FIRST CHEAP WATCH

The Story of the Famous Old Long Winding Waterbury.

SCHEME OF AN OLD COBBLER

Was picked up by a marine named Wasmouth and carried into compara-tive shelter. Wasmouth was killed a few minutes later. Evans' own ac-count continues: "After Wasmouth was killed I soon fell asleep, and when I awoke it was some time before I could recall my surroundings. The tide hed come in and the hele in How the Connecticut Shoemaker's Idea Was Taken Up and Worked Out-A Timepiece That Came to Be Known All Over the World.

In a small country town in Connecticut lived a cobbler. He was a and was trickling into my ears. poor man and a peculiar one. The boys called him a "gene," and some thought him crazy. But he kept on in the even tenor of his way, living his own life and thinking his own thoughts. One of these thoughts was that he could make a watch that would have only three wheels.

A watchmaker out of a job heard of the cobbier and called at his little shop. This was the beginning of the famous Waterbury watch, which was the first cheap watch to be manufac-tured. It is now a thing of the past. and tried to pull myself out the sand But its cheap price and its remarka-bly long "wind" (it was a stem winder) gave way and left me still lying in the and rolled myself sideways out of the

were known around the world. The Waterbury was named for the town where it was made. It had more than the three wheels that the cobtown where it was made. It has more than the three wheels that the cob-bler had planned, but the little old shoremaker's idea was the original ately at the fort. I called to him-to shoemaker's idea was the original ately at the fort. I called to him to germ from which was evolved the pull me in behind his bar of sand, but

successful cheap watch. Having got the idea, the purchaser of the cobler's rights found that the first difficulty in his path was lack of first difficulty in his path was lack of money. He looked about for a man with money enough, nerve enough and imagination enough to lead him to ren-der the financial aid without which no first step could be taken. He was found, because if was a Yankee with an indomitable will that was looking for him. "Tow much menoy will it take and

for him. "How much money will it take and how long a time do you want before you can begin to make your watches in sufficient quantities to make the

in sufficient quantities to make the thing a success," he inquired. "I will be frank with you," replied the inventor. "It will require \$25,000, and I shall need eight months for "Go ahead," said the daring capital-ist. He went ahead. He met unexpected difficulties and had spent \$250,000 and mean learning and learning capital-ist.

used up twenty-eight months before he turned out a single watch. But the capitalist never faltered. Then the factory, for which every piece of ma-chinery had to be invented and spe-cially made, turned out its first thou-sand watches.

cially made, turned out its first thou sand watches. Not one of them would go! Among other things, it was found that the sheets of brass out of which were stamped the wheels of the watch had a grain somewhat like wood. The wheels cut out round would not stay round.

A negative for the second state of the second three second states and second states

In the early days of the exploitation of various reaping machines a field demonstration, usually competitive. timekeepers to the point of perfection The good watches were tested that onl was a necessary occurrence. H. N. Casson in "The Romance of the Reap-er" tells the following story of William in six positions-lying on the face, on the back and in four positions on the edge. The maker of each part stamped his mark on the part he made, so that following story of William N. Whiteley, "the Charlemagne of the harvest field." He was as tall as a sapling and as if fault was found in that part he must make it right.

It was not not as the strong as a tree. As a professor in the strong as a tree. As a professor in the great school of agriculture he has nev-er been surpassed. He could outtalk, outwork and generally outwit the men in the years of its vogue in advertising the Waterbury watch. Some of the methods used were interesting. who were sent against him. He was a whole exhibition in himself. "I've

A negro minstrel troupe were paid to come from Waterbury, the land of eternal spring," referring to the long time required to wind the Waterbury horses through the grain and leaning watch.

One day the owner of one of these timepieces was winding it on the train. O. in 1867. His competitor was doing Across the aisle a traveler noted that as good work as he was, whereupon he his neighbor was winding his watch. It caused no thought until a second look and then a third showed the wind-ing still under way. Then the astonish-od wan probe "Unarrow of the stonishsprang from his seat, unhitched one horse and finished his course with a single surprised steed pulling the heavy ed man spoke. "Excuse me sir, but are you winding a watch?" "Yes," said the winding owner, "and I'm tired of it. You wind awhile, will His competitor followed suit and succeeded fully as well.

