Reports Arel Exaggerated.

Adverting to the reported destruc-tion of this year's fruit crop, by the recent freezing weather and the snow in some sections of this State, which as usual is an exaggeration of actual conditions, the Pittsburg Dispatch says: "It is the presumption of those unfamiliar with fruit growing that every frost is fatal that gives currency to the stale joke about the frequent destruction of the peach crop. Peach trees bloomed in unusual abundance this year.. They were subjected to light touches of frost while in full bloom and suffered no injury, at least on high ground. In some sections they showed no sign of harm yesterday Yet the tiny fruit may have weakened that all will fall from the branches. Then, again, many peacher may go to maturity. It is so with other fruits. The ordinarily hardy apple was caught in open blossom-its most tender stage—but a few days will be required to determine whether there will be no apples. A so-called "black frost' in May, 1891, preceded an autumn famed for its abundance of fruit of all kinds.''

Women as Well as Men Are Made Miserable by Kidney Trouble.

Kidney trouble preys upon the mind, discourages and leasens ambition; beauty, vigor and cheerfulness soon disappear when the kidneys are out of order or diseased.

Kidney trouble has become so prevalent that it is not uncommon for a child to be born afflicted with weak kidneys. If the child urinates too often, if the reaches an age when it should be able to control the passage, it is yet afflicted with bed-wetting, depend upon it, the cause of the difficulty is kidney trouble, and the first step should be towards the treatment of these important organs. This unpleasant trouble is due to a diseased condition of the kidneys and bladder and not to a habit as most people suppose.
