READY TO

The Farmers' Mutual Telephone com pany representing a wholly independent line in West Hemlock township, which has been alluded to before it these columns, is now an assured thing and is rapidly approaching comple

C. F. Styer, one of the leading was in this city and took along home graduating class on commencement. with him a load of the 'phones required to equip the line. The independent line will be in working order in a thirteen members, the line extending from the Forks to Kaseville, thence to Hill farm, a distance of six miles in farm, about half a mile from that Maus and P. S. Brugler.

The poles, with the exception of six, are erected on the main line and things are now practically ready for stringing the wire. Mr. Styer last even-The subscribers are all full of enthusi asm and are looking forward to happier days ahead when a telephone i installed in each of their homes.

Fortunate Missourians.

"When I was a druggist, at Livonia, Mo.," writes T. J. Dwyer, now of Graysville, Mo., "three of my customers were permanently cured of consumption by Dr. King's New Discovery, and are well and strong to day. One was trying to sell his property and move to Arizona but after using New Discovery a short time he found it unnecessary to do so. I regard Dr. King's New Liscovery as the most wonderful medicine in existence." Surest Cough and Cold cure and Throat and lung healer. Guarante ed by Paules & Co., Druggists 50c and \$1.00. Trial bottle free

THE PACE AND THE INCOME.

According to the Williamsport News, they have a number of young men in Williamsport who are trying to go an automobile pace on a wheelbarrow income. Which reminds us of the young fellow who ascribed his fall and disgrace to the fact that he had been educated to a champagne appetite with a lager beer income. All such are bound to fall into grievous

Electric Railroads.

It is estimated that \$500,0000.00 have been appropriated by the various railroad companies throughout this country to be used in the purchase of elec trical machinery, which, it is believed will eventually replace the steam locomotives. Railroad companies have interested themselves in the operation of has been no change in the motive that the electric motors will be used next month will test two electric engines on the steep grades between Gallitzin and Altoona, and if they are successful there, it is believed that a change in motive power will be made on the Pittsburg division, especially in the mountain district. Every year since 1888 has witnessed new developments in and new triumphs for electricity, and as every new electrical triumph meant another encroachmen upon the steam locomotive at last th railroad companies have been force to take notice. The number of electric roads has been greatly increased, and practically every trunk line railroad company has already begun the installation of electricity on its lines or making preparations to take this step in the immediate future.

All Alumni Invited.

On account of not being able to procure a complete list, invitations to Thursday evening's dance were no ent to all the alumni. The committee desires that all alumni of the high school take this notice as an invita-tion to attend the assembly.

chronic indigestion and dyspepsia by the use of KODOL FOR DYSPEPSIA. Some of the most hopeless cases of long standing have yielded to it. It enables you to digest the food you eat and ex-ercises a corrective influence, building up the efficiency of the digestive organs The stomach is the boiler wherein the steam is made that keeps up your vitality health and strength. Kodol digests what you eat. Makes the stomach

SCHOOL YEAR NEAR A CLOSE

But one week remains of the present school year. When the school board has filed its separate answer to the adjourned Monday it was with the suit instituted by the State at the inpurpose of reconvening next Monday night, when after the usual routine of organizations of traveling men to combusiness incidental to winding up af- pel it to show cause why it retains \$10 fairs for the year the new members on a thousand mile rebate book for will be sworn in. Terms this spring which the purchaser pays \$30, getting expire as follows: First ward, Robert back the \$10 when he returns the cov-Adams; second ward, J. N. Pursel; er of the book. The answer admits that the company Third ward, Sam'l Werkheiser; Fourth is a common carrier and accepted the ward, Jacob VonBlohn. Mr. Adams will be succeeded by J. W. Swartz; Mr. Werkheiser by Jacob Fish; Mr.

ceds himself. On motion of Mr. Pursel it was sign the application of J. W. Taylor, principal of the high school, for a required, that he has taught one year successfully and is a person of good

sel was reelected and therefore suc

On motion the school board granted intendent Gordy for next week to enable him to act as a member of the board of examiners at the West Chester normal school, a position to which he has been appointed by the State superintendent.

Borough Superintendent Gordy on behalf of the corps of teachers presented a petition to the board asking that the school term next fall commence on Tuesday, September 4th, immediately after Labor day, instead of on August 27th. On motion the matter was laid the new school board.

eided to tender a vote of thanks to Rev. L. D. Ulrich for preaching the baccalaureate sermon and to Hon. Fred

Borough Superintendent Gordy pre sented his report of the last month of school, which showed an attendance very short time. The company has of 1297, during the term to date. The number of boys registered during the last month was 547; of girls, 591. C. F. Styer's place, known as Clover Total, 1138. Number of pupils not absent during term to date, 163; number all. Before reaching the Clover Hill of pupils not tardy, 627. Number of tion of itself and the general traveling pupils absent during month, 409: num- public. point, a branch runs off eastward one ber of pupils tardy during month, 159. mile, taking in the farms of Augusta Cases of tardiness by pupils, 250. Number of pupils who have not at tended 75 per cent. of time belonged, 44; number of pupils reported by truant officer, 24; cases of corporal pun-

shment, 5.
The borough superintendent reporting stated that it is the intention of the Farmers' Mutual company at the Forks to connect with one of the wires of the United Telephone company and to come into Danville in that way.

