RETURN OF SMALL

Adjutant General Thomas J. Stewart has submitted to the war department at Washington the "Return of Small Arms Firing" of the National Guard for the year 1905, the report just having been compiled.

The report shows that there are 10,

879 officers and members of the Guard, all of whom were classified, 351 as expert riflemen; 102 as sharpshooters; 3, pert riflemen; 102 as snarpshooters; 5, 280 as marksmen; 1,988 as first class men; 2,099 as second class men; 809 as third class men, and 2,250 as fourth class men. The standing of each company of the standing of each comp mand is given in the figure of merit, showing the following ratings:
General Headquarters 41.3

Division Headquarters 1st Brigade Headquarters 2d Brigade Headquarters 3d Brigade Headquarters Artillery Cavalry

1st Regiment Infantry 2d Regiment Infantry 3d Regiment Infantry 4th Regiment Infantry 5th Regiment Infantry 6th Regiment Infantry Sth Regiment Infantry 9th Regiment Infantry 10th Regiment Infantry 12th Regiment Infantry 13th Regiment Infantry 14th Regiment Infantry 16th Regiment Infantry 18th Regiment Infantry

Captain J. Beaver Gearhart is in re ceipt of a communication from Adjut ant General Stewart that commend the work done by the local command of the N. G. P. He says in part. 'After a careful comparison of th

return with the records of the adjut-ant general's office we find that every officer and enlisted man of your coinmand who was a member during the rifle practice season of 1905, May 1st o October 31st, inclusive, has been ac

"The adjutant general congratulates Captain Gearhart upon the very satis-factory manner in which the rifle practice papers have been executed and filed in this office, and also upon the excellent figure of merit obtained by his command, namely 67.80.

A Private Telephone System.

The Danville Stove and Manufacturing company has installed a tele-phone system at its plant which is proving a great convenience and time

Saver.

There are five departments in the plant of the Danville stove and manudry, shipping rooms, tin shop, and iron pattern shop. Each of these departments is more or less remote from the other and in order to communicate the other and in order to communicate the other shops. ate when desired, it was formerly necessary to do a good deal of running backwards and forwards. Now each of man or other person wanted.

The stove works is one our growing and most of prosperous industries. It is worthy of note that it is not slow in installing improvements needed. At the present time it is probably one of the best equipped plants in this sec

The private telephone system was installed by Cleaver Wagner, the ris-ing young electrician, who has charge of the clock factory.

Hotel Changes Hands.

An important business transfer was mpleted yesterday afternoon when O. R. Drumheller purchased the good will and fixtures of the [Aldine Hotel, Sunbury, from Fred Aldinger, was the proprietor and conducted the hotel ever since it was built.

The sale proved to be quite a sur-

prise and is said to have been con The exact price paid is not known but is said to be about four thousand dol-lars. The new proprietor took charge of the hotel immediately after the sale was completed.
Mr. Drumheller is the owner of the

building and as is well known is successful hotel man of many years experience. It is his intention to greatly enlarge the present building and make the Aldine a hotel second to none in this part of the State

is reported that Mr. Aldinger will likely move to Millersburg where he will erect and conduct a hotel

DEATH TRAPS. Lewisburg is the defendant in a ten thousand dollar suit brought by the family of Jesse Fetter, of Winfield. It will be remembered that Fetter was driving along the road at the Bucknel siding. At this point the road and track run side by side and his horse frightened and plunged in front of the There is every reason to be lieve that the borough will lose the case, not perhaps to the extent of the sum demanded, but the verdict will be plaintiff's favor. In and about Danville there are several traps that will sooner or later involve the parties responsible in a damage suit, and it would be well to give them attention before and not after an accident oc

Fortunate Missourians.

PATTERN HOUSE

The big fire proof building at the stove works designed to house the valuable patterns is practically completed. Today the work of removing the patterns will be begun.

When ground was broken, less than the works of the patterns will be begun.

