KISSES ABOUND IN DEADLY GERMS

Kissing is dangerous and a menace. In the paternal kiss, in the cousiniy kiss, in the "best girl" kiss and in the woman to woman kiss, germs abound, practically all infectious diseases can be contracted by kissing, and in some this is the most prolific cause of infection. Kissing the cheek may not be satisfactory, but it is safe. Look out for the strange kiss or you may be sorry.

These danger signals on kissing have been flashed in an editorial by Dr. J. V. Shoemaker, of Philadelphia, in the Monthly Cyclopedia and Medical Bulletin.'

Dr. Shoemaker, who wrote the article in question, gives his motives as fullows:

"After seeing a whole family wiped out by a loathsome disease contracted by kissing, I resolved to do what little lay in my power to protest against this needless exposure that threatens us all. Next to the indiscriminate kissing of persons the kissing of pet animals is almost as dangerous. Although it is not generally known, all pet animals can have most human infec-

tions diseases, and these maladies can and are transmitted from the animal to the owner or the owner's friends through kissing.

Typhoid fever can be transmitted through the month, and I had a case not long ago that proved it. In a students' boarding house in West Philadelphia an epidemic of typhoid fever appeared which in a short time put 22 students on the sick list. The water was all right, so I tried the milk. This is what I discovered. On the farm where the milking was done one of the hands had walking typboid. The milk was siphoned into beatles, and this man would start the flow by sucking on the pipe. After he had done this I took a bottle, carefully wrapped it up and carried it home for examination. I found typhoid germs present in great quantities." In the editorial in the Medical Bul-

letin Dr. Shoemaker referred to a number of instances where kissing was the means of transmitting disease.

FUNERAL OF

STEPHEN JOHNSON

The funeral of Stephen Johnson whose death occurred Saturday, took place Tuesday afternoon and was largely attended.

The services were conducted by the Rev. William Brill, passor of St. Paul's M. E. church, assisted by the Rev. I. D. Ulrich, pastor of the Trin-ity Lutheran church. The pall bearers were : Hon. James Foster, Hiram Weaver, Jacob Sloop, Howard Reppert, William Maiers and J. W. Swarts.

The following persons from out of town attended the funeral: Mr. and Mr. D. W. Morgan and children of Philadelphia: Robert Johnson, daughters, Alice and Grace, Mrs. Jones and son, and Mrs. Rathstetter, of Watsontown; Norman Rauk, of Frackville: Mrs. Edwards and son, of Plymouth; Mr. and Mrs Joseph Acor, Mr. and Mrs. Isaac Acor, Frank Acor, and Mr. and Mrs. Black, of Exchange.

K. G. E. HELD ANNUAL ELECTION

Montour Castle, No. 186, Knights of the Golden Eagle, of this city, held its election on Monday evening and chose the following officers for the ensuing term : Noble chief, Clark Rishel; vice chief. Roy VanGilder, high priest, Bruce McCracken; venerable hermit, George W. Robinson. ; keeper of exchequer, F. M. Herrington; clerk of

IT CLEANS THE SHIPS. Sailing Through a Volcano Crater the Aegean Sea.

In the Aegean sea a vessel may sail into the top of a crater, and, though it is hard to find anchorage there, yet a here sail through is appreciated great-ly by captains, because it cleanses the bottom of the ships from marine

growth. More than 2,000 years ago the isle of Santorin was split in half by an earth-quake, with the result that what was once the crater of a volcano is now crescent shaped harbor. Two glisten-ing white towns of Thera and St. Nicholas are perched on the summit of the steep cliffs, whose dark and dismal bue is similar to that of the top of Ve are large numbers of windmills, with many sails, arranged in a perfect of cle. These are evidently employed for crushing the olives, which, along with the terraced vines, are the staple prod-uct of the island. The Santorin wine is

of excellent quality and is highly appreciated in the Levant. preclated in the Levant. Between the main island on the east and the smaller, Theresia, on the west. are the three small Kaumene islands all of which have come into existence all of which have come into existence since the original earthquake, while the largest of the three was "born from the sea" less than 200 years ago, showing that the center of the old volcano has still a certain amount of activity. The water in the harbor into which

the sulphurous streams from this vol canic island rain has a peculiar prop-erty which completely cleans off growths of every kind from the bottom of any ship.

"Real Sporty" Woodsmen. The chief recreation of the woods men of the Puget sound country is to go to town on Saturday nights. As a valley dweller explained: "They've go money, and they just blow it in. That there is the logger style of it. There's places of amusement in the town They can go to the library and sit down or go to a hotel and sit down, but that don't suit 'em. No, they eithe get drunk or go to church. Some take in both. I've seen 'em at church pretty well londed. 'Bout 'leven or twelve o'clock they start for their camp. Mostly they hire a rig and go eight or ten fellers to a team. Oh, they're sporty There's nothing too good for the log gers and, take 'em as a whole, they're the best class of men I ever run up against."-Clifton Johnson in Outing Magazine.

