Danville, Pa., Jan. 13, 1910.

WOMAN CAUGHT CHICKEN THIEF

Elsie Walburn, of Strawberry Ridge R. F. D. No. 2, ran down a chicken thief on Saturday and now has him a prisoner behind bars.

When Miss Walburn visited her chicken coop in the morning she discovered that all that remained of three young chicks were blood and feathers scattered about on the floor. An investigation revealed the tracks of some small animal leading from the coop to a boardwalk a short distance away. Raising one of the boards in the walk she found the dead chicks partly de-voured, and while sadly gazing on the remains a large white weasel came from another part of the walk calmly watched proceedings. Determined not to let the thief escape unpunished, Miss Walburn contrived a neat plan for his capture.

Stretching the mouth of a sack over a hole at one end of the walk a fire which furnished a plentiful supply of smoke was built at the other end. a few minutes Mr. Weasel was a prisoner in the bag. He is a fine specimen, measuring over two feet from tip to tip, with about two inches of black on the end of his tail. Fourteen chickens have been killed this fall at the Walburn place by minks and wea-

THE AMERICAN WOMAN.

Her Position Here and Its Influence In the Old World.

There is no doubt that the most in-teresting thing to the European who lands on the northern shores of the new world is the American womanthat happy, victorious beroine of mod-ern femininism who has discovered how to extract from the new condition of woman all the advantages with almost none of the inconveniences; that being who has known how to assume the masculinity in all that regards independence and liberty of action and remain feminine in grace, charm and altruism; that American beauty, that American genius, whose wonders are seen and felt in all the American and European reviews, whose writers de-clare her to be engaged almost en-tirely in severe study, in masculine work, sport and similar occupations.

Europe, moreover, is right. The American woman is not only one of the most interesting phenomena of North America, but is also the phenomenon of the new world that might have the greatest and gravest effect on the old, shaking on their founda-tions the essential principles of our female instruction and training, over throwing the society of the old conti-nent or continents, which rest to a greater extent than is realized on the antique functions of woman in the family and in society.—Gina Lombros Ferrero in l'utnam's Magazine.

THE RACE FOR RICHES.

Is Wealth That Cannot Be Enjoyed Worth the Price?

The writer once inquired of a very successful man; "When do you ever get a moment's

time for your own self-to be your-self and to think your own thoughts? Do you ever get a time like that?" The very successful man hesitated

for a moment and then replied:
"Why, yes, I get such a time while
I am being shaved in the morning."

Is success really worth the price when it must be paid for at such a rate? Of what use are mansions and country houses and great estates if one has no time to visit them and enjoy their beauty? Why should one collect through agents the most exquisite works of art if he cannot find more than a casual half hour in which to view them? What are wife and children if you are always hastening orld for too preoccuple to give them any serious thought or to receive the pleasure which their company could afford you?

And yet there is one sole satisfaction—if it be a satisfaction. Millions of your fellow countrymen and countrywomen will believe beyond all doubt that you are really happy and

Apparently ice is ice, of course; but, strangely enough, there is a marked difference in it. Sea water and salt water in general freezes at a lower temperature than pure water, in doing which a part of the salt separates and the ice when melted gives water that is fresher than the original, and along this same line there exists a marked difference in form between the icebergs of the two hemispheres. Arctic bergs are of irregular shape, with lofty pinnacles, cloud capped towers and glittering domes, whereas those of the southern waters are flat topped and solid looking. The former reach the sea by narrow flords, while the latter are more regular in formation, reaching the open sea by the way of wide passageways and not subject to the grinding and breaking efforts of their northern relatives.—Pittsburg Press.

Why She Staved at the Foot. Being upbraided by her mother for being the lowest in her class, little Ma-bel exclaimed in tones of injured inpocence: "It ain't my fault. The girl who has always been foot left school.

Hard on the Egg.
Fat Lady-Yes, sir; that's the beauty
of keeping fowls. If hever I run short

o' meat or I'm in a 'urry, I always fall back on a hegg.-London Bystander. Be true to your word and your work and your friend .- O'Reilly.

Montour American SIX MET DEATH, SIX BADLY HURT

WILKES-BARRE, Jan. 12. Five men and a boy were killed and six other men badly burned by an ex-Nottingham colliery of the Lehigh and Wilkes-Barre Coal company at Plymouth last night. The men were engaged in sinking the shaft and at a point several hundred feet below the surface broke into a gas feeder, the explosion following. All the victims with one exception are foreigners.

large accumulation of gas in the slope. their places before the fire boss made their places before the fire boss made nurses.

his inspection.