When ground was broken, less than two months ago, J. F. Montague, who has the work in charge, declared that the building would be completed and in use before June 1st. As the sequel shows he was not over confident. While two rows of shelving remain to be installed and some work on the floor remains to be done, the building is otherwise completed. It is an odd-looking structure it is true, although admirably adopted to its purpose. It is 120 feetx36 feet, one story high, built of brick, the walls being without a single window or opening of any kind ingle window or opening of any kind with the exception of one door at the western end next to the foundry. The

BLACKSMITH'S

BAD INJURY

P. M. Kerns, the well known black smith, met with an accident Tuesday, in which he sustained a fractur of the jaw. The injury affords an instance of the irony of fate, as the accident was sustained while manipulating an invention for shoeing treacher-ous horses, the very purpose of which was to protect the blacksmith from in-jury. The accident, however, was no fault of the invention, but, as will be

een, was due to an unforeseen cir cumstance.
Ordinarily, the process of horsesho ing at the present day goes on about the same as when old men were boys; the blacksmith, taking horses as the come, unflinchingly walks up to the fidgety and nervous steed, takes up the animal's leg and—either succeeds in shoeing him or takes a header across the shop, propelled by the horse's hind

P. M. Kerns' blacksmith shop or Northumberland street seems to be the only one in which is installed stocks, a modern invention to assist in shoeing horses disposed to kick or which are otherwise apt to prove trouble-some while in the blacksmith's hands. Tuesday at Mr. Kerns' shop a crowd assembled to witness the shoeing of a

brainch of the work was in charge of Edward Yeager.

Not only will the fire proof building insure greater security to the patterns but the additional and better arrangement of space will admit of a more ment of space will admit of a more the animal, and swinging on hinges were brought together one on each side and locked together behind him enclosing the horse securely as in shafts. A wide girth was placed unshafts. A wide girth was placed under the animal; two heavy ropes, one taking the place of the breech band and the other the breast strap, were placed in position. All that remained was to apply a lever, which gave sufficient purchase to raise the horse from his feet and hold him so tight that to struggle would be futile.

The change that came over the ob-streperous horse was remarkable indeed. A restless and dangerous animal a moment before that resisted the blacksmith at every turn he now half hung and half stood helpless and apparently willing to submit to any-

An attachment in the form of an iron arm by means of a crank was next swung around and manipulated so as to lock the horse's leg, enclosing it at the fetlock, and stretching it out in proper position for shoeing. Up to this stage the horse shoer was enabled to keep at a perfectly safe distance.
All danger, now removed he successfully pared down the hoof and nailed on the shoe. The attachment for holding the leg was next adjusted on the other side and the horse's leg was se-cured. Mr. Kerns himself hadhold of the bar and was adjusting it so as to bring the anmal's leg in the proper position for shoeing, when in an unfor-tunate moment, while the bar was not securely held by the key, the stallion

securely held by the key, the starron attempted to kick, throwing the top of the bar violently outward striking Mr. Kerns on the right jaw.

The man reeled under the terrible blow and a moment later it was ascertained that his jaw was broken. Mr. tained that his jaw was broken. Mr. Kerns was taken to the office of Dr. Stock, where he received surgical aid, after which he was removed to his home on Nassau street. Mr. Kern had his leg broken a few years ago while attempting to shoe a treacherous horse. It seems too bad, indeed, that he should sustain a second injury, especially while taking every precaution to avoid accident. He will no doubt be incap acitated for business for some time.

Hargreaves' Circus.

"Of all animals that are trained for circus performances the elephant is the most intelligent." The above state-George Federhoof, aged seventy-four years, a drayman living at Montours-ville, was killed shortly after noon yesterday at the Reading railroad crossing at that place. He was warned that a train was coming by a number of the state of the Thomas Hargreaves railroad circus, which will exhibit in Bloomsburg on Saturday, May 26 and in Milton, Monday, May 28. This agent ought to know,

er. Among other things the man said: "Elephants learn with remarkable quickness and they don't show that ersion to their tricks that the anim als of the cat family exhibit. I have seen elephants practice difficult tricks voluntarily—when they didn't know anybody was around.

