Danville, Pa., Dec. 15, 1904.

### A BRONZE FLOWER.

Prettiest Morning Glory That Ever

Bloomed In a Tomato Can. While I devoured my sandwiches, petite at noontime of my first day at ing, but if she will take time enough work with the iron molders Mike reached over into a neighboring yard and plucked a crisp climbing morning glory. Holding the delicate blossom up for my inspection, he said, "Young needn't think it can't be done. First you get an old can, punch a hole and stick the stem of the flower through the hole, leaving the blossom inside. See?" I saw. "Next you fill the can with water and drop into the you, go slow. After a long time the water will leak out, leaving the blossom buried in the sand, but still in thing in the core oven and bake it. with less food, the digestion is aided That will burn the blossom to ashes. Then if you have the patience to shake it and shake it till all the ashes drop out through the stem you'll be ready to pour in your metal, and if you do as I tell you and make no mistake and try about six times you'll have in the end the prettiest morning glory that ever bloomed in a tomato can."-Scribner's.

#### FRIENDSHIP.

#### It Imposes Serious Duties Upon Those Who Court It.

"When acquaintanceship ripens into friendship, something serious has come into one's life," writes Mrs. Henry Graham in the Onlooker. "I don't think that any one can or ought to afford to have more than one or two really intimate friends. If love has gone with friendship-that is, if the gates of paradise have been opened to you, and the guardian angel has sheathed his flaming sword and admitted you through the portals-then you must have given everything, and you have very little left to give. A man can have a man friend and a woman a woman, because there are places where men meet men and women meet women alone, neutral ground where the other sex cannot enter because of its limitations, and there real friendship may live and thrive on the crumbs which fall from the rich man's table.

"For friendship implies something serious. You must give of yourself, your real self, and once given it cannot be taken back. One has no right to give up a friendship unless the other person agrees or unless it has become an absolute impossibility, and even then all the obligations of it may survive, while the delights of it die."

#### THE "I" AND THE "J." Why They are Dotted and How the

Practice Originated. The dot over the "i" originated in an accent which was put over the letter when doubled or placed next a "u," a practice traced back to the eleventh century. In the twelfth century the accent occurs in the combination of with other letters, and in the four-

teenth century the accent was changed to a dot-first instance in MSS, 1327which became universal when printing made it inconvenient to retain both Originally "i" and "j" were modified forms of the same letter. In the fifteenth century the "i" at the beginning unaltered Both forms were dotted, and after the

of a word was lengthened and ornamentally turned to the left, while in initial "I" became "j," a separate letter and a consonant, it still retained its dot. This is limited usually to the small "j." but abroad it may be seen also over the capital letter.-London Telegraph. King Alfonso's Bet.

When the king of Spain was at Xeres he greatly admired a horse belonging to Senor Rivero, one of the notables of the town, who at once presented him with the animal. The king refused the gift, but the other day at the pigeon shooting at the Casa de Campo, near Madrid, a match was arranged between the king and Senor Rivero. The stakes were, on the king's side, a gold plece of 100 pesetas, and on Senor Rivero's a souvenir of Xeres.

Like a skillful courtier Senor Rivero lost and sent the king the horse which he had so much admired as a souvenir of Xeres. The king could not refuse to accept, but he at once sent the senor one of the best horses in the royal stable in exchange.-London Sketch.

A "nightmare" was supposed by our ancestors to be the Saxon demon Mara, or Mare, a vampire which sat upon the sleeper's chest and was regarded as the guardian of hid treasure, over which it brooded, as a hen over her eggs, and the place where it sat was termed the nidus, or nest. When any one claims he has made a great diseovery which is really no discovery at all we say he has discovered a "mare's place where an imaginary treasure lies.

Sure of Himself. "I'll give you a position as clerk to start with," said the merchant, "and pay you what you are worth. Is that

fulness. but if ill chewed it must be washed down with liquid. This, of course, lesstric juices and interferes greatly with

the process of digestion. Those who have tried thorough maswater bit by bit nice fine sand. Mind tication of their food with no liquid, unless at the end or a half hour after the meal, have learned that the food tastes better, the meal is more satisfactory and the appetite is appeased leaving one much more comfortable than the hasty meal. A few days' trial will convince the most skeptical, for the stomach responds promptly to decent treatment. It expects it. It deserves it.

One of the greatest mistakes of the age is rapid eating, and one of the greatest curses is the nervous dyspepsia caused by it.

#### A MIGHTY PREACHER.

John Ross Was Strong of Arm and

John Ross was a Scotch minister who flourished in the early part of the seventeenth century. Tales of his wonderful deeds are told to this day in his former parish of Blair. At one time the reverend gentleman walked to Mause, a distance of about three miles. for the purpose of seeing a certain farmer and if possible inducing him to come to church, where he had never been. He found him fishing in the river and asked to be allowed to have a cast. "I never lend my rod to anybody," said the farmer. "But," replied the minister, "I have come all the way expressly to see you, and I must have a cast." The farmer, who was a very strong man and had never been beaten in a fist fight, offered to fight for it.