This enraged Whiteley, who at that time was as powerful as a young Her-This led to explanations and reyou? cules. sulted in the ordering by the stranger. "I can pull that reaper myself!" he should, turning his second horse loose bury, of 50,000 watches for the use of his business houses in the Chine track.

The Way the Police Descend Upon Them In a Raid.

SKILL, CUNNING AND DARING.

Absolute Secrecy Is Maintained by the Officials, and the Policemen Are Kept In the Dark Until the Last Moment-Getting Into the Club.

tide had come in, and the hole in which I was lying was nearly full of water, which had about covered me The police have recently carried out some sensational raids on big gaming clubs, and it may be interesting to learn how these raids are effected. could see a monitor firing and appar-ently very near, and the thought came to me that I could swim off to her if I This is he a it is done in London: As soon as the detectives' suspicions have been confirmed they apply to the com-missioner of police for a warrant to enter. The warrant authorizes certain only had a bit of plank or driftwood. but this I could not get. It was plain enough that I should soon be drowned like a rat in a hole unless I managed to get out somehow. Dead and woundofficers mentioned by name to enter the club in the name of the king. Or dinary policemen are not permitted to ed men were lying about in ghastly piles, but no one to lend me a helping hand. By this time I could not use my legs in any way, and when I dug my hands into the sides of my prison carry out a raid, but the detectives can call upon them for assistance at the critical moment. Absolute secrecy is enforced right

up to the moment of entry. There is no excitement at the station on that day, and the men on duty have no sus-picion of what is in the wind. Plans of the house are drawn and carefully studied by the raiding officers, for the doorkeeper of the club is prepared at the slightest alarm to send a warning to his customers, and every vestige of gambling apparatus will mysteriously gamoing apparatus with injectrously disappear and the raid fail. A careful-ly planned ruse, therefore, has to be evolved which will disarm suspicion.

During the day a body of "reserve" policemen will receive a communica-tion from the station that they will be tion from the station that they will be required to parade at a certain hour and they meet with no idea of what is expected of them. They are drawn up in line, and after names have been called over they are dismissed from the station one by one, with the in-junction to be in the immediate neigh-borhood of a certain street in a couple of hours and not to get near the spat of hours and not to get pear the spot

before the prearranged moment. The first officer to appear on the scene is the one in charge of the raid. He is always disgulsed and usually looks like a well dressed man about town. He passes the club carelessly, but it is sufficient for him to learn from a confederate inside that gaming has commenced. A policeman then saunters to the corner of the street and stays there as though he were on "point" duty. Then, not till then, is "point" duty. Then, not the the information of the precise club to be railed secretly conveyed to the at-tacking force in their hiding places, while the club, unconscious of its im-

pending fate, pursues its gambling. The first difficulty to surmount is to get past the burly doorkeeper. If this is not successfully done the raid will end in fallure. Presently the sound of a drunken song is heard in the distance, and two apparently rough look-ing men come staggering along. As they near the entrance to the club they

begin disputing and soon come to blows. The doorkeeper peeps through the wicket and orders the men away. One of the men rushes at the wicket and challenges the doorkeeper to "come outside like a man" and at the sam time shouts out something about th character of the house. The combat ants continue fighting, and the officer at the corner comes along and orders them away. The men return, however, to "have it out with the doorkeeper." The noise increases, attracting home-ward bound gentlemen in evening dress, who gather round and urge the

doorkeeper by this time becomes alarmed, for the rowdy crowd will frighten away his clients. Perhaps just at this moment a member of the club arrives and seeks admission. The door is opened with the utmost caution to admit him. Before he has time to fasten it the two officers hastily secure the member and rush upstairs. The two combatants were disguised police-

en and the onlookers detective As soon as an entrance into the club has been effected the constable at the corner sounds his whistle, and before the sound has died away the whole neighborhood is alive with police. If the house boasts of a trapdoor on the roof, the flash of lanterns will be seen up there, the men having been con-cealed among the chimney pots since it was dark. The front door is secured,

Some Points of Peril That Are Ancient Superstitions of the Till-Dreaded by Seamen. ers of the Soil.