"About seven weeks are required to teach a lion or bear a trick, while a little longer is required to teach a leopard or a tiger."

It is the opinion of this former train-ir that the above wild animals have even more capacity for learning than the horse. He says that, while a tiger can be taught to walk upon its hind egs in three or four months, it will equire as many years to teach a horse to do the same trick.

No Crime to Kiss Girl.

In a decision rendered by Justice of the Peace Knauss, of Macungie, it was held that to kiss a girl does not constitute a crime.

The case in question was that of Rev. N. S. Hawk, formerly pastor of the East Greenville United Evangelical church, who is accused by Miss Annie Schubert, of Powder Valley. She leclared that the pastor kissed her against her will. A committee of clergymen acquitted

the pastor. He resigned, however. The congregation is divided about the matter and disruption is threatened.

less gray matter than his partner, and assumed an air of careless indifference.

Connor Monday threw some light upon their escape by telling that it was at 1 o'clock Wednesday morning that they got out of the jail.

The farmer, Batev, with whom the fugitives were talking, when the special officers, Fahey and Macken, captured them, has been arrested and held in \$1000 bail for providing Connor with a revolver. It appears he was one of the friends of Connor who had been assisting the men to get away.

Lewisburg Sued for Damages.

Lewisburg Sued for Damages.

Ringling Bros.' Excursions. Lewisburg asking damages to the amount of \$15,000 for the death of Jesse Fetter, a young man of Winfield who was ground to pieces under the wheels of a Reading freight train last who wish to go to Sunbury where this wheels of a Reading freight train last October at the university siding. Fetter met a horrible death while driving along the road on his way to Lewisburg from Winfield. He was driving in a buggy and as he neared the university siding a southbound freight on the Reading caused his horse to plunge down a small embankment onto the track under the wheels of the train. Fetter was so badly injured that he died at the Sunbury hospital. The plaintiff contends that the borough of Lewisburg is negligent in permitting such a dangerous driveway to exist without guards or any protection. That when the railroad was constructed through that section it encroached ed through that section it encroached upon the public road, which was nevage arial line, together with fifty famous er widened, permitting a dangerous clowns and hundreds of lesser lights. condition to exist. At that point the public road is on the right of way of the railroad and is not protected by any guard railings, which decisions of season is greatly enlarged by the any guard railings, which decisions of the courts insist are necessary.

REMOVING A LANDMARK
Hon. R.S. Ammerman has broken ground for a fine barn on the rear of his lot, on Library avenue, to replace the old frame structure that formerly occupied that site.

The new building will be of brick, two stories high, 35x22 feet and will contain beside stable room, an apartment for vehicles. A large number of brick of first quality are on the ground, while a portion of the stable foundation is already laid.

The fine barn will add to appearances along Library avenue, every building of which is clearly in view from Mill street.

Old landmarks are apt to be chervised and season is greatly enlarged by the spectacular production of The Field of the Cloth of Gold, a pantominic presentation of the well known and beautiful historical meeting between the young Kings of England and France. The vast menagerie has among hundreds of features the only living pair of giraffes, the first baby elephant successfully bred and reared in America and the only rhinoceros in captivity. There is a gorgeous revival of the Roman hippodrome races, and many other stupendous features in this great circus. Circus day opens with a brilliant street parade, three miles in length. Don't fail to see it.

IN NEW ORLEANS.

Sam Rebman has just returned from a five weeks' business trip, which ex-

from Mill street.

Old landmarks are apt to be cherished with fond sentiment by some people, but the older the buildings become the less sightly, they appear to the commentation of the less sightly, they appear to the commentation of the less sightly, they appear to the commentation of the less sightly, they appear to the commentation of the pavement. The street was throughout was through with pedestrians, and it was only a few moments until some men took in the situation and succeeded in unhitching the horse. The analysis of the pavement of the paveme people, but the older the buildings become the less sightly they appear to the great mass of humanity and the more they are aptito detract from the value of surrounding property. There are a great many of these landmarks about Danville in the shape of old barns, some of which are in the very verge of tumbling down. The best the owners can do is to imitate Mr. Ammermerman's example and get rid of them as soon as possible.

