HARVEST HOME THANKSGIVING

A Harvest Thanksgiving service was held at Shiloh Reformed Church Sunday. This is an annual event of more than ordinary interest at Shiloh Reformed church, which always brings out a large congregation.

THE BRIDGE AT WASHINGTONVILLE

The County Commissioners are kept pretty busy making repairs on the large number of bridges throughout the county, the most of which are of the wooden kind.

They are at present placing new abutments under the covered bridge at Washingtonville on the Milton road. The bridge is a large one and to support the structure and keep it open for travel while the work is going on is no easy task.

The old bridge at Washingtonville is a case in point. During its long life only once did it yield to the ravages of the flood. This was about thirty years ago during a time of exceptionally high water, when it was lifted from its abutments and carried a short distance below it.

THE LOVE OF CHRIST

A large congregation turned out at Maloning Presbyterian church Sunday morning to hear Rev. George J. Miggins, D. D., of New York City. Dr. Miggins is not a stranger in Danville, having preached in Maloning Presbyterian church at least twice previously, the last time in January.

Since his last visit here he has passed through a long siege of illness, being confined to his bed for eleven weeks. He has not yet fully regained his strength and announced yesterday that he will rest in Danville for a few days, conducting the prayer meeting Wednesday night.

Dr. Miggins is unquestionably one of the ablest divines that visit Danville. A master of language, deeply learned, earnest and at times impassioned, he has the faculty of presenting the truths of scripture in a light which makes them self-evident and convincing.

TROLLEY AND RIVER BRIDGE

The fact that the right of way through the Borough has been granted by Council to the Danville and Riverside Street Railway Company is good news indeed to our residents, who are enthusiastic on the subject of a trolley, and hope before many months to see cars running between this city and Riverside.

At present there is a great deal of curiosity to learn what the status of affairs is as relates to a right of way through the river bridge. It can only be stated that the Commissioners of each of the two counties involved have the matter under careful consideration and will hold a joint meeting in the near future to take necessary action.

Meanwhile the crossing of the bridge by the trolley becomes the subject of much discussion by the public. In the first place the crossing of the bridge is every where admitted to be feasible. The structure has been examined by experts and pronounced to be stronger and in every way a better bridge than the one between Sundry and Northumberland, which carries the cars of the street railway. The question then arises shall the cars pass over the bridge on the inside or upon the outside?

NEW TROLLEY CO. BOUGHT BIG DAM

The Berwick and West Nanticoke Electric Railway Company is the new owner of the old Pennsylvania Canal Company dam at Nanticoke.

It is the plan of the railroad people to place a great power plant at West Nanticoke which will be fitted with powerful turbines and dynamos and the thousands of horse-power now going to waste daily at the dam, will be harnessed, and by transforming it into electricity it will be utilized in operating the cars, of not only the Berwick and West Nanticoke Company, but it is believed those of the Columbia and Montour Traction Company as well.

The new railroad company have also acquired the right to use such sections of the old tow path as may be available in getting its tracks from Berwick to West Nanticoke, and it is expected that by July next a through electric line will parallel the Lackawanna tracks from West Pittston to Catawissa.

The Berwick and West Nanticoke Railroad will extend from Berwick to West Nanticoke, a distance of twenty-seven miles, and negotiations are now pending for an extension from West Nanticoke to the Plymouth Borough line, where a connection will be made with the Wilkes-Barre and Wyoming Valley Traction Company's lines.

WILL BUILD AN ANNEX

To meet the demand of the constantly increasing trade the Danville Stone and Manufacturing Company has decided to increase the capacity of its plant. Ground this morning will be broken for an annex to the moulding department, 144 x 23 feet.

For many months past the company in question has had some sixty moulders employed, which is all that the moulding rooms will accommodate. The plant has been running on full time; nevertheless it has been impossible to keep up with the work and orders come in faster than they can be filled. Cramped as the company is it is impossible for it to turn out any of the popular gas ranges, upon the manufacture of which it entered some months ago. Thus it is losing an opportunity to build up a large and profitable trade in this new line alone.

The proposed annex will afford room for at least fifty more moulders, raising the number employed to seventy-five, which will result in materially increasing the product of the plant. General Manager, W. A. Seelher last evening stated that the work on the annex will be rushed and that in all probability it will be completed in two weeks' time, or earlier.

The Genuine vs. Counterfeit. The genuine is always better than a counterfeit, but the truth of this statement is never more forcibly realized or more thoroughly appreciated than when you compare the genuine DeWitt's Witch Hazel Salve with the many counterfeits and worthless substitutes that are on the market. W. S. Ledbetter, of Shreveport, La., says: "After using numerous other remedies without benefit, one box of DeWitt's Witch Hazel Salve cured me."

People Who Can't Sleep. Many people go to bed—not to sleep, but to think—to tumble and toss—to get up, walk about until tired Nature gives way and a few drowsy hours of sleep are obtained just before dawn—a sleep that does not rest—a sleep from which one wakes weary and tired, wholly unfitted to take up the daily routine of household, shop or office duties. That this condition goes on unheeded for is almost criminal, when the well-known, time-tried and tested power of Dr. J. C. Gosh's Gosh's Pills to give restful natural sleep have been so fully proven in such cases.

Money to Catch Eels. The State Department of Fisheries has set about to vigorously enforce the act of April 27, 1903, in regard to catching eels and the collection of a license. The provision is \$5 for a license, the license being to cover only a period from August 27 to December 1.

IMPORTANT TESTIMONY

Dr. P. C. Newbaker, Justice of the Peace, Peace, Anthony Scott and James Lake went up to Williamsport Saturday to testify before Governor Traylor in the case of James Macawee, who unfortunately P. A. R. Brakeman, who lost his life in this city Wednesday by being struck on the head by a large car.

When the four witnesses returned a verdict fixing the responsibility for the brakeman's death had not been arrived at by the coroner's jury.

Among those who testified, in addition to the Danville men, were Dr. Klump, who operated on Macawee at the hospital and Charles H. Patton, flagman, who said the train arrived at Danville at 6:20 a. m. James Lake, who first found Macawee after he was hurt and Anthony Scott who assisted to carry him down to the Farmers' Hotel were important witnesses. Dr. P. C. Newbaker who crossed the brakeman's wounds and Justice Lake, had also important testimony to offer.

The evidence while leaving no doubt as to the manner of death was not wholly convincing to the jury that Mrs. Molinski threw the coal which struck the brakeman. Among all who testified there was not one who saw the coal leave the woman's hand and strike Macawee. Mrs. Molinski was on the middle of the car while the brakeman was walking along a path skirting the railroad embankment, which at that point was high. The evidence showed that the coal fell six feet before striking the man, who was out of sight from the top of the car. It also developed that there were more than one person on the car at the time the coal was thrown off.

A Remarkable Record. Chamberlain's Cough Remedy has a remarkable record. It has been in use for over thirty years, during which time many million bottles have been sold and used. It has long been the standard and main reliance in the treatment of cough in thousands of homes, yet during all this time no case has ever been reported to the manufacturer in which it failed to effect a cure. When given as soon as the child becomes hoarse or even as soon as the cough appears, it will prevent the attack. It is pleasant to take, many children like it. It contains no opium or other harmful substance and may be given as confidently to a baby as to an adult. For sale by Pauls & Co. druggists.