MERCILESS KENTISH KNOCK. SACRIFICES TO THE GODS.

This Real Davy Jones' Locker Is a Vast Cemetery For All Ships That Are Gripped by Its Relentless Sands. Sable Island's Fingers of Death.

The exact location of Davy Jones The formal inauguration of the plow ocker is not shown on any ocean chart ing season is very ancient and still is observed in some parts of the world. extant, principally because it is a state and not a place, but if any one ocean Among the Romans by the institution of various religious festivals connect death trap deserves the title it is the Thames estuary. The British naval ed with agriculture the seasons came to be regarded with a sort of sacred department has a chart upon which it marks the position of wrecks with reverence. Before the old Roman put a black dot. On this chart the Thames the plow into the ground he went to mouth tract is a solid black spot. So numerous have been the wrecks that the dots run together. The point where the black dots actually pile one the temple of the goddess of earth, Tellus, one of whose priests performed certain propitiatory rites. Virgil in his "Georgics" advises the Roman huson top of another is the Kentish Knock bandman to observe the signs on heavand this is the place among all of the ocean's danger spots that deserves the en according to the crop he desires to produce. The time to plow for flax, title of Davy Jones' locker. At the Kentish Knock it is not keel barley and the sacred poppy was when

"balance has equalized the hours of shattering rocks of piercing points of coral that wreck the ocean travelers. It is sand, treacherous, clinging sand, day and sleep and halves the world exactly between light and shade. When Taurus ushers in the year with his grip of steel and holds it firmly while the angry sea beats it to fragmente gilded horns and Sirius sits facing the threatening bull is time for beans. For and spelt the Pleiades should Many a vessel posted at Lloyd's as hide themselves from your eyes with missing would be duly accounted for the dawn. Many have begun before Maria sets, but the desired crop has batiled them with empty cars." But first of all the poet admonishes the if the Knock sand would give up its booty. There is no hope for ship or man when Father Neptune asks toll at the Kentish Knock, for the nearest farmer to "honor the gods and offer land is twenty miles away and the nearest lifeboat at Margate, thirty actifices to Ceres." In India there are certain days when miles away. The sands of the ocean are far more

It is unlawful to plow. Mother Earth is supposed to sleep slx days in every dangerous than the rocks. The sand banks extend over more space, there-fore offer wore points of contact than In northwest India the cultivator the rocks, which usually rise in one slender pinnacle. The waters flow over them in smooth waves, and there are employs a pundit to select an auspi-clous time for the commencement of plowing. Great secrecy is observed. In no warning breakers.

ome places the time selected is in the Next to the Thames mouth tract in point of danger is the Hugll, the salt water river on which Calcutta stands. The pundit goes to a field, taking a The most trying part of a large vessel's brass drinking vessel and a branch of the sacred mango tree, which is effica-clous in frightening away evil spirits that may haunt the field. Prithivi, the voyage from New York to Calcutta is the last few miles of this calm river. In this strange river in windless weather and flat, calm water vessels have been lost, dashed to pieces on the ever shifting sand banks by the force of the tides. The sands grasp the keel of broad world, and Sesha Naga, the great snakes which support the world are supposed to be propitiated and reconciled by this ceremony. The pupthe marked vessel, and she stops, but the tide moves on with relentless force, dit satisfies himself as to the direction and the helpless ship is carried over on her beam ends. She careens over and founders with all on board. One it occasionally moves about a little to ease itself of the great burden of the broad world which it carries. The pundit then marks off an imaginary of the worst shoals in the Hugli bears the name James and Mary. It was the name of a great Indian merchant line. Five (a lucky number) clods of earth are thrown up, and water is sprinkled in the trench five times with shipwrecked on the sunken sand banks.

