ENGRAVED PICTURES.

Their Romantic Origin Dates Back to

the Fifteenth Century. The art of engraved pictures dates its romantic origin to the chamber of a Florentine goldsmith, Maso Finiguerra, in the fifteenth century, about the time that Gutenberg was struggling with his printing from movable types. Before that day pictures were drawn or painted by hand. Finiguerra was a celebrated worker in metals, and, being commissioned to make a pax of gold engraved with a coronation of the Virgin, he sought to test his design by 1.20 filling in the lines with a preparation 19.06 of oil and lampblack, which threw the 18.75 picture into relief. By chance the face was laid face downward on a piece of damp linen, and when taken up it was discovered that the picture was printed Sheet after sheet of damp paper wa impressed by the same plate and the good news that the art of printing pic tures was born spread like wildfire throughout Europe. Snuff in Arabia is not used as it is a snuffer, but the snuff is ordinarily made into a pill of about the size of a cobin's egg and is placed between the lower front lip and the teeth. This mapner of using snuff is common among the laboring class, and almost every cooly that is met in has his lower lip puffed out by a bal of snuff behind it. Arabian si prepared out of the ordinary powdere tobacco, unrefined sugar and notash

AN ANCIENT TELEGRAPH.

Used by Grecian Generals In the Time of Aristotle.

Telegraphy as a means of conveying information to a distance by means of generals in the time of Aristotle. This early mode of telegraphing consisted of two or more earthen vessels, exactly similar in shape and size and filled with water. These vessels were each provided with faucets of exactly the same caliber, so that an equal amount of water could be discharged from each in a given time. In these vessels several uprights

were fixed, each with disks attached, on which were certain letters and sentences. When all was in readiness the party desiring to communicate with another started a signal, which was continued until it was answered by another which signified "go ahead." When that signal was given both turned the faucets, and the water comued to flow until the sender of the temples, the beautiful uplands and outlet to both was instantly stopped. Empedocle below.—Century. The receiver then read the message on the disk which was standing level with the water, and if everything had been executed with exactness it corresponded with the message which the sender

Sour Stomach

No appetite, loss of strength, nervous ness, headache, constipation, bad breath general debility, sour risings, and catarri of the stomach are all due to indigestion Kodol cures indigestion. This new discovery represents the natural juices of diges tion as they exist in a healthy stomach combined with the greatest known tonk and reconstructive properties. Kodol Dyspepsia Cure does not only cure indigestion and dyspepsia, but this famous remedy cures all stomach troubles by cleansing purifying, sweetening and strengthening ous membranes lining the stomach Mr. S. S. Ball, of Ravenswood, W. Va., says:—

GIRGENTI THE BEAUTIFUL.

"No Piace of Ruins In the World More Beautiful Than This." Every one has heard of Girgenti, as Syracuse, before coming to Sicily. The most beautiful city of antiquity has left an endearing name, and if the Girgenti of today be far from the Agrigentum of Roman splendor and still further from the Acragas of Greek beauty and magnificence it is still no bly worth seeing. Even the least responsive imagination can hardly fail to apprehend some idea of what this town must have been of old, when Acragas, with its vast extent and over 200,000 inhabitants, looked out across the dark blue waters of the Greek sea or Mare Africano from a lordly wilderness of superb temples and magnificent buildings of all kinds. Today it is worth a pilgrimage from the ends of the earth. There is perhaps no place of ruin in the whole world more beautiful than this. To see it, as the present writer just saw it in a golden sunset glow.

what will be for life an unforgettable impression, an ever deeply moving re-To localize the three loveliest views in Sicily (and I fancy that most travel ers would agree with me) I should ify that from the terrace of the Hotel Timeo at Taormina, that from the monastery-hostelry of Madonna del Tindaro over Tyndaris and the Aeolian isles and that from the terrace of the Hotel Belvedere on the south wall of menced to escape. Says our author: Issued since 1836 from Uncle Sam's "I have mentioned that large num-

coin factory. on the head side of the copper is that of an Indian, but a close look will reveal a Saxon profile. Just borrow a cent and look at it. The setting is that of an Indian.

Between 1828 and 1840 James Baron Longacre was chief engraver in the United States mint in Philadelphia. In 1835 a competition was opened for sketches and engravings for the new copper cent that was to be issued and which has since been in service. There were over a thousand designs offered. The prize was a good one. Longacre racked his brain for some original and singular design that would strike the judges, but for months he failed to satisfy himself. One morning a number of Indians,

with their chief, who had been to pay their respects to the great white chief in Washington, came to the city and were shown through the mint. They were introduced to the white chief's oleture maker, who was just then showing his young daughter Sarah the great concern. The old chief was attracted by the sweet faced maiden and her interest in his feathers and paint. She childishly wondered how she would look in the feathered headgear. This was told the chief, who solemnly divested himself of his feathers and had them placed on the girl's head. The effect was so striking that the father took time to make a sketch of the picture, finishing it afterward for his own amusement.

At the last moment of the period given for sending in engravings he befalls on him, and then begins a regu- thought himself of the possibility of the combination of Indian feathers tries to hustle the other off, and the and Saxon sweetness. IMMUNE TO POISON. Practical Methods of the Snake

Charmers of the Orient.

but they always fail.-Johnson.

For many years it was regarded as one of the East Indian miracles that the snake charmers of the orient could encounter the cobra in an arena, allow the serpent to bite them time and again and survive the deadly poison. This dangerous feat puzzled the doctors of the British army and was never quite understood by scientists generally until within recent years, when the secret of these jugglers with fate leaked out. The East Indian snake charmer begins at an early age to make himself immune from the venom of the cobra. He takes the infant serpent and allows it to bite him. This injects into his system a very mild dose of the poison. He repeats the operation many times, and then ventures to allow a cobra somewhat older to bite him. Gradually he permits himself to become inoculated with the venom of younger serpents until he has become so accustomed to the poison that his system is immune. By the time he grows up he has become so thoroughly and unpresentable person. Moral qualaccustomed to the spell that it has ities rule the world, but at short dispractically no effect upon him. E. D. Miller, of Rockwood, and sinia. Just how far tribal relations James McGregor, of Indiana, repreenting the State dairy and food commission, are in this part of the State of language. Some points of interest holding up milk wagons and getting samples of milk to be forwarded to the commissioners' chemists. The inspectors were in Williamsport recently and are headed this way, so it is probable that the local milkmen will be called on soon. Concerning these inspections, an exchange says:

Local milk men are exercised over

milk "inspectors." The investigation made by this commission two years ago was somewhat unsatisfactory and t is alleged unjust fines were exacted. Dissatisfaction was caused before through the fact that, as alleged, the inspecting commission did not use sufficient precautions in the performance of their duties. As a result many of the dairymen were accused of putting formaldehyde in their milk, thus making it chemically impure and open ing it to condemnation by the State health authorities. Fines were levied upon several dealers. The milkmen, protection against the alleged impositions. Individul suit would have been an expensive proceeding, and co-operaess taught them that the former is smally traveling to a destination and last visit the milkmen have been on at his steady, jogging pace is rarely their guard and have decided that now casion, seeing a whole family tribe they shall be dealt with squarely. To this end it may be possible that the rsion, I successfully tempted some dealers will combine to be able to cope the younger ones to leave their more easily with this question, should aks by quietly rolling pieces of bread | the inspectors carry on their business
