ANSWERED THE FINAL SUMMONS

In the death of James Shultz, which occurred about 11 o'clock Sunday night, Danville loses an old and representative citizen, widely known throughout Montour and adjoining counties. The cause of death was a complication of diseases, which entailed great suffering on the deceased.

ANOTHER DOG ON THE 4TH DEVELOPS RABIES

Another case of rabies has developed in Danville, the dog infected be longing to Isaac Stein, the shoemaker. A diagnosis of rabies was made by Dr. J. O. Reed Sunday morning, after which the dog was killed.

The veterinarian considers the case shown by the dog that figured in the recent outbeark of rables, the head of which was sent away for examination. In order that there may be no uncertainty in the present case the head of the dog killed Sunday was also sent to the laboratory of the State Livestock Sanitary Board for a microseopic week before a report is received by the veterinarian

Meanwhile it is Burgess Amesbury's opinion that the community should be placed at no risk. He is in favor of establishing a general quarantine against dogs in Danville, if not throughout the whole county. He immediately took the matter up with the president of council Sunday and the result is that a special meeting of that body was called for 10 o'clock Monday morning, the object being to consider the question of declaring a general quarantine against dogs. Mean-while the veterinarian in the case, who under the rules becomes an agent of the State Live Stock Sanitary board has taken the matter up with that body.

There is no question as the attitude of the State Live Stock Sanitary Board in the premises. Should council deem that conditions warrant it the board will establish and maintain a general quarantine against dogs-provided the borough officials will agree to effectu ally enforce the provisions of said quarantine.

There is more Catarrh in this section of the country than all other discases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials.

WHAT THE KIDNEYS DO

Their Unceasing Work Keeps Us Strong out of town.

Their Unceasing Work Keeps Us Strong and Healthy.

All the blood in the body passes through the kidneys once every three minutes. The kidneys filter the blood. They work night and day. When heatthy they remove about 500 grains of impure matter daily, when unhealthy some part of this impure matter is left in the blood. This brings on many diseases and symptoms—pain in the back, headache, nervousness, hot, dry skin, rheamatisms, gout, gravel, disorders of the eyesight and hearing, dizziness, irregular heart, debility, drowsiness, dropsy, deposits in the urine, etc. But if you keep the filters right you will have no trouble with your kidneys.

Jacob W. Miller, 610 Ferry Street, Danville, Pa., says: "In 1907 I took Doan's Kidney Pills procured from Hunt's Drug Store and they rid me of a severe attack of backache, accompanied by a kidney weakness. I know of several other people who have taken Doan's Kidney Pills with the best of results."

The Castle of Despond.
One of the finest French renaissance buildings in France is the Castle of Despond, famous in the legendary lore of the Toulousain country in which it stands. Over the window of one of the inner courtyards is sculptured in the stone a head above the motto, "Plus d'Espoir." These were the last harvest. "Plus d'Espoir." These were the last words of Rose de Martial, whose story has been sung by the poets of Toulouse. She was the daughter of the house of Martial, to whom the castle belonged, and she was courted by the lord of Castelnat, whose manor she could see from her window. But all could see from her window. But, al-though she was beautiful and tender hearted, the lord jilted her, and she dearted, the ford jinted her, and she fell into a melancholy. She sat every day by the window, whence she could see the fickle lord of Castelnat's magor. One morning he passed by in the valley below. She sang to him, but he never looked up. "Plus d'Espoir!" she cried and threw herself out of the window, on to the days below. of the window on to the flags below. where she was killed. The manor of Martial was known thenceforward as the Castle of Despond. The fine building was falling to ruins when M. Fenaille bought it, and he had it com-

DEATH RATE

During June seventeen deaths, including four at the hospital for the insane, occurred in this district, which is only two more than last month, when the mortality was lower than at any time since the bureau of vital statistics was established. The general health is shown to be very good, only a few cases of contagious diseases being reported.

There were no deaths from contagions diseases. Only one case each of diphtheria and scarlet fever was reported during the month. In May there were four cases of diphtheria, indicating that this dread disease, which we have had with us so long, is near the vanishing point. During May no scarlet fever was reported, notwithstanding that it had been lurking in Danville for many months. Its reappearance during June shows how difficult it is to eradicate this malignant disease.

There were two cases of typhoid fever during June, which is not a bad report for this time of year. One case of measles and three cases of whooping cough were reported.

In May there were twenty-two births; in April twenty-four, numbers which are well above the average death rate