Another danger point dreaded by the master mariner has nelther sand nor rocks, but a great submarine waterfall. ductiveness. THE BOTTLE TREE. A Life Saver For Cattle During the

Australian Droughts. "It was like a real bottle, thirty feet

high, covered with the bark of a box tree and with a gum tree growing out where the cork ought to be. Such was the way in which an Englishman described the first bottle tre

which came under his notice, and truly one who does not know the tree its sudden appearance in his pathway, often in the midst of dense scrub, must make a vivid impression. The lower part of the trunk is thick

and cylindrical, decreasing in size to ward the top, its shape being that of a gigantic living bottle, from the neck of which spring the only branches and respect it carries to an excess the peleaves that the tree possesses. In this namely, their lack of branches for a considerable distance up the stem. considerable distance up the stem. The bark is of grayish color and is very hard, says the Philadelphia In-

wery hard, says the Philadelphia In-quirer, but the wood inside is soft and moist. The latter can be chewed in the same way as sugar cane, but as it lacks its sweet, pleasant taste it is rarely used in this way. This peculiar characteristic of the tree, however. makes it a valuable food for cattle Indeed, during the long droughts which occasionally visit Australia hun-dreds of settlers have to thank the bottle tree for saving them from ruin.

Sometimes for more than a year and in the inland districts for still longer periods scarcely a drop of rain falls. Every blade of grass is dried, tanks become empty, creeks no longer run and in many cases dry up altogether, as do nearly all water holes and lagoons; cultivation is impossible, and fodder for cattle and horses is extremely difficult to procure. Then the bottle tree comes to the rescue. Every scrub

is searched for these living bottles, and everywhere is heard the ringing of axes as the strange, attractive trees are laid low. As soon as the trunk has been strip-

ped of its bark the cattle are brought to it if within easy distance, and there they remain till neither leaves nor wood is left. In places where the settlers have no scrubs of their own they will drive many miles in order to obtain a wagon load of this great treas-

Sometimes instead of allowing the animals free access to the tree the settlers cut the trunk into strips, put the strips through the cutter and thus make a substitute for proper chaff. In many instances during a drought, except for prickly peaks and the foll-age of trees, cattle are fed on these living bottles alone, and they have been the means of saving large quantiof stock

It seems strange that in the absence of rain these trees should retain their moist interior, as the majority of oth-ers look dry and drought stricken. But throughout all the bottle tree

flourishes, lifting its dark green leaves toward the sky, whither the far and squatters turn longing eyes in hopes of the wished for rain. When the dry season ends and the land in a very few weeks is covered

with fresh green grass, the work of the bottle tree is done. But, mindful of its past usefulness, no farmer unless under absolute necessity fells this tree, and it may often be seen standing in solitary grandeur, its strange shape outlined against the blue sky, while the land at its base has been put under cultivation or has been verted into grazing grounds for the cattle.

BROILED OWL.

The Feeling In Camp Before and After the First Nibble.

I told the guides that it would be better to begin supper right away in order that we might not get too hun-gry before the owl was done. I thought them slow in their preparations for the meal. It was curious, too, for I had promised them they should have a piece of the bird. Del was generous. He said he would give his to Charles: that he never really cared much for birds anyhow. Why, once, he said, he shot a partridge and gave it away, and he was hungry too. He gave it to a boy that happened along just then, and when another partridge flew up he didn't even offer to shoot it. We

Noisy Nocturnal Rounds of an Invisible Visitor.

A TURBULENT GHOST.

QUEER DEATH OF OLD JABEZ.

The Uncanny Incident That Disturbed the Quiet of an Old Virginia Home A Nightly Tramp That Never Ceased Until the House Was Demolished.

