tude In Which It Stands. In an old shop in lower New York a man keeps up his trade of dial making. The dials, square, octagonal or circular, are hand chased. They do not receive a high polish, and any accidental effect of weather stain or other if not skillfully added. These fials, fitted with the gnomon, or stylus, are then artfully slipped into the show windows of uptown can sity shops the show plate, prism candlesticks, inlaid tea caddles and old blue plates

A visitor to one of these shops asked; "How old is that brass dial over there? It's all hand work, isn't it?"

"It's all hand work," said the proprietor, whom we will call Truthful James. "I can testify to that, for I know the man whose hands made it. So unless you strike the same parallel in the states that the dial left in England it will tell lies from morning till night. You'd be surprised how many people pick up a dial that strikes their fancy which perhaps stood in the garden of an old Virginia estate, intending to hurry it off to the big grounds of some place in Minnesota; or they'll snatch at some quaint dial from New England, with the idea of rigging it up in Texas.

"More people would make the same blunder, except that many haven't caught on to dials. Too bad. Nothing is prettier than a simple dial at the crossways of garden paths, or by a fountain or on a terrace or at the entrance of a pergola or near a rustic creole at his heels, and a humorous seat or arbor. In the twilight of a secondhand shop on Royal street Van Holden saw her first. She came toward him down an aisle of shadow between old mahogany sideboards and dusty armolres and laid her gray gloved hand upon one end of a quaint davenport on whose other end reposed the hand of Van Holden.

"This davenport," she said to the shopkeeper, "is the one you reserved for me, is it not?"

Color Troubles of the Color Blind Poet, Whittier.

It is well known that the poet Whittier was color blind and unable to dis inguish red from green. He once bought for himself a necktie which he supposed to be of a modest and suitable olive tint and wore it once. He never wore it again, for his friends soon made him aware that it offended against the traditional quietness of costume enjoined alike by the habits of the Friends and by his own taste, The tie was of flaming scarlet.

On another occasion, when he found a little girl in distress on account of new gown, made over from her elder sister's, which was not becoming to her coloring and complexion, he tried to console her.

"I wouldn't mind what a rude boy says about it, Mary," he said kindly. "Thee looks very well indeed in it,

Unfortunately, Mary was not dressed in green. She was red haired, and her dress was red. That was the trouble. Once, on a day in mid-March, when out walking with a Friend and deeply engaged in conversation, Mr. Whittier neither Friend noticed it until a workman, violently waving his arms and

Inasmuch as 87 per cent of the whole body is water, which is, of course, be ing used up every moment, there is no uestion that we should drink of this ement copiously, but it is a serious uestion whether we should refrain rom water at meals-the time we par cularly desire it.

There is a class of persons, ever owing more numerous, that believes that whatever is is wrong. For the atural and simple they would substitute the artificial and complicated. To drink water while or directly after eating is a natural instinct. Give a dog his dinner, putting a bowl of water near it and observe that he will first at all he can and then immediately ink. Wild animals look for a stream ter feeding. Cage birds will stor ag at seed to peck at water.