Birthday Surprise Party.

The home of Mrs. Elizabeth Roat, of Riverside, was the scene of a pleasant surprise party on Saturday last given the less sightly they appear to the deal star south as New Orleans, the marked changes which are noted in a long journey southward from this latitude to the Gulf of Mexico. While frost and ice are still among the possibilities here in New Orleans, he said, they have already had seven weeks of midsummer weather with mercury in the nine-ties. Grain is ripening in the southern the southern limit of the wheat belt, but as far south as New Orleans, wheat, rye, dec., are not factors, cotton being the ruling commodity among the products of the soil. According to Mr. Rebman's describing to some did in unhitching the horse. The animal soon recovered. The excitement attracted a large crowd of people.

Buried at Mt. Vernon.

Miss Mary H. Hoffman, agd 14 years, whose death occurred near Berwick, was consigned to the grave at Mt. Vernon cemetery on Saturday. The remains were brought to South Danville on the 12:10 train, the funeral proceeding to the soil. According to Mr. Rebman's describing to some two years and the grave at Mt. Vernon cemetery on Saturday. The remains were brought to South Danville on the soil of the soil. According to Mr. Rebman's describing to some two southward from this latitude to the Gulf of Mexico. While frost and ice are still among the possibilities here in New Orleans, whose death occurred near Berwick, was consigned to the grave at Mt. Vernon cemetery on Saturday. The remains were brought to South Danville on the first and the south of the

ble still more ancient and out of date. This is true not only of the furniture in private dwellings but also of the fixtures and appointments of public houses. There is by no means a lack of comfort in the city, however, and from city is no doubt very homelike and in riting. The effect of it all on a hustling northern man is to produce a feelfeel that he is out of the race.

Pleasant Surprise Party.

A very pleasant surprise party was ven at the home of Mr. and Mrs. W Steinman in Liberty township, Satrday evening, in honor of Mrs. Stein- at Paules & Co., Drug store. man's thirty-ninth birthday. A very bleasant time was enjoyed by all; the pleasant time was enjoyed by all; the evening was spent in social chat, music and merry games by the young folks. Refreshments were served after which all left for their homes. Those present were: Rev. and Mrs. Philips, Mr. and Mrs. W. J. Messersmith, of Washingtonville; Misses Mary and Vernie Zartman, of Billmeyer's Park; Mr. and Mrs. Samuel Hoy, of Milton; Mr. Norman Brofee, of Catawissa; Mr. and Mrs. Harry Hoy. There is surely no dearth of Demo-cratic candidates this year.

TO ASSIST

THE VETERANS

The Sons of Veterans all over the union this year, are coming to the front in a very prominent way to carry out one of the purposes of the order, which is "to honor the memory of the heroic dead, through historical exercises

ercises at the cemetery. They are comrades Patton, Oswald, Roberts, Aten, Wertman, Strickland, Gardner and Mottern. Frank Garrow has been appointed as bugler and he will sound taps at the cemetery on memorial day, will be uniformed and fully equipped. The above sons of veterans, who will actively participate on memorial day, will be uniformed and fully equipped. The ranks of the G. A. R. are each year becoming thinner, while those who survive are less able to bear the least and burden of the day With each least and burde

eat and burden of the day. With each foot but seemingly abandoned some memorial day from now on there will be more and more for the sons of veterans to do. Appreciating this fact by or quite all the bodies that relate be more and more for the sons of veterans to do. Appreciating this fact the members of Colonel Eckman camp the members of Colonel Eckman camp intimately to people living hereabout have been removed and interred in other cemeteries. Those which remain

permanance and prosperity.

The local camp was organized some The local camp was organized something over a year ago and has forty-five members, which is much too small, considering that there are in Danville and immediate vicinity much over three hundred eligibles. The purposes of the order could not be more noble and patriotic. Briefly set forth they are as follows:

To perpetuate the sacrifices of fathers and their services in maintaining the Union.

