AND TREE.

Salpiglossis is a pretty, showy annual, easy to raise and worthy a place

in the garden. The birch grows farther north than any other tree. Next comes the Siberian larch and then the fir.

The dark spot in the center of a bean blossom is the nearest approach to black that occurs in any flower.

Sunflowers may be transplanted quite easily if the work is done on a rainy day or in the cool of the evening. Preserve a green lawn in the center of the garden, however small. This is needed to set off the flowers and for

Mignonette is so unobtrusive that its scent merely, but a large bed of mignonette should be in every garden. Dissolve fresh lime in water, allow sediment to settle and saturate earth been noticed with the clear solution

thus made. That "it is never too late to set out roses" is a true word about gardening. But "the earlier the better, so long as the frost is out of the ground," is a maxim no less worthy of dependence.

A Spiny Monster.

For sheer ferocity of appearance, unredeemed by any milder facial attributes, a lizard called after "Moloch horrid king" Moloch horridus is pre-eminent among reptiles. The body of this Australian reptile is so covered with spines that, as it has been put, nature seems to have endeavored to ascertain how many spines could be inserted on a given area. But, unlike its tutelary deity, who seems really to have spelled himself Molech, the lizard does not deagainst white, led to the destruction of. mand the blood of children. It is, indeed, vegetarian and only flery in that it has a curious faculty of absorbing and drying up water. A specimen placed in a shallow dish was observed to attract the water like a piece of blotting paper.-Westminster Gazette.

Ancient Trades Unions.

Seven thousand years ago there were trades unions in Nineveh and Babylon, and so strict were their rules that in some cases the penalty of death was inflicted for infringing them. Each man's work was strictly defined, and even the number of hours that he was allowed to work was stated in the charter of his guild or union. Later exactly the same state of affairs existed in Pompeii, and inscriptions have been discovered stating specific ap pointments of officials to trades unions The most powerful of these appears to have been that of the Fishermen's

"Dey oughter pass a law," said Hungry Higgins, nursing his leg, "ter compel people ter call deir dogs be appropriate names." "Wot's de matter now?" inquired

Dusty Rhoads. "Why, a woman down de road said if I didn't git out o' her yard she'd call Fido. O' course I laffed. Den she called Fido, and Fido didn't do a t'ing. He was a big brindle bull!"-Chicago

A "Bird" Anyway. Mrs. Spenders-That's what I call a 'duck" of a bonnet.

Mr. Spenders-Yes? I'd call it a "pel Mrs. Spenders-A "pelican?" Mr. Spenders-Yes; on account of the

size of the bill.—Philadelphia Press.

The records left by the Phænicians Assyrians and ancient Persians show that among all those nations the use of perfumes was very common.

The cost of producing and planting young salmon is under \$1 per 1,000.

Onion Sauce.

As a change from the tomato sauc usually served with breaded lamb chops try an onion sauce made in this way: Slice two or, if very small, three onions and cook them in water for a few moments and drain. Put them into fust enough boiling water to cover. add a little salt and cook until tender. Cook together two tablespoonfuls each of flour and butter and when perfectly smooth add one-half pint of stock three or four tablespoonfuls of cream and a saltspoonful each of salt and sugar and a dash of cayenne. When the onion is tender, press it through a colander and add the water in which

O

DEAR SIR:-I think that every man that has a eam of horses or any stock, ought to nave a bottle of Moyer's White Liniment n the stable or his house. I had a horse that stepped in a hole with his front foot, coming down the mountain with a trail of props, and fell forward and strained his shoulder blade. That it swelled so fast that we could hardly get the collar off, and in two hours his neck was swollen to all the skin would hold. We used your White Liniment freely, and in a few days he was to work again, and does not show any signs of lameness. It worked like magic Respectfully Yours.

Don't Be a Second Class Man.

ng: "I am going to be a second class

and get the good jobs, the high pay.

Second class jobs are good enough for me." Such a boy would be regarded

ity. You can get to be a second class

man, however, by not trying to be a

first class one. Thousands do that all

the time, so that second class men are

a drug on the market, remarks Suc-

Second class things are only wanted

when first class can't be had. You

wear first class clothes if you can pay

class meat and first class bread, or, if

you don't, you wish you could. Second

class men are no more wanted than

any other second class commodity.

better article is scarce or is too high

priced for the occasion. For work

that really amounts to anything first

GIVE IT A PUSH

LIVONA CAMP, PA, APRIL 21, 1902.

class men are wanted.

MOVER PROS

A GOOD THING

ou can hardly imagine a boy
