Aunt Sally's Conscience By CLAUDE PAMARES Copyright, 1906, by Homer Sprague

Never was there a better natured, more conscientious woman than Aunt Sally Warner, relict of Joab Warner, worked a plot. who departed this life after a fall from the roof of his barn. Aunt Sally had half a dozen nieces and nephews, and among the latter was the rollicking. frolicking Joe Henderson, who was twenty years old at the time the great calamity fell upon the house of Warner. Reference is not made to the fall onade.' from the roof of the barn, but to a calamity that overtook Aunt Sally's

One day nephew Joe, whose parents lived five or six miles away, arrived at Aunt Sally's on an errand. She was about to set out for the village of Rawsonville to do some "trading," and Joe volunteered to go along as driver of old Robbin. Aunt Sally had not been over that road for a month, and she was surprised to see circus plctures pasted up on every barn on the route. Since childhood she had had a fondness for circus plctures, but had been brought up to believe that eternal punishment awaited every one who passed the doors of the circus itself. During his lifetime Joab had dischargous hired men for staying a day off to go to the circus, and he had refused to deal with certain men who had accepted free tickets for the privilege of posting pictures on their barns. As the good aunt and her nephew jo ged along the dusty highway and cauge to barn after barn decked out in gayest colors of printer's ink Joe heard her sighing. He didn't stop to ask himself whether she was sighing over the death of Uncle seab or the fact that shuffling!"

> "TEMSE" AND "THAMES." Brigin of the Saying About Setting

the River on Fire. Sometimes when a person wants to make an unpleasant remark in a pleasant sort of way about a dull boy he will say, "That boy will never set the river on fire." Now, that is all very true, for even the smartest man in the world could never set a stream of water on fire, and so perhaps many of you who have heard this expression

have wondered what is meant by setting the river on fire. In England many, many years ago, before the millers had machinery for sifting flour, each family was obliged to sift its own flour. For doing this It was necessary to use a sieve, called a temse, which was so fixed that it could be turned round and round in the top of a barrel. If it was turned oo fast the friction would sometime ause it to catch fire, and as it was mly the smart, hardworking boys who ould make it go so fast the people