The force of the explosion was ter rific, all the men being hurled a considerable distance by the concussion treasurer, F. G. Yorks; secretary, John and their bodies badly mangled.

Spider Web as a Styptic A spider's web, an old cure for bleeding, is an uncleanly application, as it is generally procured from the most neglected corner in a room and is con-sequently laden with dust. The earliest reference to this remedy in our anguage seems to be in a translation of that curious encyclopedic work of the middle ages "De Proprietaribus Rerum." where we read, "Coppe webbe that is white and clene staunchyth blood." But as I have seen it applied to a cut unger it has been anything but white and clean. There is another reference in Shakespeare's "Midsummer Night's Dream," when Bottom, the weaver, says to the fairy Cobweb, "I shall desire of you more acquaintance good master Cobweb; if I cut my fin

ger I shall make bold with you."

As a styptic, however, it must be ac knowledged a spider's web as some-what effective. In a case of excessive hemorrhage after the extraction of a tooth a dentist applied a cobweb with most satisfactory results.-Hospital,

Military Rats. An old military dictionary tells us that rats were sometimes used in war for the purpose of firing powder magazines by means of lighted matches tied to their tails. We cannot offhand re-call any historical instance of this, but presumably it did occur, seeing that Marshal Vauban laid down special rules for counteracting it. Anyhow, the dodge is as old as Samson, who, you may recall, used foxes in a similar way for a somewhat similar purpose. As to the royal rat catcher, we may

add that be had a special official livery According to Pennant's "British Zoology," it consisted of a scariet costume. embroidered with yellow worsted, in which were figures of mice destroying wheat sheaves. By the way, rats were not the only animals honored with a special catcher. Leicester, for instance used to pay a yearly salary of £1 11s. 6d. to its municipal mole catcher. — London Standard.

The Man-of-war Bird.

The frigate pelican, or man-of-war bird, is usually met with by travelers in the tropics. Although when stripped of its feathers it is hardly larger than a pigeon, yet no man can touch at the same time the tips of its extended wings. The long wing bones are exceedingly light, and the whole apparatus of air cells is extremely developed, so that its real weight is very rifling. It flies at a great height above the water and from that elevation pounces down on fish, especially preerring the poor, persecuted flying fish for its prey. According to some au-thors, the name of man-of-war bird was given to it because its appearance as said to foretell the coming of s ship, probably because the frigate peli-can and real frigates are equally adverse to storms, and both like to come into harbor if the weather threatens.

Drinking and Smoking In Korea. The Koreans are inveterate smokers of green tobacco, which they use in pipes with tiny bowls and stems two or three feet long. They stick their pipes down the back of the neck when not using them.

There is a deal of drinking, too,

though they have many proverbs against it—"Heaven and earth are too small for a drunken man," "White whisky makes a red face," "There is no bottom to the appetite for drink."

Millet and "The Angelus." It was only after long years of strug-gle and dire poverty, through which Millet was consoled and supported by his wife, that the peasant painter was able to take the three roomed cottage at Barbizon and "try to do something really good." It was then that he be gan to paint that most beautiful "poem of poverty," "The Angelus," which is today one of the most valuable pictures in the world. Again and again he threw aside the picture in despair of ever finishing it to his satisfaction, and as often his wife replaced it on

the easel and induced him to continue.

On one occasion he was so incensed at not being able to produce a certain effect that he seized a knife and would have destroyed the canvas and ended the matter once for all had not his wife fortunately seized his hand and induced him to give the picture another trial. Thus it was that at last "The Angelus" found a place on the walls of the Louvre The success it won en couraged Millet to paint many more pictures and thus place kimself among the immortals in art.

It was Senator Evarts who paid this compliment to the police of New York at an annual dinner of the force: "As at an annual dinner of the force: "As Compared with the press you exhibit a striking contrast. You know a great many things about our citizens that you don't tell, and the press tells a great many things about our citizens that it doesn't know."

His Role.

"That man made an immense for-tune out of a simple little invention."
"Indeed! What did he invent?"
"Invent? Nothing, you dub! He was the promoter!"—Cleveland Leader.

