# OUTLINE OF WORK

With everything prepared for smooth sailing Speaker Cannon in the house. and Vice President Fairbanks, in the senate, will only have to bring down their gavels with a resounding thump at noon next Monday to start the legislativeship on its short three months cruise. This second session of the fiftyninth congress will adjourn March 4. On account of the many government supply bills to be passed it is extremely doubtful whether there will be a chance for much general legislation. There is a strong probability, however, that a river and harbor billl, carrying about sixty million dollars, will go through. The only obstacle will be the possible opposition of the senate should the advocates of the ship subsidy measure in that body demand that it stand or fall with the river and harbor bill.

SCRAPPING ANTICIPATD.

Over these two measures and the Philippine tariff bill the politicians of the two houses will probably do some scrapping. The administration earnestly desiers the enactment of the house bill reducing the tariffs on Philippine sugar, tobacco and rice to 25 per cent. of the Dingley rates, and ad - of Justice Oglesby yesterday morning mitting free all other Philippine products. The senate held the measure up in the last session. If the subsidy advocates in the senate have their way they will support the Philippine tarif bill and the river and harbor measure, which is to contain a provision inaugurating the proposed deep waterway from the lakes to the gulf.

BILLS TO COME UP.

Senator LaFolette's bill limiting the hours of continusous labor for railroad employes will have the boards in the senate next week, as the unfinished business. The eight hour and antiinjunction measures, the demand for which by organized labor prompted the American Federation of Labor's recent excursion into the political field will come up for discussion during the fore when they were "doing" the phatically. Yesterday the climax came when the whole fire department and a large concourse of other people assembled in one part of town in answer to a call. while a fire burned itself out in another part of the burg, the reason being that some one who sent in the alarm didn't understand the working of the new alarm boxes.

The alarm boxes are constructed with a glass front which is broken when an alarm is to be sent in. This has proven a boon to the boys of Sunbury who find great delight in breaking the glass to see how the thing

## XMAS OR CHRISTMAS.

Xmas signs and cards are displayed in the stores, and this calls up the old discussion for and against the usage of the word Xmas instead of Christmas, yet few people seem to know that It is an abbreviation. X represents the Greek symbol Chi, which is, as nearly as the sound of one language can be interpreted in another, the same as our two letters C and H. It is therefore Christmas. An impression seems to have got about that the X was the Hall's Family Pills are the hest cross symbol, and therefore incongruous in combination with so joyful a season as that of Christ's birth, and this idea has been advanced as an argument against its use. The only real objection to Xmas is that in some persons' eyes an abbreviation of any sacred name seems lacking in rever-

Day Rain Legend.

There were few frenzled financiers in England at the beginning of the eightcenth century if the banker Bulliot of whom the following story is told, can be taken as an example: The feast of St. Swithin, July 15, 1725, was a particularly wet and stormy day.

Trusting implicitly in the old superstition, which says that if it rains on St. Swithin's day it will rain for forty days thereafter, Bulliot opened a pool for every one who was willing to bet against him. The affair attained so much notoriety that the wager was reduced to writing.

"If dating from St. Swithin's day," reads the memorandum, "it rains more or little during forty days successively Bulliot will be considered to have gained, but if it cease to rain for only one day during that time Bulliot has

The first printing press in the eastern settlement of America was set up in 1338. In the summer of that year a ship bearing a printing press, a printer and three pressmen arrived on the shores of New England, the printer being Stephen Daye. In the same year the press was set up at Cambridge. One of the earliest and perhaps the most celebrated of the issues was "The Bay Psalm Book." It is interesting to know that the actual press it still pre-

The "Favorite Prescription" is advised for the cure of one class of diseases—those peculiar weaknesses, derangements and regularities incident to women only. It is a powerful yet gently acting invigorating tonic and nervine. For weak wormout, over-worked women—no matter what has caused the break-down, "Favorite Prescription" will be found most effective in building up the strength, regulating the womanly functions, subduing pain and bringing about a healthy, vigorous condition of the whole system.

THE ECCENTRICITIES OF THE ITALIAN MARQUIS DEL GRILLO.

Grim Joke by Which He Attempted to Revolutionize the Administration of Justice In Rome-Giving to Caesar What Belonged to Caesar.

The Marquis del Grillo, husband of the famous actress, Adelaide Ristori, was one of the best known characters of his day. Rich, bearing a title that made him one of the most conspicuous figures in Roman life, and absolutely indifferent to what others thought of him, he indulged in all sorts of pranks. Society called them eccentricities and pronounced him slightly unbalanced, but in reality he was possessed of unusually bright faculties. He had a keen sense of humor loved excitement and was thoroughly awake to the shortcomings of his generation. His eccentricities were so many object lessons, which it pleased him to administer in his own quaint way, and they seldom went wide of the mark

His first attempt at a practical toke. if such it may be termed, bade fair to revolutionize the administration of justice in Rome.

Punctually at 10 one bright spring morning every church bell in town began to ring "a morto," a long, peculiar toll used to announce a death. Plus IX. was then reigning pontiff and, hearing the general tolling, asked who the great personage was that all Rome was mourning. None of his "sult" knew, but inquiries at St. Peter's elleited the fact that the Marquis del Grillo had sent the order without specifying who was dead. The pontiff was even more mystifled, and when word had come from other churches to the same effect he sent for the marquis, who promptly answered the summons. "I hear," said Pius IX. to the mar-

At another time the marquis, who always dressed very modestly, made his to rise. The bungalow is so close and vay on foot to the palace of Prince Massimo, where a big reception was being held. As he approached the entrance a pompous lackey looked him over from head to foot and then barred the way.

"No admittance tonight," he said incolently. "A reception is going on." The nobleman stood amazed, for even over princes he often took precedence, out then he saw the humor of the situa tion and, smiling to himself, walked

Half an hour later a magnificent coach drew up before the palace, and out stepped the marquis, resplendent in ous court uniform and scintillating with decorations. In a minute the whole house was astir, and the hostess herself met him and led him in. The night was warm, and soon she invited aim to have an ice, an offer which he promptly accepted. Imagine her feelings when, instead of eating it, he coolly and deliberately proceeded to front of his uniform and on his nu-

merous decorations. "Why, marquis," she exclaimed in alarm, "what are you doing?"

"Giving Caesar what belongs to Caesar," was the quiet reply. "Your servants refused to let me in in the garb of a plain gentleman, but promptly admitted my costume and decorations when I carried them in. Is it not they that should be rewarded?" A peculiarity of the marquis was his

refusing to have as personal valets any but the most quick witted of young fellows, who could help him in his little escapades without having to be coached too much. Many amusing tales are told of his experiences in engaging them. In one instance he was sitting at the plano trying some church music when a new applicant was ushered in. He didn't stop playing or even glance around, but began to ask questions, the answers to which evidently did not appeal to him, for he suddenly struck a loud chord and, following the tune of the music, chanted in a loud voice, "You will never do for me." Then he rose and without a look at the man started to walk out of the room. Quick as a flash the applicant stepped to the piano and, striking the keys with both fists, chanted back solemnly on the same air, "I'm very glad of it, be-

cause I don't like you a bit." Any one else would have had the man thrown out for his impudence, but the marquis paused at the door and smiled with appreciation.

"I guess we shall get on nicely, after all," he said pleasantly. "See my 'maggiordomo' and speak to him about terms."-New York Times.
