THE ARCTIC OUTLETS.

What Would Happen If These Ice Channels Were Clessed. It is well that there are the water gaps between the continents whose headlands form the boundaries of the Arctic ocean. Through Bering strait, Baffin's bay and the huge opening be tween Greenland and western Europe thousands of cubic miles of ice are annually discharged which if landlocked would long ago have so accumulated as to have impelled cataclysms that would probably have so swept life from the earth that the evolution of man would have been deferred indefi-nitely into the far future centuries.

Both poles are located with singular adaptation to ease off the otherwise inevitably too great accumulation of lo-cal avoirdupois, which would as surely change the earth's center of gravity as would the hanging of an immense weight at some local point on the periphery of a balance wheel.

It is to this good fortune in present polar locations that the world owes its

immunity of cataclysmal inundations and reorganizations which otherwise must have laid down other strata to the mausoleums that mark the resting places of the forms that once sported 1272 beneath us

THE HOTEL CLERK.

According to This View His Lot Is Not

a Happy One.

Who is the most envied and bediamonded among men? The hotel clerk. Who runs away with our helresses? The hotel clerk. Who gets the straightest tips on the stock market? The hotel clerk. Whose pride goeth not before destruction and whose glory is never dimmed? The hotel clerk's. So runs the accepted catechism.

ns the accepted catechism.

Now a truth seeker in Chicago rise to say that the average hotel clerk's chance in life is a trifle less than noth-ing. He can't marry, for he is com-pelled to live in the hotel, and his wages won't pay his wife's board. Even as a bachelor he finds it hard to save money. When he reaches the age limit—not a high one—he is displaced by a young man.

There are then three things for him He may become night clerk in a country hotel, a job that he rose from years before; he may be put in charge of a cloakroom and look to tips for most of his pay or he may try to get other work, using up his savings meanwhile, and end his life in the almshouse. Not a cheering conception and practically to the humorist.-Collier's

KEEP YOURSELF YOUNG

Exercise Every Day Even Though You Steal the Time to Do It. It is futile to try to lay down general age limits for the different kinds of athletic sports.

The limits vary individually within

very wide marks, and if observations 232,90 made on a number of individuals of the present generation put them very low this does not mean that they would be the true and desirable limits if we had a generation whose physical edu-cation from the beginning had been undertaken and carried out upon a plan only one-fourth or even one-tenth as elaborate as the plan for its mental education, not only as far as exercise and sport are concerned, but also in regard to eating, drinking, clothing, sleeping, pleasures, stimulants, etc., and whose individuals were willing to continue to live upon a similar plar after growing out of the hands of their

educators. Live a simple, natural life, take strenuous exercise every day of your life, even should you steal the time to do so, and see what will become of your personal limit for the various kinds of sports.-New York Medical

Indian Punishment

Some idea of what Baroda, India, was in times comparatively recent may be gathered from the following: A hundred elephants were kept at the expense of the state, and criminals were executed in a most horrIble man-ner. The poor wretch, tied hand and foot, was fastened by a long rope round the waist to the elephant's hind leg. Then the animal was made to trot through the city, and the man, at almost every step rebounding against stones and obstacles, soon became a mass of bruises and wounds and a ghastly spectacle. If he survived this, his head was placed on a block, and the elephant crushed it with his foot.—

Astronomers have no generally accepted theory as to the cause and nature of sun spots, but some connection with terrestrial phenomena surely ex-ists, because the curves representing the frequency of magnetic storms and of the aurora borealis are practically identical with the curve of frequency.

Real Sinkers. "How did they catch the thief that robbed the raffroad eating house?"

"He was so weighted down with plunder he couldn't run."

"Money and silverware I suppose?" "No; doughnuts."-Milwaukee

Partially Revived. Johnnie—Papa, papa, come quick! Mamma has fainted. Papa—Here, put this ten dollar bill in her hand. Johnnie (a moment later)-She says she wants ten more.-Fliegende Blatter.

Resentment seems to have been giv en us by nature for defense and for defense only. It is the safeguard of justice and the security of innocence.

-Adam Smith.

The English of It. An English actor of some prominence was dining with some friends in this country. One of them asked him if he had found any American plays that he thought he could use in England. "Oh, yes," he replied, "I have seen one or two that I fawncy will be on the other side. In fact, I have entered into negodations for several. One that ap gothions for several. One that appeals to me strongly is a play called 'Ten Evenings in a Public House,' where I shall play John Morgan, and another is named 'Uncle Thomas' Residence,' which has a fine part for me in Marks, the barrister."—Kansas City

ALASKA SALMON.

