MAY BEGIN IN TWO WEEKS

From present appearances it would seem that it may be but a comparatively short time before at least a portion of our town will have the benefit of sewerage. Now that a resolution has been adopted authorizing the construction of a sewer, Council has decided to lose no time in entering upon the work. All preparation has been left in the hands of the Committee on Streets and Bridges and if necessary special meetings of Council will be called from time to time to take action on matters that might otherwise cause delay.

Several members of the Committee on Streets and Bridges were interviewed yesterday, who stated that actual work on the sewer might begin during the present month. A majority of the members probably favor the latter plan, as both of the officials named, they claim, are skilled and practical men accustomed to handling workmen.

One of the first things to be attended to will be the survey. This is not as big a proposition as it might seem, as the intention is not to cover the whole borough at present but merely to get a survey relating to Blizzards' run. Provision will be made only for domestic sewerage, as the intention is not to take in cellar or surface sewerage.

When the Nerves Are Shattered.

When the nerves are shattered one cannot think, work, eat, sleep or accomplish anything. It is a case of force all the time—a continued effort to keep going—no life—no energy—no ambition—no hope—no anything—nervous headaches—erectile spells—fits of depression and utter despondency. Dr. A. W. Chase's Nerve Pills cure this condition by rebuilding the shattered nervous system—nourishing the nerve centers and resupplying what is lacking—the active principle of the Nerve Force. Mr. J. M. Kline of Paxinos, Pa., says: "Last fall I got a box of Dr. A. W. Chase's Nerve Pills at Gosh's Drug Store, Danville, Pa., and had my wife use them. She had suffered a great deal from shattered nerves and sleeplessness and nothing seemed to do her much good. The Pills acted like a charm—nothing and quieting the nerves—giving restful sleep and good general strength. She speaks most highly of them and I have no hesitation in recommending them." 50c a box at dealers or Dr. A. W. Chase Medicine Co., Buffalo, N. Y. See that portrait and signature of A. W. Chase M. D. are on every package.

Early Strawberries a Failure.

A prominent gardener who attends our curb-stone market is authority for the statement that the crop of early strawberries was ruined by the cold weather on Friday night. Mercury went down below the freezing point. There was a heavy frost, while ice formed on water where it had been left exposed in buckets. Not only strawberries but other kinds of truck easily injured by freezing were blighted by the frost. Strawberries where the buds had not yet opened, it is thought, may have escaped, so that there are still prospects of a partial crop. The late strawberries of course had not reached a stage of development when injury was likely to ensue from freezing.

Preventing Strikes.

The Chicago Federation of labor has put an end to hasty strikes by deciding to make its executive board a mediator in all disputes and that all affiliated locals shall submit their troubles to this board for adjustment. This plan could be adopted elsewhere with profit to employer and employee. There is no doubt that many strikes could be avoided by both parties to them if the principles could be induced to come together and temporarily consider the matters in dispute. A strike means a loss to both parties and resumption of work after a strike is not accompanied by the same friendly feeling that marked the relations of employer and employee before the strike.

Drills Twice Weekly.

Colonel Clement is determined to increase the attendance at drills of the various companies in his Regiment and has issued an order that drills will be held twice a week until after the coming inspection.

Made Young Again.

"One of Dr. King's New Life Pills each night for two weeks has put me in my teens' again" writes D. H. Turner of Dempscytown, Pa. "They're the best in the world for Liver, Stomach and Bowels. Purely vegetable. Never gripe. Only 25c. at Paules & Co's drug store."

A DANVILLE YOUNG MAN

John E. Miles, son of our townsman Frank Lee Miles, on Monday will graduate at McMasters University, Toronto, Canada. The institution named is a Baptist one and the completion of his four years' course there starts Mr. Miles out on a career as a minister of that church.

It will no doubt be the beginning of a very remarkable career, as John has already achieved distinction in one profession. Talented, quick and versatile and gifted with any amount of energy and ambition he is likely to force success in any line of effort upon which he may enter.

Our citizens knew Mr. Miles best as the romantic young actor when he played with such theatrical stars as Cora Van Tassel and Alexander Salvini, or later when he headed the Miles' Ideals, a repertoire company of merit under the management of his father. They were flattered by the plaudits won by the early efforts of our young townsman and they learned to gauge his ability by the full measure of success he scored.

