WHAT THE KIDNEYS DO

Their Unceasing Work Keeps Us Strong and Healthy. and Healthy.

All the blood in the body passes through the kidneys once every three minutes. The kidneys filter the blood. They work night and day. When healthy they remove about 500 grains of impure matter daily, when unhealthy some part of this impure matter is left in the blood. This brings on many diseases and symptoms—pain in the back, leadache, nervousness, hot, dry skin, rheumatism, gout. gravel, disorders of the eyesight and hearing, dizziness, irregular heart, deblity, drowsiness, dropsy, deposits in the urine, etc. But if you keep the filter right you will have no trouble with your kidueys.

Driver Thrown Out of Wagon.

Alfred Fisher, a young man in the employ of William Foust, tenant on the farm of Hon. James Foster, Mahoning township, was injured in a runaway

last Saturday morning.

He was driving up Bloom road with two horses hitched to a farm wagon. When near the culvert just above the borough line the team took fright at au automobile and became unmanageable. Zigzagging from right to left the horses ran up the road and when near Hellers store threw the driver out of the wagon.

Mr. Fisher fell heavily to the ground. He was unable to arise but lay helpless while the horses continued their flight. Several persons ran to the young man's assistance and helped him to arise. They wanted to send for a physician, fearing that his back was broken. The young man insisted that he was not seriously hurt and in a short time recovered from the worst effects of the fall. He is still suffering from several bad bruises, which seem to be the extent of his injury.

The runaway team was brought to a sudden stop by running against a trolley pole when it was easily caught.
