Harrisburg, Oct. 5. There has developed in the present political campaign in Pennsylvania a remarkable condition which will un-questionably result in the polling of a large vote for the nominees of the Re-

publican party. A sentimental phase of the canvass which has been the subject of wide spread comment is the outgrowth of "home week" celebrations which have been held recently at different points

throughout the commonwealth. It is manifested in an unusual dis-play of state pride, of love for the grand old commonwealth of Pennsyl vania and admiration for its traditions and glorious record.

The home coming of so many former citizens of the state as the gatherings held during the last few months gave Conger. Here the party became des-perate and split. Seventeen of the twenty-five members, under Lieutenan opportunity for the people to cor

The passage of the "Jones dirt road

bill," giving the respective townships a liberal portion of the road tax paid in cash, and the appropriation for the payment of the 15 per cent formerly allowed, has been the subject of favor able comment in the rural districts.

State Without a Debt.

The fact that Pennsylvania is the only state in the Union which is practically out of debt has been the s of gratification to every citizen of the commonwealth.

It is also the only state in the Union which collects no state tax upon real estate, horses, sheep, cattle, farm im plements or other personal property of any kind save only money at in-

Professor Donald McMillan, a mem-er of the Peary north pole expedition, has made some important discoveries tending to prove that the frigid zone was once hotter than the equator is at present. He found large numbers of vegetable and marine fossils. In a huge rock split open by frost the per fect imprint of a great tropical fern was visible. The petrified stump of a tree eighteen inches in diameter was

found, while there were other evidences of whole forests in a state of petrifaction. Some fine coal seams were also located. Near Black cape

How to Serve

Serve them with cream, like other cereals. Or serve them with fruit.

Serve them, like crackers, in a bowl of milk. Or serve them as they are in the package.

However you serve them, you'll find them the most enticing foods that you know.

Think of whole wheat or rice kernels puffed to eight times natural size. Made four times as porous as bread.

Puffed Wheat-10c

These are the foods invented by Prof. Anderson, and this is his curious process:

The whole wheat or rice kernels are put into sealed guns. Then the guns are revolved for sixty minutes in a heat of 550 degrees.

That fierce heat turns the moisture in the grain to steam, and the pressure becomes tremendous.

(10)

Unbroken kernels, crisp and nutlike, ready to melt in the mouth.

Digestible kernels, with every starch granule literally blasted to pieces.

Do you wonder that such foods have jumped into such popularity?

Can you wonder that seventeen million dishes were consumed by people last month?

See if your folks like them.

Then the guns are unsealed, and the steam explodes. Instantly every starch granule is blasted into a myriad particles.

The kernels of grain are expanded eight times. Yet the coats are unbroken, the shapes are unaltered. We have simply the magnified grain.