John E. Miles was not destined to be an actor. Fate was to lead him along a widely divergent path. From his earliest boyhood it was his ambition to be a minister of the gospel. So that while apparently a devotee to the theater art and his talents and his working hours were given to that profession yet he was dreaming of a career in the ministry and all his spare hours were devoted to studies that would fit him for such a profession.

And now he has won out. Intensely religious by nature, kind, humane and affectionate, with his capacity for work, his zeal and ability who can measure all the good involved in the mission that lies before this young man? Already, we are informed he has established a reputation as a pulpit orator and a zealous aggressive preacher. Already he is in demand and a field for his labor is assured.

Mr. Miles graduates with honors. His mother, Mrs. Frank Lee Miles, of this city will be graduate at McMasters University when he graduates.

NATIONAL GUARD AND ITS DOINGS

Colonel Clement has issued the following regimental order relative to the inspection of the Twelfth Regiment by the regular army officer detailed for that purpose:

DATES OF INSPECTION.

"1. Pursuant to announcement made in G. O. No. 11, A. G. O. and G. O. No. 16, A. G. O., and instructions received from the Adjutant General, National Guard of Pennsylvania, in letter under date of April 23, 1903, Captain W. O. Johnson, 164th Infantry, U. S. A., will inspect the several companies of this regiment in their respective armies, commencing in each case at 8 p. m., as follows:

Company E, Sunbury, May 9.
Company K, Sunbury, May 29.
Company F, Danville, May 21.
Company C, Milton, May 22.
Company A, Lewisburg, May 23.
Company B, Williamsport, May 25.
Company D, Williamsport, May 26.
Company G, Williamsport, May 27.
Company H, Lock Haven, May 28.
Company I, Williamsport, May 29.

"2. Officers of the field and staff, resident in Williamsport, will be inspected at the army of Company G, Williamsport, May 27. Those resident in Sunbury will be inspected at army of Company K, Sunbury, Pa., May 29.

"3. The inspection of the several companies will be conducted in light marching order, in blue uniform, fatigue cap, leggings not to worn.

"4. Care will be taken to have all State property, not worn or necessarily in possession of the men for purpose of the inspection, regularly and systematically arranged so that quantities may be noted and condition examined by inspecting officer.

"5. Great care must be taken to see that all questions found upon an inspection rolls are correctly answered, that Hutter books are written up to date of inspection, that all enlistment papers, properly executed, are present for the examination of the inspecting officer, and that every man available for duty is present at the inspection of his company.

"Every man absent on furlough will be considered absent with leave, it is therefore requested that furloughs be confined to such as are unable to attend for some acceptable reason.

"6. Attention of company commanders is called to provisions of G. O. No. 11, A. G. O., and G. O. No. 16, A. G. O., both current series. Care will be taken to conform to all instructions therein contained.

"7. From and after the issuing of this order and until the inspection of the several companies as above provided, companies will drill twice a week. Absentees will be punished. Company commanders will report to these headquarters, immediately after each drill, all absentees from two consecutive drills, with such excuse as they may offer."

DOUBTFUL RUMORS.

The published statement of some stranger residing in a faraway place may be true enough, but it is generally accepted as a doubtful rumor. How can it be verified? The testimony which follows is convincing proof because it comes from a resident of Danville.

Mrs. Nelson Hollister of 611 Mill street, says: "My son John was always troubled with his kidneys, and I was told by one doctor when we lived in Lewisburg that he would always have bother with them. He had pains in his back, could not sleep and the kidney secretions were annoying and embarrassing. There were pains in his head and he was depressed and dead tired the whole time. Doan's Kidney Pills relieved him of the whole trouble. My husband used some for lameness in his back and they gave him immediate relief."

By a Persistent Gough, but Permanently Cured by Chamberlain's Cough Remedy.

Mr. H. P. Barbage, a student at law in Greenville, S. C., had been troubled for four or five years with a continuous cough which he says "greatly alarmed me, causing me to fear that I was in the first stage of consumption." Mr. Barbage, having seen Chamberlain's Cough Remedy advertised, concluded to try it. Now read what he has to say of it: "I soon felt a remarkable change and after using two bottles of the twenty-five cent size, was permanently cured." Sold by Paules & Co. Druggists, 342 Mill street.

Many Benefits.