The borough superintendent reported that the three members of the senior class conditioned had passed the examination with the following result:

Mr. Kostenbauder, 81; Miss Payton, 84; Miss Jenkins, 83. Fifteen students, which is the whole number attending the high school were observed. ber attending the high school were ob liged to take examinations. Of this number seven failed.

The following members were present: Adams, Orth, Burns, Pursel, Haring, Werkheiser, Fischer, Trumbower and Heiss.

Through Coaches on Pennsy.

The Pennsylvania Railroad company s transferring a through passenger & Co. oach to Wilkes-Barre off of the news express which arrives in Sunbury from Philadelphia at 9:40 a. m. Also from the passenger train which passes train leaving Sunbury for Philadelphia at 5:10 p. m. This is a great conrenience for through passengers, elimnating the change at Sunbury.

Postmaster Robbed.

G. W. Fouts, Postmaster at Riverton Ia., nearly lost his life and was robbed of all comfort, according to his letter which says: "For 20 years I had chronic liver complaint, which led to such a se vere case of jaundice that even my finger nails turned yellow; when my doctor prescribed Electric Bitters; which cured me and have kept me well for eleven years." Sure cure for Biliousness, Neuralgia. Weakness and all Stomach. Liv er, Kidney and Bladder derangements. A wonderful Tonic. At Paules & Co. Drug store. 50 cents.

Crowds Going to the Circus. Intense interest has been aroused in his community by the announcement that Ringling Brothers' immense circus is to exhibit in Sunbury on Friday, June 1st. Several big excursions will go from this vicinity and local people will be well respresented at the big show. Those who go from here electric locomotives, and while there should make every effort to arrive in time to see the magnificent new free power in this district, it is believed street parade, which is given in the morning preceding the opening perforhere before long. The Pennsylvania mance. Three miles of parade glories are divided into thirty sections and parade such as the world has never seen before. In this wonderful display are shown 100 beautiful dens, lairs and cages of rare wild animals, a herd of forty big and little elephants, 650 orses, and 1280 people. One section of the procession is devoted to magnificent and costly floats, representing Germany, Russia, England, France, India, Persia, Scotland, the United States, and other countries. The performance that follows, and which includes the superb spectacular producion of The Field of the Cloth of Gold, is the most magnificent display of arenic wonders ever presented by any amusement enterprise in America. The menagerie is filled to overflowing with rare beasts and birds, including the only baby elephant bred and successfully raised in the United States. the only rhinoceros in captivity and the last living pair of giraffes.

GRADUATES RECEIVE 'DIPLOMAS

Diplomas Friday eve were present the twenty-seven graduates of the high school composing the class of 1906 Commencement this year was unique. Instead of holding the exercises in the opera house, as had been done for many years, the court house was used. Class day, which resulted was used. Class day, which resulted in cutting the long program in half that formerly occupied several hours in the evening, was also something new. It is gratifying that each departure was a success and that com-mencement passed off without a hitch of any sort or the occurrence single circumstance to mar the plea-

ure of the event.
The court room was rendered attractive by appropriate decorations. The Christmas eve, when he had slipped the bar was draped with heavy folds of ring upon her finger and had assured the class pennant was spread upon the wall above the main entrance. A profusion of palms, ferns and roses grouped about the bar added much to the

The address to the graduates by Hon. Fred Ikeler was a masterpiece.

No greater display of eloquence has been heard in Danville for some time. The address revealed remarkable pentage is the second property and there were still half a dozen guests at the etration, keen moral perception and sound logic, while the conclusions reached could not but appeal to every

person present.
In his address Mr. Ikeler dwelt on the principles that govern and mould the life of young people. The time was, he said, when only the poor over Jordan's shortcomings that he and the ignorant worked. Today great burdens rest on all men; today from the poor mechanic to the head of great corporations, to the millionaire him-

work at. We are best fitted for that Can you let me have \$20? There is no work at. We are bose live. If we love our work for the work's sake we have chosen wisely. We must be sure, though, that we are not in love with the reward of any line of work but with the duties of that calling.

