COMMUNICATIONS

Al. communications sent to the AMERI-CAN for publication must be signed by the writer, and communications not so signed will be rejected.

IF Republican policy, as laid down by the late President McKinley, is to be perpetuated and carried out, it will be absolutely necessary to return a Republican majority in the House of Representatives. If any danger to this plan exists it will be from indifference, and this is what must be guarded against. It is the duty of every Republican to see to it that his neighbors are properly said: aroused to the importance of voting for a Republican Congressman.

THE great trouble with the Democratic party is that it has been seeking issues instead of permitting issues to seek it. Several issues have been tried in the hope of attaining power, but all have been abandoned and now the "great unwashed" is tossing about upon a stormy political sea, rudderless and without a compass. How can it ever expect to reach port.

NOTICE TO VOTERS.

VETOED THE EDUCATIONAL BILL

He Is Also Charged By Them With Helping to Form the Coal Trust Despite the Protests of Railroad Men. An Article That Is Attracting At-

(From a Special Correspondent.) Washington, Oct. 7. - Not only is organized labor in Pennsylvania opposing the election of Robert E. Pattison, but laboring men all over the country appear to be keeping a very close eye on the outcome of the Pennsylvania campaign. The Knights of Labor in particular are fighting Ex-Governor Pattison by every means in their

The last issue of "The Journal," the official organ of the Knights of Labor, contained a page article from the pen of John W. Hayes, general secretarytreasurer of the order. It is a direct attack upon Ex-Governor Pattison for his hostility to laboring men and labor unions while he was governor before. The article goes on to prove that Mr Pattison is an enemy to popular education as shown in his vetoing of the Compulsory Education Bill when he sat in the executive chair. Mr. Hayes in his article on Pattison's hostility to education says:

VETOED EDUCATIONAL BILL.

"The legislative committee of the organization (Knights of Labor) had this matter before it for consideration. A bill was prepared and introduced, juggled with for some time, and altered and amended, but finally passed both houses of the legislature. True it was not all that we desired; but it was a bill that, once a law could be amended from time to time until all that was desired in the way of a good law had been secured. In this, as in all former cases, Pattison was pleaded with to sign the bill as it came from the legislature. But in this he was obdurate. His interest in having children at the coal breakers instead of in the schoolroom was paramount and he vetoed

The general master workman of the Knights of Labor writing at this time on the action of Governor Pattison

"If Governor Pattison could have traveled through the state and loitered awhile by the road-side he might have heard the hiss of the serpent that is coiling itself around children of the poor and fastening its poisonous fangs upon the vitals of the commonwealth. Whether he knew it or not his action pleased those who would make the children of men hewers of wood and drawers of water until oblivion, which comes only through drink or death, which would ease the strain."

In an editorial in "The Journal of the Knights of Labor" the following ap-

"Ex-Governor Pattison is again a candidate for governor of Pennsylvania, and the question of his fitness, his honesty, and his friendship for the decided by the voters, and especially strong support of organized labor and was elected, and he failed us in our hour of need!

"He is the sponsor for the coal trust and was at its baptism, and he probably still favors it in the prolonged strike

now proceeding. "Every friend of labor and those who exist by the well doing of the toilers should be united in one phalanx against the coal combine. They are united to crush organized labor, and all who love fair play and fair pay must unite against them and those who side with

FAVORED THE COAL TRUST.

"Judging the present by the past, it is fair to assume that Pattison is a side partner of the coal combine, or, at all events, is favorable to it, as he was in 1891-2. He evidently favored the coal barons then, in spite of his oath to support the constitution of the state of Pennsylvania, which was nullified when the combine was organized, and the fact was officially called to his attention. He was furnished with evidence and maps showing that competition was being wiped out and the law, which was quoted, evaded and disobeyed.

"President Roosevelt said in an interview, published in the Philadelphia Record, Sept. 6, 1902, that 'There is a remedy' for the settlement of the great coal strike. This is doubtless true, for the president must be well informed on the legal and political aspect of the strike. What chance would there be to end a strike if Pattison was governor or one that might occur during his term of office? If the coal barons wanted to end it, Pattison would surely be on hand to obey their desires.

LABOR WOULD PLEAD IN VAIN.

"But labor might plead in vain, as it did on former occasions. His ear was deaf to the pleadings of labor and and this is one of the beneficent results would be again. If a man cheats you once it is his fault; if he cheats you the second time, you are to blame for trial nations. giving him the opportunity. Pattison has been tried and found to be an unfaithful friend. His face was turned from us when we asked his aid to do an act of justice. He has been weighed in the balance and found wanting. No

workingman should give him a vote. Bury him under such an avalanche of ballots that his name will never be whispered again in either state or national politics." The above is the severest arraignment by labor leaders of any candidate for governor of Pennsylvania in recent

VOTE FOR PATTISON DANGEROUS

It Encourages Tariff-Smashers-Euro-About the Conditions In Europe and

Pennsylvania voters who contemmomentous slip. A vote for Pattison is a vote of lack of confidence in Republicanism. It strengthens the hands of the Democrats who seek to tear down our tariff policy, and ruin our present prosperity.

THE WAGES OF EUROPE Mr. James R. Keene, the well-known financier, who has just returned from an extended visit to Europe, says the condition of the laboring classes in Hungary, Austria and part of Germany is really pitiful. The rate of wages barely admits of existence, and when he saw the workmen in those countries he wondered what we would do withof earth," declared Mr. Keene. "Here is the greatest return offered to the man who has muscle and brain to market. Here is the place for the man of ambition to discover that energy and worth find their way to the top mor suddenly than anywhere else on earth.

This statement of a man of large and careful observation should command the attention of American workingmen. The more intelligent of them of course know that labor is better rewarded in the United States than in any other country. They know that the wage worker has greater respect here than in any other land. But do they generally appreciate why this is so? Forty five years ago labor in this country was in about the condition that labor is now in most of the countries of Europe

THE CAUSE OF HARD TIMES It was not steady employed and it was poorly paid. In 1855 Horace Greeley wrote: "The cry of hard times reaches us from every part of the country. The making of roads is stopped, factories are closed and houses and ships are no longer being built. > TARIFF FOR REVENUE ONLY. Then the country had a "Tariff fo revenue only," which not only failed to vield sufficient revenue to meet the expenditures of the government, but kept the industries prostrated. In his tion: "With unsurpassed plenty in all the productions and all the elements of natural wealth our manufacturers have suspended, our public works are re tarded, our private enterprises of different kinds are abandoned, and thousands of useful laborers are thrown out of employment and reduced to want We have possessed all these elements of material wealth in rich abundance and yet, notwithstanding all these advantages, our country, in its monetary interests, is in a deplorable condition. One of the severest panics the country ever experienced was in 1857 and it was particularly disastrous to labor. There were bread riots in New York and some other cities and destitution and suffer-

ing among the laboring classes was general. A change came with the inauguration of the economic policy of the Republican party and it is needless to point out what has been accomplished under the operation of that policy for American industries and American labor. All intelligent men are familiar with it and it is this which the wage workers need to bear in mind when they are appealed to to strike down or seriously impair that policy. Labor conditions in the United States may not be in all cases what could be desired. Improvement in some respects is to be wished for. But on the whole American labor is vastly better off in every way than is labor in any other part of the world of the policy which has made the United States first among the indus-