The benefits that will accrue to the farmers of Pennsylvania from the good roads bill ought to be many, especially after it has been in operation long enough to make a respectable showing in the condition of the roads. During the muddy seasons of the year farms that are located even three or four miles from a railroad are, for the time being, practically outside of the regular current of business, for where light wagons sink almost hub deep in the mud it is impossible to do any heavy teaming, and there occurs a consequent stagnation in business. Unfortunately for him this stagnation may come just when it is to the farmer's interest to reach the market. There may be a demand for his products which he has held for high prices, and yet he cannot take advantage of the demand, for the bad road is in his way. The road made impassable, or nearly so, perhaps, by a few days' rain puts him on an equality with the farmer 40 miles from a rail way, whereas good roads would enable him to take advantage of unusual demands, of high prices, and reap the benefits.

Let me say I have used Ely's Cream Balm for catarrh and can thoroughly recommend it for what it claims. Very truly, Rev. H. W. Hathaway, Elizabeth, N. J.

I tried Ely's Cream Balm and to all appearances an cure of catarrh. The terrible headaches from which I long suffered are gone.—W. J. Hitechek, late Major U. S. Vol and A. A. Gen., Buffalo, N. Y.

The Balm does not irritate or cause sneezing. Sold by Druggists at 50 cts. or mailed by Ely Brothers 36 Warren St., New York.

Annual Meeting.

The annual meeting of the stockholders of the Danville Bessemer Company will be held on the 12th day of May, 1903, at 12 o'clock M., at the office of the Company, 319 Market street, Camden, New Jersey, for the purpose of electing a Board of Directors and receiving and acting upon reports of the officers and for the transaction of such other business as may properly come before the meeting.

In accordance with the laws of the State of New Jersey no stock can be voted which has been transferred on the books of the Company, within twenty days next preceding this election.

Anti Liquor Crusade.

A crusade against the saloon, club house and brewery which promises to develop sensational features was started at Puttsville Sunday. It is in charge of Rev. George H. Vibbert of Massachusetts, who will be aided by ministers and every Christian anti-liquorist in that county. Rev. Vibbert says he has a great field in Schuylkill County where there are 1500 licensed places with a population of but 180,000. Rev. Vibbert delivered a series of temperance lectures in Danville several weeks ago.

GOVERNOR SIGNS NEW BALLOT BILL

Governor Pennypacker signed the Focht Ballot Bill Friday. This measure was drafted by a committee appointed by Senator Quay as chairman of the Republican State Committee, and is an amendment to several sections of the Baker Ballot Law. The reason a complete new bill was not introduced was because the several sections which would be re-enacted had been passed on by the courts, and there was a desire to avoid unnecessary changes in the law.

The accident happened while the Bessemer blast furnace was in operation. Mr. Rhodes, who was engaged in hauling out the cinder, accidentally stepped into a red hot and molten cinder tap. The injury was a shocking one; all the soft tissue of the foot except the tendons was burned off.

The local physicians did all they could for him. Year after year passed and the terrible injury refused to yield to treatment, the man's suffering meanwhile being most excruciating. During the winter of 1901 Mr. Rhodes was under treatment in the Mary M. Packer Hospital, but he returned home unimproved.

Last August Dr. Wintersteen suggested that he go to the University Hospital at Philadelphia. The case had then reached such a stage that it was a question whether even with the present methods of skin grafting etc., there was any remedy short of amputation.

At the University Hospital he was under the treatment of Dr. Martin. As the result of the treatment, which included skin grafting, new tissue was formed on the foot from the tendons up. All pain has passed away—and the healing is practically complete.

It is still a delicate case and nothing but the utmost care on the part of the patient in heading advice will insure a permanent recovery. He was assured, however, by the surgeon in charge upon leaving the Hospital that if he exercised proper care he would have full use of his foot.

A New Rifle.

In view of the proposed equipment of the National Guard with the present army rifle, it is of special interest to note that a better rifle than the one now in use by the regular army has been found, and will be issued instead of the Krag-Jorgensen. It is argued that if the regulars are to have a different weapon the guardsmen should wait until they too, can have it, instead of taking up the "Krag" only to throw it aside in a comparatively brief time.

