Nearly all afternoon the telephone operators at the exchanges at Straw Ridge, Exchange, Jerseytown and Millville were on the jump. Many people saw the animal as it made its way from Jerseytown north west to within half a mile of White Hall and thence to Ottawa. As each person sighted the dog the telephone was used to report the event ahead.

The dog was first seen yesterday shortly before noon at the farm of Roy Werkheiser, about a mile and a half from Jerseytown, where Mr. Werk-heiser's dog was bitten. From there the dog came into Jerseytown and bit the dogs of O. P. Shultz, J. J. Kramer and John Pegg, making off then to

HIS TAPESTRIES.

The Gems the Gellector Bought and Showed to the Expert.

That the collector falls into a trap occasionally is shown by an episode which we recall. An enthusiastic purward White Hall.

Between Jerseytown and Ottawa several people tried to get a shot at the animal but failed. At White Hall D. animal but failed. At White Hall D. animal but failed and several people tried to get a shot at the fered in Paris a masterpiece executed on a large scale and held at a large figure. Consulting an expert, he was a several to buy, but the sum demanded eemed to him at the moment a good deal to invest in a tapestry, and he let the opportunity pass.

A year or so later he met his friend,

the expert aforesaid, and asked him to from to his house to look at two tapes-ries he had just secured. "They are smaller," he said, "than the one you advised me to buy and which, to tell the truth, I have always regretted, and I paid twice as much for them as I was asked to pay for that glorious piece, but while it seemed a fearful lot of money to spend I simply couldn't resist the chance."

The specialist in tapestries walked into the gallery of the proud collector and gazed upon his prizes. He gazed for a time in silence and then had to be very guarded in his speech of congratulation. He was looking at the original tapestry, which his friend could have had for half the money, now neatly cut in two and supplied with borders. He never revealed to the victim of this ingenious little game what precisely had happened.—New York Tribune.

The famous Antigua Mines of Palmillas, Sinaloa, first opened in 1806 by the great Spanish mine operator, Miguel Felix, and now the property of the Mexican Mining Association.

Association Stock is now selling at the low price of 5 cents per share in order to provide a working equipment for these mines and to replace the milling and smelting plant destroyed during the revolution. We cannot maintain this low figure.

The PALMILLAS mines of the Mexican Mining Association are in the same district as the world-famous Bonanza, Guadalupe de los Reyes, with over 100 years of continuous production, now working 1,000 men and credited with a production of \$100,000,000. In buying Mexican Mining Association at 5 cents you stand the chance of similar immense profits

The ASSOCIATION now ewas seven (7) large mines in Sinaloa, Mexico, upon which more than \$30,000 worth of work has been done, as follows:

PALMILLAS CONSCLIDATED, consisting of three (3) mines—COLON, BALTAZARENA, and PALOS DULCES, shippers of High Grade, and containing a large tonnage of milling silver ores. ESPANOLA and MAGISTRAL two (2) large copper-silver mines, the former well developed, and the two

forming a magnificent smelting proposition. ROSARIO and TAHONITAS, the former a very large low grade gold mine, the latter a rich silver lead mine, near enough together to be worked under one management.

We believe that these SEVEN mines will be the basis for the greatest mining enterprise on the Western Coast of America. Besides our operating department in Mexico, we maintain a selling organization in the great mine buying centers of the world, London, Brussels and New York City.

Mexico has produced to date over forty-five hundred millions of dollars in silver alone, besides hundreds of millions in gold, and is to be the great gold and copper producing region of the future. The West Coast region, though barely touched as yet, has produced, according to our engineers' estimates, over nine hundred millions. Do you not want your share of this immense wealth? If so, the MEXICAN MIN-ING ASSOCIATION is your great chance.

As a text to his work, Mr. Rogers compares Pennsylvania with other States in the matter of potato growing. Maine is shown to stand seventh in notate acreage planted having 116. 000 acres under cultivation for potatoes in 1908, while Pennsylvania at the same time stood third with 277,000. Mrs. Geisinger's building next to the Maine, however, enjoyed an average of 225 bushels to the acre, being at the head of the list; no other State reached 100 bushels to the acre. "That this is wholly or largely the result of better climatic and soil conditions in Maine I do not believe. The conditions in Maine one year with another may be, and probably are, more favorable than the rule in Pennsylvania. THE COVETED PLANT.

Just a Bit of Human Nature In a Florist's Shop. Two little girls entered a florist's

shop. So near each other in size were they that they would have been taken for twins. They had 20 cents—10 cents apiece—and with this sum saved from pennies for some time back they were going to buy a plant for mamma. One stepped out a little in advance of the other when the door closed behind them. The other was shy, looking them. The other was say, looking timidly, but confidently, at her sister. The woman in charge of the small shop looked up as the two mites of humanity paused in front of her. "Well?" she said encouragingly.

"We want to buy a plant," said the little spokeswoman. Then she added, in order to avoid later embarrassment, "The cheapest one you've got." "Ah," said the florist, going to the