To inculcate patriotism: to teach.

Council Friday night, took no see

To inculcate patriotism; to teach

To inculcate patriotism; to teach truthful history and to spread and sustain the doctrine of equal rights, universal liberty and justice to all.

To help the members of the G. A. R. and all honorably discharged Union soldiers, sailors and marines; to extend aid and protection to their wideless and or plans. To aid and assist ows and orphans. To aid and assist worthy and needy members of the

sons of veterans.

To be eligible, a person must be a male descendant through paternal or maternal line, not less than 18 years of age, of soldiers sailors and marines who were regularly mustered and served honorably in or who were honor ably discharged from the army or the navy of the United States during the

war of 1861-5. F. M. Herrington is commander and Fred Roberts is secretary of Colone Eckman camp, Sons of Veterans.

Horse Causes Excitement.

A horse belonging to John Dyer, who resides above town, was selzed with an attack of colic Saturday night and caused much excitement. The animal was tied in front of Phillips' grocery, when all of a sudden it seemed to drop to the pavement. The street

SALT METHODS.

they can to achieve the desired end, In the Marshes of the Kongo and at Utah's Great Lake.

One of the sights of the Great Salt lake of Utah, developed by the progress of scientific industry, is the system of immense salt making ponds on the shore of the lake. At Saltair the The Trembling Pillar at Reims a lake water is pumped into a great settling basin, where the impurities fall to the bottom and, containing much to the bottom and, containing much The famous trembling pillar at Reims presents a curious problem to architects. The Church of St. Nicaise is surrounded with pillars constructed to prevent the walls from straining. At the entrance of the church is a bell tower. On one of the bells in this tower the phenomenon of the trembling of the phenomenon of the phenomenon of the trembling of the phenomenon of the phenomenon of the trembling of the phenomenon of the phenomen pillar depends. When this bell is rung harvest begins. The water having disor even touched the top of this pillar appeared, a dazzling layer of salt two or three inches thick is found covering It goes and returns about seven the bottom of the ponds, which is broinches on each side, although the base ken up with plows before being con-of the pillar is immovable, and the veyed to the mills, where the final stones are so firmly cemented that it crushing and winnowing are done.

In general the salt marshes of the An authority who states that no Kongo region represent a kind of pocksatisfactory solution of this peculiarity | et or rift in the soil. They are to be has been gives writes: "What is very found in considerable numbers in the singular is that, although the four bells district of Sambalt, and there are also are about the same distance from the many of these marshes on the left trembling pillar, only one of them has any effect on it. The others may be of the rift show first a layer of blackrung singly or all together without ish clay mixed with sand and containmoving it."

In 1775 a little window was made in bles or more exceptionally black and the roof of the church opposite the pillar. A board was placed on top of the pillar, and on it were put two glasses fied and gray blue schist. The soil of of water. Then the bell was rung. Im- the depression also contains schist as mediately the pillar began to sway, and | the greater constituent and is covered it the fifth stroke of the bell the two collect the salt the natives dig a fun-The ringing of this bell has no effect | nel shaped hole from six to ten feet deep. The cavity soon fills up with a on the pillars between the phenomenal warm and clear water, which is up with considerable pressure, and the movable, and some years ago the one liquid seems to boil. The salt is partly precipitated at the bottom of the cavity and mixes with the soil to form a blackish mud. The latter is washed out with hot water to extract the salt, which is then crystallized from the solution. The product which is thus obtained is of a salty gray color, and its

taste is more alkaline than that of Eu-

The Papal Tiara. According to Brewer, the tiara of the pope is a composite emblem. The primary meaning is purity and chastity, the foundation and lining of the crown being of the finest linen. The gold band denotes supremacy. The first cap of dignity was adopted by Pope Damascus II. in 1048. The cap was surmounted with a high coronet in 1295 by Boniface VIII. The second oronet was added in 1335 by Benedict XII. to indicate the prerogatives of spiritual and temporal power combined n the papacy. The third coronet is inlicative of the Trinity, but it is not known who first adopted it.