The second thought is: How shall

we work? Work conscientiously and thoroughly, adopting as a fundamental principle always to do more and always a little better than is required of us. We should never be satisfied until we have given the world the very best that God has given us.

Never work with the mere hope of

receiving reward, but with the thought: How much can I put in the work? Take care of that end of the proposition and the world will take care of the other end. Do your work well and the reward will come.

Mr. Ikeler with all the force and the eloquence at his command illustrated

every point, citing example after ex to prove that only those succeed in life who have wisely chosen their calling, who are conscientious and thorough and whose soul is in their work.

SALT METHODS.

In the Marshes of the Kongo and at Utah's Great Lake.

One of the sights of the Great Salt tale of Utah, developed by the progress of scientific industry, is the sysem of immense salt making ponds on the shore of the lake. At Saltair the lake water is pumped into a great settling basin, where the impurities fall to the bottom and, containing much fron, form a reddish deposit, From this basin the water is drawn off into "harvesting ponds" averaging 90,000 square yards in area and six inches in depth. The ponds are kept supplied with water, as the evaporation goes on from May to September, when the salt harvest begins. The water having disappeared, a dazzling layer of salt two or three inches thick is found covering he placed it under the bees and coolly Philippine islands, on the steamship the bottom of the ponds, which is brothere veyed to the mills, where the final

dlent spirits and after ther day's rest et or rift in the soil. They are to be and recreation resumed her long jour- found in considerable numbers in the district of Sambalt, and there are also The letter states that following the many of these marshes on the left earthquake at San Francisco, due to damage wrought to the cable, Honolu- of the rift show first a layer of blackish clay mixed with sand and containing numerous quartz and silex pebbles or more exceptionally black and white shells, fragments of oyster and mussel. Then comes a layer of stratified and gray blue schist. The soil of the depression also contains schist as the greater constituent and is covered by a layer of sandy clay. In order to collect the salt the natives dig a funnel shaped hole from six to ten feet deep. The cavity soon fills up with a try the boys, but most of them went ance seem to lie in the tail of the cat." warm and clear water, which is strongly charged with salt. It comes up with considerable pressure, and the liquid seems to boil. The salt is partly that he had not even had time to send precipitated at the bottom of the cavity and mixes with the soil to form a blackish mud. The latter is washed out with hot water to extract the salt, which is then crystallized from the solution. The product which is thus obtained is of a salty gray color, and its taste is more alkaline than that of Eu-

ropean salt.

Origin of City Plans. Ali cities, with few exceptions, trace the origin of their plan to the inclosed camp, and many still show marked features of primitive fortifications. In The landlord could not cash him a all early scheme for defense the inclosed square was considered the best, From the time when wagons were castle the dingy room, with its sheet merely parked on the plain to the time | iron stove and florid wall paper, seemwhen buildings were constructed with ed intolerable, but it was better than blank walls to the enemy, and their wandering around town and perhaps facades to the open square, this plan has been universally adopted, and many of the great squares or market | Jordan appeared less formidable than places of great cities still show unde- he had, and Pellham began to feel unniable evidences of these precautions comfortably like a fool. The question with the graduate is laughed. "I came to the station and not, shall I work, but what shall I never realized that I was a pauper. laughed. "I came to the station and time to send back to Carver castle."

Pellham performed a lightning calculation. His ticket had cost him \$8.40. That from \$20 left \$11.60. It would never do to confess that he did not have it. Fay would gloat over the fact that she had caught Bob Pellham penniless. He raised his hat.

"Certainly," he said. "Wait here and I will purchase your ticket and look after your trunk He stepped into the waiting room

company to town." she said. Bob colored. "I've changed my mind." he explained. "I'm not going to town this morning. May wait until the last train." "I will have father send a check to

your club," she smiled as the train came in and he saw her settled in the chair car. "I suppose I shall see you at Collins' Monday?" "Surely," he smiled as he raised his hat and made for the platform, but as The look of pained surprise on the the train grew smaller in the distance he became less confident. It was Saturday afternoon. He could not wire to his office for money. They closed at noon, and it was 11 now. He might out of town over Sunday. In any event, he should hate to explain that he had left the Carvers in such a hurry for funds. He made his way to the little hotel, where the landlord's curious glances made him realize that the transfer to the hotel would excite curiosity.

He began to feel that he had acted very foolishly. If he had confessed to prevent the walls from straining. At Fay that he only had \$10-that would have taken her to town-or told her to send up to Carver's and have taken the next train! Now it looked as if he should have to stay in the town over

check, so he took a room and made his way to it. After the comfort of Carver running into Frank Jordan.

Somehow, as the afternoon passed, found them in the music room and Jor He had refused to believe her prom

There is no time to consider the comnonplace things of life when one has just lost the girl he loves, and all would have been well enough had he not

feared Fay Gressit's ridicule. He made a pretense of reading a book he found in his hand bag, but he could not interest himself in the story and long before the dusk began to close in he was thoroughly miserable.