An exhaustive series of tests have convinced the military authorities that a better rifle has been devised, and that it will soon be issued to the regulars. It is asserted that it is a pound or more lighter than the Krag-Jorgensen, and that it has been found that it does superior work with a barrel of only twenty-four inches in length. In place of the thirty-inch barrel which has heretofore been used. The point is made that its adoption would enable the cavalry and infantry to employ the same arm, thus doing away with the carbine which has been a distinctive feature of the mounted soldier's outfit for so many years. As it has been shown that the days of cavalry charges in the open are practically over and that the cavalrymen must hereafter rely chiefly on firework in place of the semi-obsolete sabre, the advantage of having both branches of the service equipped with the same rifle is evident.

Eels For Everybody.

After many efforts the signature of the Governor has been secured to a bill allowing the catching of eels by use of basket and wing walls in the waters of the Commonwealth. This privilege has been long sought by the fishermen of the State through their representatives at Harrisburg. Several times bills similar to the one last signed have passed, but were regularly vetoed by the Governor.

It was something of a job to each time convince the legislators that in taking eels by basket you do not destroy by wholesale young game fish. But the fishermen knew their ground and kept plugging away until they have secured the privilege under law to gather in by the wagon load the thousands of tons of eels which every fall migrate to salt waters. The bill under which this may now be done was introduced and passed to final and successful issue by Senator Focht of Lewisburg. Several times before he made hard battles with his fishermen friends but until now had the too overwhelming prejudice against the fish basket to combat. It was therefore a long, hard battle but just the same a successful one.

Convention of Royal Arcanum.

Much interest is centered in the biennial convention of the State Royal Arcanum which will be held at Wilkesbarre on the 13th, 14th and 15th of the present month in the Shriners hall, and the members of the Wilkesbarre councils are making elaborate preparations for the entertainment of the visitors. About three hundred and fifty delegates, accompanied by their wives and lady friends will be present and the convention will be one of the largest held in Wilkesbarre for some time. On the 14th there will be an excursion to Harvey's Lake and in the afternoon the ladies will be entertained. Several boats have been chartered and an interesting program will be given. In the evening the members will go to the Lake and a reception and banquet will be given in the Oneonta Hotel.

Suprise Party.

A surprise party was tendered Charles Rishel at Sunny Side farm last Friday evening in honor of his 33rd birthday. Graphophone music was furnished by G. W. Hoke. During the evening refreshments were served. Those present were: Mr. and Mrs. Blecher, Mr. and Mrs. E. G. Wertman, Mr. and Mrs. John Mitchell, Mr. and Mrs. Hurley Baylor, Mr. and Mrs. David Wertman, Mr. and Mrs. J. C. Foust, Mr. and Mrs. George Loggner, Mr. and Mrs. A. C. Angle, Mrs. Mitchell, Mrs. John Knorr, Miss Bertha Powers, Miss Lizzie Knorr, Miss Ella Manser, Miss Anna Angle, Miss Hannah Roberts, Miss Lizzie Manser, Miss Myrtle Angle, Charles Angle, Master Roy Angle, J. C. Rishel, W. R. Wertman, Wm. Knorr, Charles Kramm and Henry Howell.

Quick Arrest.

J. A. Gullebe of Verbena, Ala., was twice in the hospital from a severe case of piles causing 24 tumors. After doctors and all remedies failed, Bucklen's Arnica Salve quickly arrested further inflammation and cured him. It conquers aches and kills pain. 25c. at Paules & Co., Druggists.

A "Jag" Defined.

A Kansas "Jag" after careful investigation, has decided that a man is not drunk in the eyes of the law, no matter how much he may have imbibed, if he is still in a condition to make a successful horse trade. In Nebraska, a few years ago, it was held as a legal principle that when a man was unable to hold up a fishing pole he was too drunk to hold office. Down in Texas a man is never drunk until he rolls under the table and wants to go to sleep.

From a Cat Scratch.

On the arm, to the worst sort of a burn, sore or boil, DeWitt's Witch Hazel Salve is a quick cure. In buying Witch Hazel Salve, be particular to get DeWitt's—this is the salve that leads without leaving a scar. A specific for blind, bleeding, itching and protruding piles. Sold by Gosh & Co., Paules & Co.

THE CASE OF HARVEY RHODES

Harvey Rhodes of this city has returned from the University Hospital, Philadelphia, where he was under treatment for 8 months and 2 weeks for a very serious burn on his foot which refused for a long time to yield to treatment and threatened to necessitate amputation. The case was a remarkable one, resulting in what is practically a cure after four years of uncertainty and suffering.