"All right," said the minister, and he gave the farmer such a mauling that he was glad to give up his rod. But it was a different kind of fishing that the minister had come for. He asked the farmer to keep the rod and conduct him to his house at Mause. When they arrived the minister said, "Now, you go on your knees and pray," telling him that he would not leave till he did

So the farmer fell on his knees and cried, "Oh, Lord, deliver me from this man." "Stop!" said the minister. "That is very good. I hope you may always be able to do as well. Now, you have to promise to come to the kirk next Sunday." This the farmer did. Not long afterward he became a leading

### Icebergs as Indicators.

In the investigation of the currents round the coast of Newfoundland it has been observed that there is at times a wide difference in the direction of the drift of icebergs and that of Saturday Review. the flat or pan ice, which, having no great depth, is governed in its mo tions by the surface currents and the winds, whereas the icebergs, the lar- from Belgium and kept prisoners for ger part of which is submerged to a great depth, follow only the movement of the ocean water as a whole and are | the Atlantic or picked up by some ship uninfluenced by the winds. In consequence a huge berg may often be seen majestically maintaining its slow advance in opposition to the wind and across the general motion of the fields of flat ice surrounding it. The sealers often take advantage of this fact by mooring their vessels to an iceberg in order to prevent a drift to leeward .-Youth's Companion.

While You Wait.

She had taken her umbrella into one of those places where they offer to recover them "while you wait." "It will take two days." said the man. "But ! can't possibly wait two days in here," she remonstrated. "It's so very stuffy, isn't it?" The umbrella mender, without a smile, said he would send it around in a couple of days. She pointed out to him that there was still a big difference between what he advertised and what he could accomplish. Then he explained. "It will be done while you wait," said he, "but you needn't begin to wait until day after tomor row."-Chicago News.

Many physicians now claim that the general health is hurt rather than benefited by athletics, that muscle building is not necessary to good health, that to bring about a perfectly trained condition has a severe effect on the nerves, that a built up muscle has a tendency to degenerate and that the heart, being a muscular organ, shares

#### MATTER AND FORCE.

Their Indestructibility Proved by Mr. Spencer has said ("First Princt ples," page 182) that "the verification of he truth that matter is indestructible" ests only upon "a tacit assumption of and more prevalent in this country. We really haven't time to eat properly, and we have very little time to sleep, t." "A tacit assumption," with no ra-ional basis for the assumption, would be no verification; it would be a guess. The truth that matter and force are inndamental axiom of physics, that in bronze?" I was quite sure I could not. "But," said he, "you needn't think it con't the means. Food properly needn't think it con't to masticated can be easily not could not be untrue, for in that case reaction would fail to follow action. The

estructible rests upon a better ground than an assumption. It is the inevitable corollary of Newton's Third Law of Motion, which is accepted as the every action there is an equal and opposite reaction." If there could be a the destruction of matter or force consequently the theories of the indethe great law of consequences, of equivalence, of compensation, of balance.-From "Balance: The Fundamental Verity," by Orlando J. Smith.

#### FREEBOOTERS.

In England They Were Moss Troopers, In Ireland Bogirotters.

Moss troopers in olden days in Engand infested the marshy country of Liddesdale and subsisted chiefly by a similar reason. Sir Walter Scott, in the "Lay of the Smith in Atlantic.

Last Minstrel," introduces the word

The truncheon of a spear bestrode And round the hall right merrily In mimic foray rode.

This name was also given to marauders upon the border. Mr. Camdem them borderers and describes hem as a wild and warlike people. They are called moss troopers," says Fuller in a long account of them in his "Worthies of England," "because they dwell in the mosses and ride in troops ogether. They dwell in the bounds or meeting of two kingdoms, but obey the laws of neither. They come to church as seldom as the 29th of February comes into the calendar."-Pearson's Weekly.

### THE WORD "NICKNAME."

It Had Its Origin In the Old English

Word "Eke." The word nickname has its basis in the old English "eke," an addition or prolongation, as used in "The Merchant of Venice," "'Tis to piece the time to eke it and to draw it out at length." Beekeepers still call a wooden cylinder added to a hive to increase its capacity an "eke," and we speak of eking out an income.

A nickname, therefore, is an ekepresent form through the transfer of the "n" of the indefinite article used with it from its proper place to the became first a "a nekename" and then

There are some similar cases in English of which the word "newt" is an example, having been originally "an ewt." Sometimes the "n" has left the word and become attached to the article, as in apron, which was in olden times a "napron," while "a nauger" has come down to us as "an auger."-

I have known the pigeons imported years, which, when liberated, struck out for home, only to be drowned in

appalls them. During the Franco-Prussian war the French caught a homing pigeon which was being sent to transmit information out of the besieged city of Paris. The bird was made a prisoner of war and kept in confinement for ten years. When given its liberty it at once returned to its old home, showing that ten years was not sufficient to drive from its mind the memory of home .-Country Life In America.

## Dilution Extraordinary.

A member of the French academy reported that twenty-five experiments animals showed each time that poisoned blood is active even after dilution 1,000,001,000,000 times. The strength of the average homeopathic dose is from about the third to the sixth decimal. This demonstrates that those who say that there is no medicine in a homeopathic dose betray ignorance.
