REPUBLICAN STATE TICKET.

For Governor, EDWIN S. STUART, of Philadelphia.

For Lieutenant Governor, ROBERT S. MURPHY, of Cambria For Auditor General.

ROBERT K. YOUNG, of Tioga. For Secretary of Internal Affairs, HENRY HOUCK, of Lebanon,

Announcement.

I hereby announce myself as a can didate for the office of Associate Judge. subject to the decision of the Republi can Primary election.

> CHARLES A. WAGNER, Ottawa, Pa

THE PECTORAL FINS.

Without Them the Fish Would Stand on Its Head.

The pectoral fins of a fish are the two fins, one on each side, just back of the head. These fins aid the fish to some extent in swimming. They are small oars which the fish feathers very beautifully and are of value chiefly to preserve its equilibrium. It is with these fins that the fish maintains its horizontal position in the water when not Without them the fish would stand on its head. Sometimes a fish loses one or both of its pectoral fins by disease or by accident. A fish without pectoral fins is in a bad way.

While most fishes keep a horizontal position in the water when not swimming, there are fishes that do not. One of these fishes is the filefish, which when motionless suspends itself in the water head downward, at an angle of forty-five degrees or even nearer the perpendicular. A filefish kept in an aquarium which had lost both its pectoral fins inclined over backward past the perpendicular when motionless to about the same angle that it would have kept in the other direction if its pectoral fins had been intact, so that when not in motion it seemed to be lying at an angle on its back.

In the same aquarium there was a and a half, one of whose pectoral fins was attacked at the tip by fungus, which gradually encroached upon it. Finally the diseased portions of the fin were cut off with a pair of sharp shears, the cut being made within the sound a course. But it soon accustomed itto its new condition, and thereafter it got along very comfortably.

origin of "Se Long."

"You have perhaps wondered how the expression 'so long' came to be so generally used by the American people," said a Columbia college lecturer the other day. "It is usually used in closing a conversation and is simply a form of 'goodby.' The Norwegians brought it to this country. In that Land of the Midnight Sun 'saa laenge' is a common form of farewell. It means the same as the 'auf wiedersehen' of the German or the 'au revoir' of the French. Among the early settlers in America were many Norwegians, and the phrase was picked up from them. They pronounce it with the g softened and accompany it by a wave of the hand."

The ideal camera for naturalist puris one of the reflex type, in which the photographer can see his objectthe size of it will be reproduced on his plate, the right way up-and can see it until the moment of exposure. Such a camera with a long bellows and a lens which is intended for a plate at least one size larger than the plate he is using in his camera and also provided with a curtain shutter which works just in front of the plate, with speeds varying from a time exposure up to one two-thousandth part of a second, is the kind of instrument used by most of the naturalist photogra-

Officially Confirmed.

The Washington correspondent hastily called up the cabinet officer by tele

phers whose work appears in print .-

"Pardon me for disturbing you. Mr Blank," he said, "but will you please tell me whether or not the rumor that is in circulation as to your retirement

"Yes, sir," answered the cabinet officer. "It is. I was just about to retire when you called me. Good night.' -Chicago Tribune.

A Shortened Courtship. "Sir, I understand there is a sort of

a courtship on between you and my daughter?" "Yes, sir; I"

"Well, I don't approve of it; cut it

short!" And that night the young man eloped with the object of his affections .-Houston Post.

Mushrooms. An enthusiast on the subject of mush rooms says there is no more reason to mistake a good mushroom for a poisonous toadstool than to confound nightshade with huckleberries. The distinctions are clear and simple and eastly learned. Real mushrooms ar known by their beautiful pink gills not reaching the stem, which stem carries a well marked white woolly ring; by the very fleshy down covered top delicious and enticing fragrance, the firm, white flesh, sometimes inclined to pink when cut or broken One or two rules in regard to gathering mushrooms, we are told, will remove all the peril from the pursuit of them Examine carefully every specimen you gather. If at all doubtful, throw !

away. Show it to somebody that Never cook mushrooms unless you know they are gathered by home of the groom's sister at 8 o'clock. A Serious Threat. Stutts (who stammers)—Miss D-D-Dimple—D-D-Dollie! MONTOUR AMERIGAN CHILD'S BODY NOT IDENTIFIED

Chief-of-Police Clifford, of Wilkes-Barre, went to Berwick yesterday morning bringing with him the supposed mother of the child that was found in the river near Mifflinville Tuesday afternoon. The woman upon viewing the remains denied that it was the body of her babe.

When the woman viewed the body he displayed not the least emotion, and declared that it was not her child, as it was larger than her babe. The authorities believe the child is her's, however, and attribute its size to its being bloated from being in the water since Friday.