THE JOSEPH RATTI HOSPITAL

The growing popularity of the Joseph Ratti hospital at Bloomsburg has rendered it necessary that the instituplosion of gas in the new shaft of the tion be enlarged. At the annual meet ing of the corporation it was decided to attempt to raise a fund of \$20,000 in Bloomsburg and nearby towns for the purpose of erecting an additional building to contain four public wards, two of which will be for male and two for female patients. There will also be fourteen rooms for private patients. It The mine is not considered a very gaseous one, and the officials are at a loss to know why there was such a operating room, to administrative purpose. The old building with the exception of the operating room, to administrative purpose. The old building will also conposes. The old building will also con-

The officers at the meeting were reelected as follows: President, A. B. G. Harman.

A committee to solicit funds through out the entire valley will be appointed in a day or so and will at once begin work. It is believed that if the above named sum can be raised, the state can be relied upon fcr \$10,000, which will insure the new building and will afford sufficient means to keep the hospital up to the highest standard of

The Joseph Ratti hospital has made a very fine record. During the year there was a mortality of only four per cent. It is also claimed that during that time there were forty successful operations for appendicitis at the hospital.

DANVILLE'S PART.

The time was when Danville aspired to possess a hospital of its own. The agitation, however, seems to have entirely died out. During an interview yesterday a physician of town stated that he could not see that conditions Paul P. Swentek, 3rd ward, Danville, here warrant a hospital-considering the cost of erecting a building and the expense of maintenance. In view of the high degree of efficiency attained by the Joseph Ratti hospital and the excellent facilities for travel between Danville and Bloomsburg it was his opinion that our town in the matter hospital accommodations is pretty well fixed and that our citizens, they have any money to spend in that line and desire to appear really ap preciative, can do no better than longte something to the Joseph Ratti hospital as they will have an opportunity to do in the near future.

It was learned yesterday that prac tically all the time there are one or more patients from Danville under ent at the Joseph Ratti hospital and that at least twenty-five Danville people are treated at that institution each year.

The rates are reasonable, being \$12 per week for a room. For the wards the charges are only \$7 per week. In some cases reductions have been made to suit the circumstances of the patient. The physician above quoted is authority for the statement that no person in need of treatment is ever John Kranack, 3rd ward, Danville, turned away from the hospital even if without a cent of money.

CONQUERED HER RIVAL.

Pretty and Pathetic Story of Jenny Lind and Grisi.

Jenny Lind and Grisi were both rivals for popular favor in London. Both were invited to sing the same night a a court concert before the queen. Jen ny Lind, being the younger, sang first and was so disturbed by the fierce, scornful look of Grisi that she was at the point of failure when suddenly an

inspiration came to her.

The accompanist was striking the final chords. She asked him to rise and took the vacant seat. Her fingers wandered over the keys in a loving prelude, and then she sang a little prayer which she had loved as a child. She hadn't sung it for years. As she sang she was no longer in the presence of royalty, but singing to loving friends in her fatherland.

sortly at arist the plantive hotes floated on the air, swelling louder and richer every moment. The singer seemed to throw her whole soul into that weird, thrilling, plaintive "pray-er." Gradually the song died away and ended in a sob. There was a si-lence—the silence of admiring wonder. The audience sat spellbound. Jenny Lind lifted her sweet eyes to look into the scornful face that had so discon certed her. There was no fierce expression now. Instead a teardrop gilstened on the long, black lashes, and after a moment, with the impulsiveness of a child of the tropics, Grisi crossed to Jenny Lind's side, placed her arm about her and kissed her, uttering regardless of the audience.

Plan to Aid Mine Workers.

With the assistance of mine operators the Young Men's Christian association in eastern Pennsylvania has begun a campaign to establish mining institutes throughout the anthracite region. Bases of operation are being established at several points. One of the principal objects of this movement is to afford opportunities to the foreigners in large numbers who, for the most part, are untrained in mining and ignorant of the English language. C. L. Fay, the organization's mining work ecretary, says that meetings held at Carbondale, Scranton, Wilkesbarre and other cities and towns have been un-usually successful. In the southern district the Philadelphia and Reading company runs special trains for employees to attend the meetings.

May Test New Steel Furnace. There is a possibility of a test of the electric steel furnace being made at Gary, Ind., which is the only at tempt of this character ever made in the United States. Some minor experi-ments in this direction have been made abroad.