The erratic movements of the old clock had caused a great deal of inconvenience about town during the last few days. Several persons who arrived at the station too late for the train laid the blame on the old clock. Others on their way to their meals who were led to believe that they had plenty of time on their hands loitered too long on the street and arrived home after the dinner hour.

Edward Lunger, janitor of the church, who winds the clock and looks after it in other ways, last evening said that it has been doing badly ever since the wind storm Thursday night and it was his opinion that the steeple had received a severe shaking up in the wind with the result that a cog had slipped somewhere.

At all events it was a matter for investigation and the janitor accompanied by a News reporter climbed up into the steeple to see what was the matter. Mr. Lunger was right in his conjecture. The rope which carries the two-hundred pound clock weight had slipped out of the groove of one of the pulleys.

The rope was placed in position; the clock was set at the right hour after which the ponderous mechanism was set in motion. There seemed to be nothing else wrong and the big pendulum swung backwards and forwards with its accustomed regularity, while the clock above measured off the seconds with its same solemn and monotonous tick.

The old clock was placed in the tower in 1854, nearly fifty years ago. Many persons are of the opinion that as a result of its long service it is nearly worn out and cannot be relied upon much longer. In this they are mistaken. The clock is still a splendid piece of mechanism. Clock experts who have examined it and have made repairs upon it state that with proper care and careful winding it ought to keep good time for another fifty years.

The clock was manufactured and placed in position by Jacob D. Custer of Norristown. Custer was a man of inventive turn, a very skillful mechanic and his clocks had a reputation that excelled all others.

There are still a good many people in town who remember when the clock was installed in the steeple of the then new Mahoning Presbyterian church. It cost \$300. The money was raised by subscription, Jacob Cornelison being the prime mover in the project. Two others who assisted to solicit subscriptions were Dr. Magill and Judge Cooper.

A Startling Test.

To save a life, Dr. T. G. Merritt, of Mehoopany, Pa., made a startling test resulting in a wonderful cure. He writes "a patient was attacked with violent hemorrhages, caused by ulceration of the stomach. I had often found Electric Bitters excellent for acute stomach and liver troubles so I prescribed them. The patient gained on the first, and has not had an attack in 14 months." Electric Bitters are positively guaranteed for Dyspepsia, Indigestion, Constipation and Kidney troubles. Try them. Only 50c. at Paules & Co's drug store.

West Berwick Borough Without Justices.

Owing to the failure of John C. Christman and Frank Fenstermaker to file their acceptances in time after being duly elected Justices of the Peace of West Berwick Borough, their commissions from the State Department failed to arrive and that borough now is consequently without these officials. It will now be necessary for the Governor to make appointments to fill the vacancies.

The X-Rays.

Recent experiments, by practical tests and examination with the aid of the X-Rays, establish it as a fact that Catarrh of the Stomach is not a disease of itself, but that it results from repeated attacks of indigestion. "How Can I Cure My Indigestion?" Kodol Dyspepsia Cure is curing thousands. It will cure you of indigestion and dyspepsia, and prevent or cure Catarrh of the Stomach. Kodol digests what you eat—makes the stomach sweet. Sold by Gosh & Co., Paules & Co.

Getting Ready for Memorial Day.

People who own lots in the local cemeteries are stirring themselves these days, heaving the lots so that they will look their prettiest by Memorial day, May 30. The rake and lawn mowers are working overtime and the lawns are looking very nice and green. By Memorial day the cemeteries will look their nicest.

Quick Arrest.

J. A. Gullebe of Verbena, Ala., was twice in the hospital from a severe case of piles causing 24 tumors. After doctors and all remedies failed, Bucklen's Arnica Salve quickly arrested further inflammation and cured him. It conquers aches and kills pain. 25c. at Paules & Co., Druggists.

Tired Out

"I was very poorly and could hardly get about the house. I was tired out all the time. Then I tried Ayer's Sarsaparilla, and it cured me. I took two bottles to make me feel perfectly well."—Mrs. N. S. Swinney, Princeton, Mo.

Tired when you go to bed, tired when you get up, tired all the time. Why? Your blood is impure, that's the reason. You are living on the border line of nerve exhaustion. Take Ayer's Sarsaparilla and be quickly cured.

