HOUSE HONORED HEROIC MINERS

HARRISBURG, May 1.

The heroic rescue of the seven men entombed in the mine at Foustwell. Cambria county, was officially called to the attention of the house of representatives this morning and a resolution by Mr. Moulthrop, of Clearfield, commending the bravery of the rescuers was unanimously adopted. RESOLUTION ADOPTED.

The resolution was as follows:

"Whereas, We are informed this morning through the medium of the public press of the rescue of the seven miners entombed in the mine of the Berwind-White Coal company at Foustwell, Cambria county, in this Commonwealth, by a number of their brave and heroic fellow-workingmen under most trying and dangerous circumstances, during which time their lives were constantly in danger.

MARK OF PUBLIC RECOGNITION "Therefore, Be it resolved that this legislature take cognizance of this act and extend its approbation to the rescuers and direct that this resolution be entered on the legislative record as a mark of public recognition of their

brave and valorous deed." No debate occurred on the resolution it being adopted without comment.

INVITATION ACCEPTED. An invitation from the citizens of

West Pittston to the representatives to attend West Pittston's "golden jubilee" celebration in June was presented by Mr. Hall. of Luzerne, and unanimously accepted. BILLS PASSED FINALLY.

The following bills were passed finalty:

Pullman's Giant Passenger. There was one story of his career that Mr. Pullman used to tell with manifest delight. One night, going out of Chicago, a long, lean, ugly man, with a wart on his cheek, came into the depot. He paid George M. Pull man 50 cents, and half a berth was assigned him. Then he kicked off his boots, which were of surprising length. turned into the berth and, having an easy conscience, was sleeping like a healthy baby before the car left the depot. Along came another passenger and paid his 50 cents. In two minutes he was back at George Pullman. "There's a man in that berth of mine," said he hotly, "and he's about ten feet high. How am I going to sleep there, I'd like to know? Go and

THE FLAGEOLET.

It Has Always Been the Love Flute of the Apache Indian. The flageolet is of peculiar interest

to Americans, as from time immemorial it has been the medium through which the Indian youth courted their sweethearts at a distance when they were so unfortunate as to be unable to gain a personal audience.

List of persons and firms engaged in the is made of a round stick of cedar about twenty-four inches long, split lengthwise and hollowed to form an air chamber. A hole is made on each side of this diaphragm and a shallow air passage cut from one hole to the other. Above it a cap of wood is placed for the purpose of covering the upper hole and the air channel. The lip is made of a thin sheet of lead and the whole bound together with a slender thong. In the tube part or body of the instrument are placed six finger holes, a condition that points unmistakably to the influence of contact with the white man

An old English diary of 1667 contains this quaint reference to the double flageolet: "To Dumbleby's, the pipemaker, there to advise about the making of a flageolet to go low and soft, and he do show me a way which to do and also a fashion of having two pipes of the same note fastened together. so as I can play on one and then echo it upon the other, which is mighty pretty."-American Inventor.

Just look at those two cherubs over the central window on top of the hall of records, for example, How can any one with a memory ever forget the scandals of the construction of that building in looking at these two figures? One of them is plainly going over the account books of the cost, while the other one is peering downward, as if he were trying to get a glimpse of that imitation marble work that has been put up on the walls of the upper stories. And the best of it is that such stories last. Who ever

Grim Joke In a Blue Book. A grim piece of humor appears in the British blue book dealing with the taxation of unimproved land values in the colonies. The tax commissioner of Adelaide, after referring to the inaccurate returns, says: "Side by side with these inaccurate

returns it has been pleasing to note the completeness with which others have been prepared in the minutest particulars, and we cannot fail to recognize the thoroughness of the taxpayer who returned that piece of land of his, measuring nine feet by six feet, in the --- cemetery, and under column 'Name of Occupier' gave that

Paraffin wax models of all proposed British battleships are used by the admiralty for tests before the keels of the ships are laid down, the miniatures being tested in a great tank. The models are from twelve to twenty-four feet long, the tank being 400 feet long and twenty feet wide. The models are made of wax because it is a material which does not absorb water or change its weight, so that alterations can be easily made, and the material can be melted up and used again. The American naval authorities also have models of all their hulls constructed, but these are much more elaborate than the British, being formed of white pine and fitted with rudders, false keels, propeller shafts and all et ceteras.

To cure a Bad Habit. A way to cure a bad habit is thus explained by the Rev. Samuel McComb in the New York World: If you have a habit you wish to get rid of put your mind upon it after going to bed. Resolve to discard that habit at the moment you are lapsing from semiconsciousness into complete unconscious ness. Repeat the operation several nights, several weeks if necessary, and cure will follow, provided that the day after the first night the experiment is started you obey the impulse that will
