Martha Thompson, Bloom street, and
is a well-known and amiable young hearts of all.

### HOT IN CHICAGO.

Chicago, June 24 -- Chicago has cool Gross, West Mahoning street. weather today. The hot wave which has prevailed for five days was broken street, left yesterday for Philadelphia D. Pennepacker, to Mr. James Lati last night and early this morning a cool breeze set in. Yesterday's death list as the result of the heat was the largest for any one day in the city's history. Sixteen persons died either directly or indirectly as the result of the high temperature.

Mrs. Lewis Chesnut and son Gorman returned to Lewisburg yesterday after a visit with friends in this city. The bight temperature. the high temperature.

### THE COCOA TREE.

This Evergreen Is Found Everywhere

The cocoa tree is an evergreen and grows to a height of from fifteen to twenty-five feet, its leaves being bright and smooth, somewhat resembling the foliage of a rubber plant. It is very low branching, and the blos-soms are small and pink. The blos-soms and pods not only spring from the branches, but often from the trunk itself. The fruit is a yellowish pod about the size of a cucumber and is filled with seeds, all strung together in a pulpy, pinkish mass. It is from these seeds or beans, each about the size of a chestnut, that the chocolate and co-coa of commerce are manufactured. The trees bear from the fourth to the thirtieth year, and it is not unusual to see on the same tree buds, flowers and

When ripe the pods are gathered by when ripe the pods are gathered by the native women and are allowed to lie on the ground for a day or two, after which they are opened. The pulp containing the beans then ferments for about a week, the astringent quali-ties of the beans being much modified and their flavor improved.

Ager being thoroughly dried the Ager being thoroughly dried the beans are packed in hundred pound bags for shipment. When received by the manufacturer, they are carefully picked over for quality, assorted and roasted. The nibs, as the roasted beans with the shells removed are called, are then fed into a hopper and ground between stones shuller to an old feek. tween stones similar to an old fashioned flour mill. The grinding process, coupled with the friction of the stones, which produce a temperature of some 120 degrees, changes the solid nibs (without the addition of anything) into a thick, heavy liquid. This is technically termed "chocolate liquor" and is sold to confectioners.

This same liquor, subjected to hydraulic pressume, with the resulting separation into a clear oil, gives the ocoa butter of commerce. The remaining pressate when powdered forms drinking cocoa. The chocolate liquor drinking cocoa. The chocolate liquor solidified becomes cooking chocolate, and, with sugar, vanilla and spices added, it is sold as "sweet" or "eating"

## WOMAN'S TWO SOULS.

May Be Strangers to Each Other, but They Exist, Says College President. Women have two souls, perhaps ore, according to President G. Stan-

The Hustler.

He gave this as the explanation of the fickleness of woman, of her "erratic methods of jumping at conclusions and her intuition," in his address on "Psycho-therapeutics" before the graduating class of the College of Physicians and Surgeous the other days of the conclusions and surgeous the other days of the conclusions. sicians and Surgeons the other day at

"Woman is much more susceptible than man," he said. "There is a good reason for this. We know that she has two or more souls. She may love and hate at the same time and the same person. She may say and think that she is sick or well when the reverse is really time. that she is sick or well when the reverse is really true. It means simply that one soul is in the ascendency These two souls may be absolute strangers to each other, but they certainly exist. We have proved it beyond the shadow of a doubt."

The Herolo Life.
Know that "impossible" where truth
and mercy and the everlasting voice of nature order has no place in the brave man's dictionary; that when all men have said "impossible" and tumbled poisfly elsewhither and thou alone art left then first thy name and possibil-ity have come. It is for thee now; do thou \*at and ask no man's counsel but the own only and God's.—Thomas Car'rle.

Risky Revenge. Gaganini, the wonderful violinist, had a narrow escape at Ferrara from a violent death. Enraged by some hissing from the pit, he resolved to avenge the insult, and at the close of his programme informed the audience that he would imitate the language of various animals. After having rendered the notes of different birds, the mewing of a cat, and the barking of a dog, he advanced to the footlights, and, saying, "This is for those who hissed!" imitated the braying of an ass. At this the occupants of the pit rose, rushed on to the stage and would probably have killed their caluminator had he not hastily retreated. hastily retreated.

A waiter spilled some soup on the clothing of a portly, choleric old gentle-man dining with his wife in an uptown lobster palace the other night, whereupon the old gentleman jumped to his feet and, calling the manager, burst into a tirade which ended with the somewhat anticlimatic charge that

the waiter was "no gentleman."

