A been washed beyond repair; the fences large proportion of the members are have been leveled or entirely swept away, while the fine trees which grew on the bank along the river have been partially or wholly uprooted and torn

and splintered by the deluge of ice which swept over them. The blighted aspect of things especi ally the unpromising condition of the wheat fields is in marked contrast to what was witnessed last spring at this

time. Prospects on the whole are not favorable for a good crop of wheat Most of the damage, it is said, was done during the early part of the pres ent month, when the fields bars of snow were "scorched" by the high winds and hard feezing.

Many farmers incline to the view that the wheat will rally should spring weather follow immediately, giving us an abundance of sunshine and rain during April.