Procession of the Four Varieties of "There is nothing more curious con-nected with the finny tribe than to watch the doings of the salmon family

in Alaska." said an Alaskan dealer. "The most singular thing of all is that after the females deposit their spawn their earthly career terminates, and I have seen the bottoms of creeks covered with their dead bodies. They give birth to thousands of their kind and immediately die. The young ones are then taken care of by the male salmon, and it is a well known fact that in three years from their birth the offspring reappear on the very ground of their origin. There are four varie-ties of this superb fish which make their appearance in regular order of

"In the spring the first to arrive is the magnificent king salmon, which weighs all the way from fifteen to ninety pounds. About June 1 comes the sookey or red salmon, which visits our shores in enormous numbers and which is the common canning variety. which is the common caming variety. A little later appears the log salmon, which only the Indians will eat, and finally, in August and September, the beautiful silver salmon arrives, the prettiest fish in all the world and one

of the most palatable.

"When the salmon enter the fresh water by a curious trick of nature their skin becomes red, but this pink hue does not affect the whiteness of their flesh. It is seldom that salmon will journey up a glacier stream, but the streams that have lakes at their heads literally swarm with them."-Washington Herald.

ATTACKING A SYSTEM.

It Involves Attacking the Men That Uphold the System.

On every side I hear strange insistence upon the fact that it is only the system that is wrong. I hear people utter the following extraordinary words: "We do not attack individuals." What, in the name of the seven plan-

ets, can you attack except individuals? How can one fight a system? If a system came into this room, what would you do to it? Would you take a gun or a fencing foil or a butterfly net or a horsewhip or a disinfectant?

A system only exists in the minds of men, and if there is a very vile system in the minds of men there must be something very vile about their minds.

I do not say that they may not have other virtues along with the qualities that make the bad system. I do not say that the upholders of any bad sys tem are without any moral merits. I do not say that Italian brigands are without any moral merits. But, however good or evil may be mingled in character of an Italian brigand, ody ever said that in dealing with persons of that profession you were not to attack individuals.

You do not, in dealing with brigands, say that you merely attack the system. You attack the brigands—that is, supposing that you are in possession of the adequate bodily courage.—C. K. Chesterton in Illustrated London News.

Thackeray's Pantomime

William Makepeace Thackeray was always too genial, too generous, too open handed, to be an accumulator of this world's goods, and in spite of the large earnings of his pen he died a poor man. Shortly before his death his friend, John Leech, the cartoonist, call-ed upon him and found him in his study writing-writing and sighing at

the monotony of his work.
"Why don't you have a holiday." said
Leech, "and take your girls to the seaside?

The great novelist made no verbal answer, but, rising slowly, plunged his hands to the very bottom of his pockets, brought these receptacles out, shook them vigorously without eliciting a rattle of coin, replaced them and then resumed his seat.

Strength of the Condor.

The enormous strength of the condor only equaled by his voracity and boldness. This immense bird often pounces upon small animals, but from the shape and bluntness of his claws he is unable to carry anything very heavy, so he contents himself with fixing it against the ground with one of his claws, while with the other and his powerful beak he rends it to pieces. Gorged wit! food, the bird then be comes incapable of flight and may be approached, but any attempt at cap-ture is furiously resisted.

Cure For a "Nagging" Woman. Having advertised as a widower in search of wife No. 2, a man of St. Gall, Switzerland, showed the fifty rea widower in a man of St. plies and photographs which he had received to his wife, and, stating that if she did not want him there were others who did, he effectively cured her of her "nagging" habits. - Petit

He Read the Signs.
"And now, little boys," said the pret ty Sunday school teacher, "we have seen that it is ordained that every hu-man being must some tay come to his death. And what comes after dying?" "Cleaning and pressing," velped a boy who was familiar with window signs.-Chicago News.

Influence of Scotchwomen

It is not surprising to find that those qualities-intellect, grit and strenuous endeavor-that have brought the man-hood of Scaland to the front should also be a marked characteristic of Scotchwoman. — Englishwoman's Re-

When we read, we fancy we could be martyrs; when we come to act, we can-not bear a provoking word.—Hannah More.

A Positive CATARRH Ely's Cream Balm is quickly absorbed. Gives Relief at Once.

THE FIRST MARLBOROUGH.