"This man is not supposed to be a gentleman," said the manager coldly.
"He is merely a waiter."—New York

### PLUG HATS OF JAPAN.

Cherished Tiles of the Vintage of Fifty Years Ago.

"There is one sight which you must not miss when you go to Tokyo," said the seasoned traveler to a New York Sun reporter. "That is the rare dis-play of anthropological plug hats. "Some people arrange to get to Japan

in cherry blossom season, and others want to get there in time to receive an invitation to the emperor's garden par-ty in chrysanthemum time, but take the tip of one who has batted about the world considerably and land in Tokyo either on New Year's day or on the emperor's birthday. On both you can see something unique in the lines of headgear.

"When Japan began to get civilized she hought all the accessories of civilized."

she bought all the accessories of civilization that England did not want any more. England sold her old fashioned, out of date, narrow gauge railroad stock, antiquated tram cars and other secondhand junk, including the then current styles of plug hat.

"The tile of those days has remained the ruling fashion in Japan up to the present. Japan may build Dread-noughts, but the plug hat of fifty years ago still reigns supreme.

"Only on such ceremonious occasions as the New Year's festivities, the em-peror's birthday or possibly the racing meets at Negishi, near Yokohama, does the Japanese gentleman bring forth from his camphor wood chest his plug bat, a heritage from his forefathers. It may be warped with twenty summers, damp or green with the shine of antiquity, but that matters nothing.
"Once this superstructure of his

wrinkled frock coat and bagged trousers is added the Japanese gentleman feels that no dignity short of a decoration of the Order of the Rising Sun can be added to his person. That crowning glory of a plug hat may set-tle around his ears or it may perch upon his head like half a peanut shell,

but no matter. It is the hat of civiliza-tion and the badge of respectability. "He trots out of his house looking like one of the ancient daimios, stiff after that hour Mr. Cleveland seemed of again nominating Mr. Cleveland for with the dignity of two swords. All to fail. The physicians recognized in President in 1896, but the feeling with the dignity of two swords. All to fail. The physicians recognized inthat fearful day he wears this hat of stantly the symptoms. Immediately against a third term was too general, ancient vintage like a crown, and in arrangements were made to combat and Mr. Cleveland retired to private the end he stows it away in his damp-proof chest, awaiting another festal occasion or held as an asset in his estate after death."

Wealth begins in a tight roof that keeps the rain and wind out; in a good pump that yields you plenty of sweet water; in two suits of clothes, so as to change your dress when you are out; in dry sticks to burn; in a good double wick lamp and in three meals.

## GIVES ADVICE FOR GOOD ROADS

As this is the season when a great many roads are being worked with the lie schools of Danville will take place at 7:30 o'clock next Monday night. road masters and the general public to the superiority of the Split Log Drag over the road grader as too frequently

operated.

A little observance and experience should teach any practical farmer that a much better road can be made with the drag, where the road bed has first been graded and is used for some time than can be made by a second use of the grader. Then though the old road bed be hollowed in the middle it will be evened up quite fully in a surpris-

ingly short time.

We can make the drag carry more or less dirt into the middle of the road

the mon-resident pupils, there is an unoccupied room in both the third and fourth ward buildings. In the third ward the vacant room was formerly occupied by the night school; in the fourth ward, by the grammar school, which was closed for the want of support. The problem that confronts the school board now is how to utilize the vacant space, relieving overcrowding the action of the grader and the drag in the central building or high school, without making it unnecessarily inconvenient for the pupils affected by convenient for the pupils affected by puddling. The grader lands loose dirt the chauges. One plan proposed is to keep all the pupils down town by perlands partially puddled clay in centre of the road and compacts it. The gradto retain its room in the third ward building and transferring the first ward grammar school to the mocovery ward grammar school to the unoccupi-dition to grow a choice crop of weeds, which at each drifting dust, keeps the used as a night school. This would give the third ward two grammar schools. schools.

Under this arrangement the freshman class of the high school would be installed in the room at present used dies the soil that nothing can grow upon it. The traveler as he uses the road made by the grader naturally avoids the middle and takes the smooth er sides, which, being soft, because the hard surface has been shaved off by the grader, naturally ruts up this SERPENT OF AESCULAPIUS, road bed and tends to shove it into the ditch. Then comes a heavy rain. The loose dirt holds this rain just like a plowed field. The settling of it leaves it rough, the clods and sods resist pressure, while the loose dirt settles to the bottom, and a wagon simply makes a deep, uneven rut through this soft, yielding substance, spoiling for ever

Water stays at the bottom of these ruts, and as the surface is not puddled, it is readily absorbed by the soil and this newly graded road into any sort
