# ODD FELLOWS

The twenty-first annual session of the Pennsylvania Odd Fellows Anniversary Association will be held in Sunbary on Wednesday, April 26,1905.

The citizens of Sunbury may not appreciate the fact that this gathering to celebrate the eighty-sixth anniversary of the birth of Odd Fellowship in America will be of immense proportions. If the day proves pleasant we will have anywhere from eight to ten thousand people in Sunbury that day. and he was supported with equal In the district belonging to the anniversary association there are two hundred and twenty-eight lodges or a membership of twenty-one-thousand. Now if only half of this number come we will have ten thousand five hundred men besides visitors who always follow occasions of this kind. that the celebration will be of some moment. They have given one fare bill. But that expectation will be dis- from the city who were camping down the lane near the little schoolhouse he from all points on their respective lines.

The Odd Fellows of Sunbury invit ed this association here for a purpose. We are interested in our Orphanage to that extent that nothing is too much labor to make it successful. The writer of this article would with all other true Odd Fellows hail the day when that the citizens of our town would feel so deep and substantial an interest in this Home that they would give of their time and influence for its sup-

Other towns would have welcomed this worthy institution gladly if they would have had a chance. But for the fact that we are centrally located and other business advantages we offered, we would have lost this institution which brings hundreds of people to our town every year. It not only brings the people but their business with them. The writer of this article knows of an instance where a visitor spent over \$100,00 in Sunbury while on a visit to the Orphanage and I am sure that there are many more such instances. But to our object in bringing the meeting to our city the Home was gists. our first consideration. Let me tell Hall's Family Pills are the best von something that may lead you in to an und-retanding of the situation. The state of Pennsylvania is divided

into four districts each having a Home These are located at the following places: Meadville, Philadelphia, Ben Avon and Sunbury. In our district we have round numbers about twenty-six thousand Odd Fellows. Of this number about 12,000 belong to the Orphans' Home Association and the remainder of course do not, it being voluntary on the part of any lodge to join by payper member. And now is it not plain to you my dear reader, that if the entire membership of this district nambering twenty-six thousand men become interested in the home we will come interested in the home we will have no trouble in building new buildhave no trouble in building new build
"T am going to tell you why Cousin "Why—er—oh, we want some more Kathlyn teaches school," she said ings and equipping them and maintaining not only the sixty-seven children that we now have but increase the number to at least two hundred.

We can only accomplish this by bringing them here to see for themelves. We expect the railroad companies to convey just as many to the Home that day as can get there. The program for the day will be so arranged as to give every person ample time to get to the Home and return in time to catch the evening trains.

We want the citizens of the town to join with us in giving our visitors a splendid reception and in showing them that we have a deep interest in their work, and that we show them one of the nicest and best decorated towns they have ever visited with the association.

Open your homes to these good fellows, and make it a memorable time in their lives and ours, too, for that matter and the entire town will be the gainer by advertising and money spent. A Sunbury Odd Fellow.

### Wireless Telegraph Service.

Establi-hment of wireless telegraph service between a number of coal region towns and Philadelphia is one of the possibilities of the near future. The Philadelphia North American is back of the Enterprise. Scranton will be the first city to get the benefit of the service if it can be put into successful operation.

R. J. Beamish, the strike correspondent of the North American who spent some time in Shamokin during the last labor troubles, accompanied by C. S. Cowenhoven, representing the DeForest Wireless Telegraph Company who furnished a wireless report for the international yacht races, went to Scranton last week to look for a suitable site for the erection of a tower at that end.

The North American has a wireless station on its twenty-two story building in Philadelphia and the object of extending the service to the interior of the state is to utilize it for news and commercial purposes in which event it would supplant the telegraph wire system now an item of great ex-

pense to every metropolitan paper. It is found that wireless reports can he sent from Scranton to Philadelph a stations which will be erected at Wilkesbarre, Hazleton, Shamokin and all other important cities.

It seems to have been a blessing to Albright College to have failed to find a city willing to pay a sufficient sum to secure its removal from its present site, Myerstown.