The jury that had been empaneled neard the testimony of Dr. Hensyl, of Berwick yesterday afternoon at 4:30 train, expecting to meet her hostess at 'clock, but rendered no verdict. He had performed an autopsy, and stated that it was his opinion that the child was dead before it was thrown into the river. It therefore devolved upon Briar creek township to bury the remains, which was accordingly done last evening.

Frazier Farm Was Not Sold.

One of the biggest crowds that ever striped bass weighing about a pound gathered at a public sale in Montour county was present yesterday when the fine Frazier farm near Washingtonville was put under the hammer.

The farm was not sold however. It was bid up to \$10,700 by Clarence part of the fin. At first the fish was Campbell, but the owners refused to like a man in a boat pulling one long let the property go for that price. All oar and one short one-it couldn't hold the other articles were sold, including 5 prime horses, stock, farming implements, etc.

Some idea of the enormous crowd that was present can be gathered when it is stated that nearly 500 wagons and carriages were tied near the scene of the sale.

Quietly she stepped into the privileges of the said act of assembly

THE AMERICAN FEELING. Loyalty to the Principles of Self

Government. Every American should realize that the principle of self government is a higher principle than that of loyalty to best sovereign, for it is fidelity to the highest good of all and to virtue, intelligence and God. He who shares in the government gains in moral dignity. His manhood is developed by re sponsibility. He loves and will maintain a government in which his own will and intelligent choice are involved. He will feel that upon his single arm, his single voice, his single life, hangs preservation of the government and the national freedom. This is the American feeling. It burns in every

England is the only truly free country of the old world, and the Englishman is a free man; but our glory is that humanity itself, one and indivisible, may rise to a higher plane with deringly. In English prose and poetry the thought is of the most importance and the form of expression is but secondary. In chanting and in music the thought is subordinated to the form, and in these forms of expression the rhythm is much more prominent than in prose or poetry. It is aesthetically displeasing to have too much made of rhythm in reading prose and poetry, but the highest manifestations of art are present when the rhythmical form is used to express the thought. We do not like to have that which is most important subordinated to the less important, but our aesthetic natures crave rhythm, and when the best expression of thought coincides with the production of rhythm we respond at once with enthusiastic approval.-Walter Dill Scott in Talent.

Birds as Workers. Birds can and do work far harder than human beings. A pair of house martins when nesting will feed their and offensive allusion to Mrs. Taylor. THE GAME OF DRAUGHTS.

So Old That Its Origin Is Lost In the Mists of Antiquity.

Draughts in some shape or form is doubtless a very ancient pastime. In deed, the safest thing to say about it is that its origin is lost in the mists of antiquity. Representations of persons playing at a game resembling draughts are frequently found on ancient Egyptian monuments at least 3,000 years old. The Greeks had a similar game from whom possibly it passed to the Romans. At least the old Roman game of latrunculi seems to have been a kind of draughts, though it is doubtful if the game as now played is very ancient. The game was popular and well known in France and Spain in the seventeenth century and was probably played there and in England centuries before that. That it was from France the game came into many of the other countries is evident from the fact that the French name-jeu de dames-passed with it, Dam or damme was once the regular Germany the game is still called dame

Work and Pay of the Girl Behind the Counter.

40 men.-Chambers' Journal.

Promotion is very slow in a department store. A girl may enter a store at \$6 a week and, after five or six or seven years, receive an advance of \$1 a week if she puts up a pretty stiff fight and is a valuable saleswoman.

Her work is not the dull grind it might be supposed. The hours are long, it is true, but the continual procession of humanity which files before her lends interest and a certain kind of excitement to every hour. Human nature is wonderfully facile in its disclosures, and the shopgirl who has two ideas in her head and keeps her wits about her very soon learns the difference between the real lady and the spurious article. She learns to know at a glance whether her customer is likely to order a box of hairpins or a spool of thread sent home, miles away, by the delivery wagon, or it may be high priced goods ordered to be sent C. O. D. to a locality which does not contain a residence street. These a girl quietly replaced on a shelf one day and to my inquiring look replied: "She never expected to pay for those things, but she felt ashamed to have taken up so much of my time without buying anything. Oh, yes, it often happens, but we soon know how to size 'em up!"-Mary Rankin Cran-

How Snakes Move and Climb. The vertebrae of a snake are fitted together by a kind of ball and socket articulation, which, however, is capa-

ble of only lateral or side to side mo tion. A snake moves by propelling himself on the points of his scales, which, to him, answer the purpose of ribs. A snake does not climb a tree or a bush by coiling around it, as most people who have not investigated the matter believe, but by balancing himself very evenly and holding on with the points and edges of his scales. A snake on a pane of glass or other polished surface where the scales cannot take hold is almost perfectly helpless. True In Both Cases.

"There are many stars that are never een." said the astronomer reflectively. "Yes, and there are a lot that never ought to be seen, too," returned the theatrical manager, with some empha