Ask your druggist or at the office of Dr. J. C. Ayer, Lowell, Mass. It's a medicine. All druggists.

MAHONING TOWN CLOCK

The town clock on the Mahoning Presbyterian church, which has proven somewhat unreliable of late yesterday gave up the struggle and stopped short at twenty minutes before 3 o'clock.

The erratic movements of the old clock had caused a great deal of inconvenience about town during the last few days. Several persons who arrived at the station too late for the train laid the blame on the old clock. Others on their way to their meals who were led to believe that they had plenty of time on their hands loitered too long on the street and arrived home after the dinner hour.

Edward Lunger, janitor of the church, who winds the clock and looks after it in other ways, last evening said that it has been doing badly ever since the wind storm Thursday night and it was his opinion that the steeple had received a severe shaking up in the wind with the result that a cog had slipped somewhere.

At all events it was a matter for investigation and the janitor accompanied by a News reporter climbed up into the steeple to see what was the matter. Mr. Lunger was right in his conjecture. The rope which carries the two-hundred pound clock weight had slipped out of the groove of one of the pulleys.

The rope was placed in position; the clock was set at the right hour after which the ponderous mechanism was set in motion. There seemed to be nothing else wrong and the big pendulum swung backwards and forwards with its accustomed regularity, while the clock above measured off the seconds with its same solemn and monotonous tick.

POST OFFICE DEPARTMENT

It is to Postmaster General Payne's credit that he is placing no restraining hand upon the inquiry now going on in the post office department. He does not shrink from possible revelations of inquiry in the department, and says the investigation must not be pushed until every source of competent evidence has been exhausted and definite, clear cut conclusions have been reached.

At the outset the investigation of post office affairs arose from differences between the postmaster general and his chief assistant, upon the one side, and the chiefs of what should be two subordinate divisions, those of free delivery and of supplies and salaries, upon the other. These relations had become impossible of endurance, subversive of discipline and filled with latent possibilities of fraud. In its beginning, the investigation was designed to uncover those frauds, if they existed, and to evolve a plan of reorganization by which these overgrown divisions might be reduced to their due proportions and made subject to responsible supervision. But since then the investigation has assumed a wider scope. It has evoked charges and counter-charges and has extended into the management of individual post offices. The chief of one of the divisions affected, that of salaries and supplies, resigned precipitately at the very outset of the inquiry. Examination of that division has elicited charges that needless supplies were forced upon several large post offices and that a plot existed for securing increases in salaries for a consideration. Those scandals are the object of current investigation. In the division of free delivery there have arisen accusations of collusion between subordinate officials and various contractors. In the law division, its chief, himself a former postmaster general, who had already resigned by request, has been summarily dismissed because of his part in the removal of papers from a safe.

A Little Early Riser.

Now and then, at bedtime will cure constipation, biliousness and liver troubles. DeWitt's Little Early Riser are the famous little pills that cure by arousing the secretions, moving the bowels gently, yet effectually, and giving such tone and strength to the glands of the stomach and liver that the cause of the trouble is removed entirely, and if their use is continued for a few days, there will be no return of the complaint. Sold by Gosh & Co., Paules & Co.

The Orange and Purple.

(Dedicated to the Danville High School by the Junior Class.)
Hail ye students join the chorus
Of our joyous song of praise
For the honor of our High School
Loud your youthful voices raise;
We will always stand together
And will always wear on high
The Orange, Purple banner
May it never cease to fly.

Here we storn the forts of wisdom.

Here engage in learning's strife,
Here we lay the firm foundation
For the battlements of life
As we leave the hallowed fortress
Each one to his course pursue
My we never forget thee, High School,
Nor thy Orange, Purple true.
When through life's long halls we wander,
With our joys, our hopes and fears,
And the merry sound of laughter
May be mingled with our tears.
When the end at last approaches
And with this life we are through
May our thoughts return to school-days
And the Orange, Purple true.
(May number of The Orange and Purple.)

The Wastes of the Body.

Every seven days the blood, muscles and bones of a man of average size loses two pounds of weight. These wastes cannot be replenished and the health and strength kept up without perfect digestion. When the stomach and digestive organs fail to perform their functions, the strength lessens, health gives way, and disease sets up. Kodol Dys