"I am not exactly prepared to say that I believe in ghosts," said the old gentleman from Virginia, "but at the same time, in view of certain things that have been told me by persons whose reputations for veracity do not admit of a doubt, I cannot allow my self to ridicule the ideas of others who

"There is one case in particular that I know of personally and that can be vouched for by a number of citizens in the upper counties of my state, and that is the case of old Uncle Jabez Martin, who knew a number of well to do farmers in Fauquier as well as in Spottsylvania, Rappahannock and other counties in the northern part of the state. 'Uncle Jabe,' as most every one who knew the old fellow called him, had considerable of the nomad in his disposition and led a wandering, pastoral life. He was always willing

to work when any one needed his serv-ices and did a good deal of rough car-pentering in return for a 'meal o' wittles and a shakedown,' as he expressed it, and as he was pretty well known in the land of his pilgrimages it was a rare occurrence when he was not given a welcome.

"If old Uncle Jabe thought more of one family in the state thought more at another it was the Greens. Virginia, as all know, is full of Greens. An estimable crowd they are, and nearly all of them consider themselves as relat-ed in some degree of consanguinity to the others of that name. 'The Greens of Virginia is the finest tribe of that name in seven states,^{*} was the con-stant boast of Uncle Jabe, and above and beyond any other Green anywhere he placed Marse Dickle Green of Fau-quier, and that is where my ghost story, if you will please to consider it

as such, begins. "One wild night in the month of Ocober not very long before the war the old wanderer made his appearance at Squire Green's. Mr. Green was called squire Green's. Mr. Green was called squire by virtue of being a justice of the peace. Jabe wanted his usual 'meal o' wittles and shakedown ' and it was at his service, as usual, and after a good supper he sat on the back steps of the house, smoked his old

pipe for awhile and then went to bed "Squire Green was engaged in some work that kept him up until midnight, and as the clock struck 12 he heard a

heavy sound on the stairway. It seemsome one was coming down the steps with heavy irons on the legs. The sound was carried to the door, which was opened noisily and then closed with a terrific crash

"Thinking it strange that old Jabez Martin would be guilty of making such unnecessary noise, the squire rushed to the door and opened it. The moon was shining in all its beauty, and everything was perfectly calm and nobody in sight. Back again went the surprised squire and up into the attle chamber, where Martin always slept when he made bis calls. He found everything calm and quiet there. It was the quiet of death, for old Uncle Jabe was lying supine on his back, with his glassy eyes staring right up to the ceiling, where the squire left him until the morning.

"When he related the circumstances in the morning it seemed that every other one of the house had been disturbed by the uncappy noises. The strange part of it is that next night the same sounds were heard again, even to the slamming of the door, and an investigation proved that there was no person to make them. There were no cowards in Squire Green's family, but the noises disturbed them, and when they were heard, as they were, frequently at midnight they became so used to them they would simply remark that 'Uncle Jabe was tramping

again' and go to sleep again. "Friends and neighbors who knew of the ghostly exercises were averse to

must remain secluded during the fol-lowing day; no salt must be eaten, no money, grain or fire given away. Among the Karnas before plowing

The

the farmer makes a burnt offering of butter and molasses in his own field and again at the village shrine. The Chinese begin plowing on the first day of their solar year. Anciently the rites which were celebrated by the Chinese at plowing time were elaborate, but rationalistic sovereigns elim insted one expensive religious rite aft-er another until nothing was left ex-cept the imperial act of homage to heaven and earth and agriculture in

the ceremonial plowing. The Slamese observe a rite called Raakua about the middle of May. which is preliminary to the plowing season, and it is not proper for any one to plow until the ceremony is over. The court astrologers determine the time for it. On the day fixed by them the minister of agriculture, who is always a prince or nobleman of high rank, goes with a procession to a piece of ground some distance from the capital. Where the festivities are to take place a new plow, to which a pair of buffaloes are yoked, is in readi-ness, decorated with flowers and leaves. The minister guides the plow over the field, closely watched by the spec-tators, who are especially interested in the length and folds of the silk of
