WHAT THE KIDNEYS DO

Their Unceasing Work Keeps Us Strong and Healthy.

All the blood in the body passes through the kidneys once every three minutes. The kidneys filter the blood. They work night and day. When healthy they remove about 500 grains of impure matter daily, when unhealthy some part of this impure matter is left in the blood. This brings on many diseases and symptoms-pain in the back, headache, nervousness, hot, dry skin, rheumatism, gout, gravel. disorders of the eyesight and hearing, dizziness, irregular heart, debility, drow-iness, dropsy, deposits in the ur ne, etc. But if you keep the filters right you will have no trouble with your kidneys.

Augustus Hawn, 327 Second St., Hunt ington, Pa., says: "It was about three years ago that mv kidneys first began to give me trouble. The disease grew on me gradually and constantly became worse until it reached a stage of severity that when I got up in the morning sharp stinging pains would catch me in the back and the action of the kidneys became very regular and there was a hot burning sensation during passage of the secretions. I tried all kinds of medicine but nothing seemed to do me any good. At last I decided to try Doan's Kidney which to view the harbor illuminawas constructed last summer and is a pected relief that 1 feel warranted in recommending this remedy to other suf-