He welcomed a knock at the door. It could only be the porter with coal or feet). Common ocean water contains the chambermaid with towels, but but 30 parts of salt to the 1,000. Those somehow he felt as if he had been stranded on a desert Island, and he velcomed the advent of any one. He sprang to his feet as he cried "Come " and confronted Frank Jordan.

You will pardon my breaking in upon your solitude," began Jordan, "but "How did you know I was here?" he

"Miss Gressit sent a telegram warning us that you were still in town and ready to admit.

-rrave you the telegram?" asked Bob. dan shook his head.

"Miss Carver has that. She just asked me to look you up. I say, old chap, I feel awfally cut up over last night. There really was nothing to it. Of course I know how you feel. When a fellow is first engaged he is jealous of the rest of mankind. Good Lord, when I was first engaged to Fay I used to be

jealous even of her riding master. "You engaged to Fay Gressit?" shouted Bob. "I thought you were—well, in-

"Sure I'm interested," agreed Jordan. "She's been a sort of fairy godmother

"I suppose everybody is laughing at my staying behind," said Pellham

"Don't know anything about it," declared Jordan. "I can let you have what you need and you can go right on to town or you can come back with me and simply explain that you changed your mind. If I were you I'd go back. Alice says you have a ring that belongs

"I'll go," said Bob. "Help me get these things together." : Some hours later Bob and Alice sat

in the music room while Jordan was doing his best to hold the rest of the crowd in the library with parlor magic. "I'm awfully glad you came back," whispered Alice as she slipped her hand the one with the ring on it-into his. I think Fay is the smartest girl I know."

"But what made her think I was go-"I'm in the most awful fix," she I was going down on the next train." "She saw you buy your ticket and

that there was only the one bill in your purse. She knew that if you stayed ver there would be a chance for an explanation, so she borrowed every cent you had and telegraphed us from the next stop just what she had done.' "I think," said Pellham slowly, "that I owe Fay a great deal more than she owes me

"I should hope," said Alice, "that you value me at more than \$20." "Dear," he whispered, "you are with out price.

"Without money and without price," she quoted. "You without the money and I without the price."

ple to carry needles, pins, bullets and bits of steel around with them for half a lifetime, but no one can be found who would be willing voluntarily to undertake such a burden. And yet there are instances where articles which might seem to be of a most dangerous character have been carried in the body for years. A man, in repairing a building, fell through a window, breaking the glass and severely cutting

one of his arms. The wound was carefully and antiseptically dressed, and the man went about his business. Three years later he called upon the doctor who had attended him and complained of a boil on his wrist. The physician casually mentioned the injury which he had sustained and asked nim if he suffered any inconvenience from it. He answered, "No, not much," but said that at times there was a peculiar sensation between the elbow and shoulder. Upon examination the doctor found a long splinter of glass just ready to prick through the skin at a point several inches above the place where it had originally entered. The

annoying sharp pains to which he had for years been subject.

"I haven't cut off any cats' tails, but an accident deprived our cat of its caudal appendage. The feline became as helpless as a ship without a rudder. When it tried to spring upon an object it would alight far to one side cat's features was pathetic. After awhile it learned to jump straight again, but it was a long and painful experience for the poor cat. The balance of power and the power to bal-

-Kansas City Times. A CURIOUS PROBLEM.

The Trembling Pillar at Reims & Puzzle to Architects.

The famous trembling pillar at Reims presents a curious problem to architects. The Church of St. Nicaise is surrounded with pillars constructed to the entrance of the church is a bell tower. On one of the bells in this tower the phenomenon of the trembling pillar depends. When this bell is rung or even touched the top of this pillar

It goes and returns about seven inches on each side, although the base of the pillar is immovable, and the stones are so firmly cemented that it seems like a solid piece of stone. An authority who states that no

has been gives writes: "What is very singular is that, although the four bells are about the same distance from the trembling pillar, only one of them has any effect on it. The others may be rung singly or all together without noving it. In 1775 a little window was made in ne roof of the church opposite the pil-

ar. A board was placed on top of the

pillar, and on it were put two glasses

atisfactory solution of this peculiarity

of water. Then the bell was rung. Imaediately the pillar began to sway, and t the fifth stroke of the bell the two lasses were thrown off. The ringing of this bell has no effect the pillars between the phenomenal ne and the tower nor on any of the thers, but formerly it was the first pil-

ar which swayed, then it became im

novable, and some years ago the one next to it became the eccentric one. The Saltiest of the Salt Seas. Some idea of the saltness of the waters of the Dead sea may be gained from the comparison made below. The