His Was a Curlous Combination of

Herbert Paul in his book on Queen Anne of England paints a queer pic-ture of the great Duke of Marlborough. He was not truthful. He was not straightforward. He was not honest. In his love of money and his capacity for hoarding it he rivaled those wretchad misers who have done no more than contemplate their gains. And yet, such are the strange freaks in which nature indulges, this mean and selfish intriguer was endowed with perfect eourage, with an irresistible charm of manner, with a temper which even his wife failed to disturb, with a brain that no sophistry could obscure and with a military genius before which criticism is humbly silent,

He was treacherous even in a treacherous age. Wholly devoid of cruelty and by nature humane, he is said never to have sacrificed an unnecessary life. He used his fellow creatures for his own purposes, and when he had no further use for them he forgot their existence. He made his plans and carried them out with the absolute efficiency of sheer intelligence and the serene implacability of impersonal

THE SULTAN'S SCREEN

It Is Made of Tanned Human Skin Elaborately Decorated.

Elaborately Decorated.

There is a story told of a famous and surious screen which occupies a prominent place in the menage of the sultan of Turkey. It is made, so rumor hath it, of human skin, perfectly tanned and elaborately tooled and embossed, and it has been in the royal quarters for more than two centuries. This remarkable screen is not an evidence of cruelty or barbarity on the part of Turkey's ruler 200 years ago, but is a memorial to twelve faithful servants of a former sultan. At one time during the sultan's reign 200 years ago a wing of the palace caught fire, and during the conflagration a much loved member of the sultan's family was rescued by twelve servants. The twelve servants perished, some of them dying later of their wounds and burns, so his majesty had their skins removed by an expert and had them preserved in this touching though remarkable manner. The screen is now looked up-on as a part of the ruler's inheritance, and it is said that every sultan cherishes it almost as he would his own royal skin.—New York Herald.

THE AGE OF FISHES.

Both Ear Stones and Scales Carry the

Annual Tally.

It has been found by ichthyologists It has been found by ichthyologists that the age of a fish may be read from its scales. These increase in size by annular growths, two rings being formed each year. The "otoliths" or ear stones, which lie in two sacs on either side of the base of the cranial cavity, afford another means of determination.

Like the scales, the otoliths increase by two rings annulay. Each springby two rings annually. Each springthat is, from February to June—a white ring is formed, and each autumn—that is, from July to October—a black one. Thus the number of either white or black rings in an otolith gives the age of the fish in years. In the case of flatfish the latter method has been found more reliable, whereas in the case of the cod the scales give a better result. Although varying much in size and shape in different species, the otoliths show a remarkable constancy in the same species; hence they are of considerable value in the diagnosis of a species.—London Globe.

A Lesson In Philanthropy. A whole souled resident of Harlem the other evening received the jolt of his career as a parent. While reading his evening paper the doorbell rang, and a parcel from a big department store was announced. The cost was 30 cents, and he gave his little bright eyes, a girl of six, a two dollar bill with which to pay the boy. Half an hour later the subject re-

eurred to him.
"Here, Mabel," he said. "Where's
that money I gave you for the boy?"
"Why, papa," was little bright eyes'
reply, "I did the same as you did yes
terday with the newsboy. I told him
to keep the change."—New York Globe.

Belgium Shopkeepers

Belgium shopkeepers generally are dealers in miscellaneous goods. One man in a small way, for instance, sells beer, foreign stamps, fruit, cotton, bis-Everywhere one finds a hand hair. mania for glaring lights. One evening when I was out I saw a tremendous light in the distance, and I thought it must surely be an advertisement for a music hall. When I got nearer, I found that the light merely conveyed the in-telligence that sardines were sold on the premises.

"Cutler," according to its present use, should mean a man who makes things that cut, but really it has no more to do with "cut" than "cutlass" and "cut-let" have, which is just nothing at all. "Cut" has some Teutonic origin, but "cutler" comes through French from the late Latin "cultellarius," which meant either a soldier armed with a knife or a knifemaker, and "cultellus," a little knife, was the diminutive of "culter," which, among other things, meant a plowshare or "coulter." lass" comes from the same source, and "cutlet" is "cotelette," a little rib.

BRAIN AND BULLET.

What Happens When the Skull Is Pierced by a Shot.

The results of firing a bullet at a flat brittle bone and into a soft substance like the brain are very different. The bone is pierced, and the lateral displacement of its particles is very slight, but the brain is thrown aside in all directions. The difference is due to the different degree of cohesiveness of the particles composing the two bodies or, in other words, to the greater fluidity of the softer structure.

