A tug of war is being added to the several forms of competitive sport recently introduced at the Y. M. C. A. gymnasium.

ATHLETIC CONTESTS

Want of space in the gymnasium makes it impossible to follow the official rules. Instead of the inch and a half 100-foot rope called for an inch rope not more than thirty feet or so in length will have to suffice. Neither will any cleats be permitted on the or in stock to that amount. The prosfloor, nor the harness-like belt or "lunger" worn by the end men in the game as officially played. The center mark and the two other lines on the little difficulty will be experienced in floor which enter into the game will not be more than six feet apart.

The tug of war has always held rank among the most popular athletic conwill carry with it a full measure of interest and excitement.

The rope will be procured today and the first contest will take place in the gymnasium tonight. The contest comes in at the latter end of the program drill to the depth of three hundred to ed them to ignite. after the class exercise.

Among the other competitive sports recently introduced into the gymnasium here is the "Medicine Ball Toss" and the "Indian Club Pass." Both have become very popular and are participated in with the keenest pleasure.

The "Medicine Ball Toss" affords plenty of quick, hard work. The ball has a diameter of some fifteen or eighteen inches and weighs nine pounds. The men stand in a circle with one in the center. Great dexterity is exacted of the man in the ring whose aim is as the ball is thrown across the ring to strike it in such a way as to cause it to touch the floor. Succeeding in this he is permitted to leave the center and the man who threw the ball last takes his place in the ring. The trick is to get out of the center as

quickly as possible. The "Indian Club Pass" is also a eight encores at every performance. competitive games.
