Look After Your Property.

It is a safe rule in this world to look carefully after the details of your own property. Be sure your title deeds are recorded, that your insurance is kept up, that you alone have the key to your strong box in the safety vault. Do not leave your securities with your broker. If he is doing a conservative business he has no need of them. If he isn't you don't want him to handle your property. The wonder is that with all the confidence reposed in financial matters there are so few defalcations. There is no use in making it easy for some one to get your property. In this world it is hard for most persons to acquire anything, and they should be careful to the last degree in seeing that they are fully protected in it.—Philadelphia Inquirer.