Next, the importance of fluid con-tents in intensifying the effects of a bullet fired through a closed recepta-ele is shown by one of Kocher's experi-Two identical tin canisters ments.

ments. Two identical tin canisters were filled with equal quantities of lint, which in one was dry and in the other saturated with water.

A bullet of moderate velocity fired through them simply perforated the dry one, but caused the wet one to burst explosively. Kocher also filled a skull with water and found that a bullet fired through it caused bursting. bullet fired through it caused bursting of the sutures.

Very remarkable is the shattering that results when skulls that have been filled with water or with wax are treated in this way, and if they are compared with others showing the ef-fects of bullet wounds under normal conditions it is easy to appreciate that the variations presented are depend-ent, in part at least, upon the difference in the character of the contents.-Current Literature.

SPONGE FISHERS.

The Greek Girl Divers of the Island of

Himla.
"We were cruising in the Mediterranean in the late fall," said a globe trotter, "and on a golden afternoon we stopped beside a little fleet of sponge divers. Nearly nude, the divers sat on the edge of the boat. They held big stones that would help them descend. One at a time they inhaled three or four long breaths and then plunged with their great stones into the blue

"One boat interested us. Its divers seemed so graceful and young. We drew nearer, and, by Jove, the divers were all girls. They were young Greek girls from Himla, an island near Rhodes. It seems that in Himla the sponge diving is carried on by girls altogether. These girls seemed very altogether. These girls seemed very expert. Their dark hair knotted on their shapely heads, they reclined on the sun warmed deck till their turn came. Then, graceful as stage dancers they leaned overboard and in the sea's dim green depths tugged at the black sponge growths. "The captain said the Himla girls

were not permitted to marry till they had brought a certain quantity of sponges from a certain specified sponges from a certa depth."—New York Press.

Queer Chinese Belief. It is a common belief among China-men that if one commits any crime against certain animals-cats, for ex ample—the soul of that animal will take possession of the wrongdoer until the offense has been purged. A serv ant girl, according to the oriental tale, ant girl, according to the oriental tale, unmindful of tradition, put to death a cat and its three kittens. She was taken violently ill. Her mistress, suspecting the cause from the fact that the maid was scratching and mewing, apostrophized the body of the dead cat, demanding to know why it thus tormented the girl. The spirit of the cat speaking by way of the girl's cat, speaking by way of the girl's mouth, denounced the quadruple mur-der. The whole story was told by the girl in the character of the cat. Then she expired in violent convulsions.

Elephants Can Carry a Grudge. A Hindoo mahout was employed with working elephant in Bangkok, Siam, and frequently used a steel goad in de-fiance of all warnings. The result was that his elephant made frequent attempts to kill him, and finally the man was discharged. Nearly four years afterward, by a most_remarkable coin-cidence, both elephant and mahout met again in Maulmain, Burma, and no sooner was the big tusker out of sight of the sawmill and well into the forest than he curled his trunk up backward. seized his old persecutor by the neck, hurled him to the ground, and in an instant a mighty forefoot had crushed

Bewitched.

Morrison, an English traveler of the seventeenth century, while at Dantzic, Prussia, says he "saw a mill which, without the help of human hands, did saw boards. It had a great iron wheel, which did not only drive the saw, but which did also hook in and turn the logs on to the saw." must have seen a similar mill at Prague. Of it be says, "I saw me a mill at Prague of which I verily be-lieve the devil himself was master."

REAL COUNTRY LIFE.

Early In Life.

Any one who has lived on a farm Any one who has lived on a farm does not need to be told the reason farmers grow old early, for he knows of the strain under which the American farmer lives during the five months of spring and summer. His workday is from 4 or 5 in the morning until 8 or 9 at night, including choresfifteen to seventeen hours of the hardest kind of physical labor, and everyminute of it at high tension, especially during harvest. Then comes a period during harvest. Then comes a period of relaxation in the fall, the one time in the year when he has just enough muscular exercise to keep thm in health; later, the winter season, approaching stagnation, in which he takes on flesh, gets "logy," and then a furious debauch of hard labor through the spring and summer again. No wonder that by forty-five he has had a sunstroke and "can't stand the heat," or has "a weak back," or his "heast gives out," or a chill "makes him rheumatic," and when you add to this furious muscular strain the fact that the farmer sees his income put in peril every season and his very home every every season and his very home every bad year, so that each unfavorable change in the weather sets his nerves on edge, it can be readily imagined that the real "quiet, peaceful country life" is something sadly different from the ideal.—Woods Hutchinson, M. D., in Harrer's