Opulence In Sight. "Well," demanded the man who was baving his fortune told, "what do you

see?" "You are married," said the lady who was examining his palm. "Yes. But I knew that before I came

here." "You have always had to fight your

way ahead-that is, you have pro-gressed by hard work. You have never been favored much by luck." "Very true. Still, that isn't exactly what I came here to find out. Can't

you tell me something about the fu-

You are going to live long. "Your life line is very strong. And here I see something very important-some-thing that will encourage you. Your salary is going to be increased." "Good. That's the kind of news I

want. You're sure about it, are you?' "Yes. You will get it before long." "And is there anything to indicate about how much it is to be increased?" "It will be much larger than it is now. Let me see. Yes. It will be as large as your wife tries to make her friends think it is at present."

He could ask no more. With a feel-ing of courage in his breast he handed out \$2 and went away to the triumph that awaited him. — Chicago Record-Herald.

Managing Small Sailboats

It is quite a trick to lower a main-sail properly. In the first place, the hoops should be just large enough --not so large, however, that the sail does not set close to the mast. Lower the throat first and follow it with the peak. If the peak is dropped first, says a writer in Country Life In Amer-ica, the sail will not come down. It coes without saying that the sail must be shaken when you want to lower it. To lower a centerboard when un-der way put the helm up and keep the boat off. A small boat can be stop-ped by putting the helm up and down across the boat quickly. This is use-ful in coming up to a dock or moor-

YOUNG SKATER'S NARROW ESCAPE

But for the timely presence and eroic efforts of Tarring Seidel, Augustus Earp, a ten-year-old boy of Gulick's addition, would have lost his life by drowning while skating on the caual near the Brake Beam works on Tuesday afternoon. As is well known the water in the

canal at that point is dammed up so that its depth is quite considerable. The water is covered with very thin

were looking on he sank out of sight. Tarring Seidel, who was at some distance, was attracted by the noise and hurried to the spot. He arrived just in time to see the boy's head reappear above the water. He tried to get hold of the boy's hair, but did not succeed and the lad sank for the second time.

Mr. Seidel waited until the boy came up again, when he succeeded in getting a good hold of him. The drowning boy, however, in his desire to be saved, clutched his rescuer in such a

dragged Mr. Seidel along down. For awhile it looked as though both dragged Mr. Seidel along down. For awhile it looked as though both might drown but the young man at-tempting the rescue was equal to the emergency and after a desperate struggle he succeeded in crawling out on the bank dragging the boy with him.

His Gallantry.

His Gallantry. "See that man who just gave his seat to a young woman?" queried an elevated railroad passenger. "Queer case that. Never encountered one before just like it. "He's not a New Yorker, he is not a ready maker of friends, and he is so diffident where women are concerned that he really has not one among his

acquaintances, with the possible ex-ception of a landlady and a laundress. "Yet the fellow has a longing for feminine recognition. I happen to know that he always relinquishes his seat to a woman where the oppor-tunity is presented, and I also know that his only reason for doing so is the hope of receiving a smile and a "Thank you'in return. It's like a bone to a hungry dog. Queer case, don't you think?"-New York Globe.

The Suicide Symphony. The idea that music may be harm-ful-that it can create a fever in the blood dangerous to life and reason-will come as a revelation to many. Friedrich Nietzsche, the well known German philosopher declares that German philosopher, declares that there is something in some music, most notable in Wagner and Tschai-kowsky, which acts unfavorably on the brain and nerves of many people

Tschalkowsky's baleful influence can-not be denied. He destroyed himself after composing his famous "Sixth Symphony," and, as several have died by their own hand after playing it, it has come to be known as the "suicide symphony."

Extravagant. There's a resturint round the cawner where you can git the best meal this side o' Chicago if you don't mind its bein' a leetle expensive. They'll sock you for 35 cents, but, by gum, it's wuth it!-Chicago Tribune.

The Origin of a Miserable Joke Confucius had just met William Penn at one of Cleopatra's 5 o'clock teas.

"William Penn?" he said. "William enn? Seems to me I have heard of Penn? you, sir.

"Yes," said Penn, with a pleased smile. "I am the man who was might-ier than the sword." "Ah, yes!" said Confucius. "You are also the man who invented sleep, are

day.

Sufficient to Kill. The discoverer of prussic acid was instantly killed by inhaling one whift of his own handiwork. Pure prussic acid is never sold or handled. The smell of it is always fatal. It kills not in three minutes or half an hour, but the instant it enters the lungs as a gas. The mixture or-dinarily sold as prussic acid is 98 parts water to two parts of the drug. Even in the third ward yesterday when a bad case of scarlet fever was discover ed in a family, three children of which water to two parts of the drug. Even in this form it is very deadly. A 20 per cent mixture of the acid would kill nearly as quickly as if pure. Atropine, though it has no harmful
