exceptions were sustained by the court. This leaves the status of the old road precisely the same as before the viewers reported in favor of vacating it. There would seem to be but one logical course to pursue in the premises and that is to reopen the road.

Every phase of the work, however, brings up obstacles. The county commissioners have gone over the ground and are quite discouraged at the outlook. In the first place all that porhouse desired to move there was al- tion of the road below the creek's mouth is practically destroyed by the trouble required to make the transfer inroads of the river, while one of the abutments of the iron bridge would advisable to rebuild the bridge on the

former site The road below the creek's mouth would have to be relocated, which means that a strip of land belonging to the Shepperson tract would have to be purchased and thrown open for travel. The cost of the land, along with the iron bridge, it seems, would

have to be borne by the county. The county commissioners, after look ing over the ground, came to the conclusion that in case the road is to be change the route of the road and the examiners, who will open the queslocation of the bridge altogether. They would favor the purchasing of a strip of land leading from the creek's mouth northward in as direct a line as possible to the canal, which is filled up at that point, and thence across the D. L. & W. track at grade, inter-

secting the Northumberland road. This would place the new bridge not far from the bend of the creek near the canal. The county commissioners estimate the cost of building the bridge alone at considerably over two thou- al weeks. The cause of death was a sand dollars.
