THE SUCCESSFUL COUNTY FAIR

It is gratifying to know that there has been a pronounced reform in the so-called amusement features of many of the county fairs held in the state this year.

It is a reflection upon the intelligence and good sense of the farmers, who are most interested in agricultural fairs and are the largest patrons of them, to suppose they were to be amused with fake shows and gambling and shameful, immoral displays.

The most successful fairs held in Pennsylvania, and those which have kept up from year to year, are the ones that have been clean and free from fakes and demoralizing shows.

The county fair properly conducted serves a most useful purpose. The farmer attends it with the members of his family to learn who of his neighbors has produced more or better results than he, to see the latest and best in farm implements, and for an intelligent and generally profitable interchange of experience.

The agricultural fair is too important an event in the farmers' work to be demoralized and destroyed by fake shows and gambling tricks. The movement for the suppression of these features deserves the cordial support of every respecting community.

A BRIDGE AND RAILWAY

After numerous rumors which proved to be idle talk we can now announce with certainty that within a very short time Sunbury will be connected by a bridge with Snyder county and on this bridge there will be an electric railway which will run from Sunbury to Selingsgrove.

The bridge will be built at Bainbridge street and will connect with the Snyder county shore near the road running along in the rear of Clement's Park. As soon as the work of the survey is completed the building of the bridge will be started and an effort will be made to have the bridge up and in service before the first of the year if the weather permits.

When the bridge is completed work on the street railway will be started and by the time spring opens the people in Sunbury and Shamokin and along the proposed route will have the advantage of a thorough modern equipped electric railway.

Through the untiring efforts of Attorney J. K. McWilliams the bridge and street railway is a sure go after a year of hard work. The company building the bridge is composed of Harrisburg capitalists and Mr. McWilliams is the treasurer and secretary.

It was also learned Saturday morning that an application will be made on Monday for a charter for a narrow gauge railway from New Berlin to Windfield to connect with the Reading railway. The road will be used mainly for hauling lumber.

The famous picnic held at Hunter's Park Saturday was successful far beyond what was anticipated. The picnic, however, will be an annual affair and if the well-laid plans do not miscarry the coming next year will bring together thousands instead of hundreds as this year.

By noon there were probably five hundred people on the ground representing nearly every township of Montour county with a fair sprinkling from Point, Gearhart and Rush townships of Northumberland county and Hemlock, Montour and other townships of Columbia county.

PRESENTED TO FREE LIBRARY

A very interesting and valuable souvenir relating to Danville's past history, yesterday presented to the Danville Free Library by Mrs. Anna Best of Philadelphia.

It is one of the original programs of the military and civic procession to receive and welcome the Columbia Guards on the occasion of their return home from the war with Mexico on July 27, 1848.

The program, which is a very fine specimen of the printer's art and is in an excellent state of preservation, is enclosed in a handsome frame of large size.

The presentation recalls one of the most famous events that ever took place in Danville. The entire country turned out to do honor to the fragment of the returning Guard that survived the bloody battles of Mexico.

Everything is in the name when it comes to Witch Hazel Salve. E. C. DeWitt & Co., of Chicago, discovered some years ago how to make a salve from Witch Hazel that is a specific for Piles.

River Coal Operations. Last year large quantities of coal that had been washed down from the mines was taken from the bed of the river at different points, at Danville and Sunbury, and now similar operations are in force in Columbia county near Bloomsburg. Isaac Gross of Sunbury, and Bert Krossler, of Bloomsburg are at work in the river at Almedia about 100 yards from the shore and the results are exceeding their expectations as they are gathering fourteen tons of coal each day, when it is sold as fast as they can get it at \$1.25 per ton.

Those who have used it say that it burns all right, and as it costs less than one-third as much as the ordinary coal they have no difficulty in selling it as fast as they can get it out of the river.
