ROOSEVELT SEES FOREIGN ELEMENT

WILKES-BARRE, Aug. 3.

The Black Hand, the Mafia and "undesirable" citizens among the sylvania were investigated this morning by ex-President Roosevelt.

Coming to this city at midnight the colonel, accompanied by Mr. Abbott, repaired to the residence of Rev. Father Curran at East End, where they spent the night.

SHOWED INTEREST IN MAFIA.

This morning the colonel was astir early and accompanied by Father Cur- court and Foust street, producing a ran, John Mitchell, Mr. Abbott and a neatly paved thoroughfare eastward party of newspaper men who trailed all the way from Mill street to where him in autos journeyed to Pittston. Arriving there the party allowed the colonel to go on ahead and he at once plunged into the Italian settlement which has for years been the scene of murders and Black Hand outrages. He evinced a keen interest in the Mafia, the death-dealing Italian society and wanted to know all about the Black Hand, but he was up against it as the Italians there, although they appreciated the honor of entertaining did not care to risk a knife thrust for giving out information.

DID NOT ENTER MINE.

The party then made a tour of in. spection of the entire valley, going through coal breakers, foreign settlements, miners homes and factories. When it came to going down a mine the colonel watched with interest the operation of the cage which carried them down into the underground regiens, but did not care to make the journey, remarking that it did not carry any novelty with it for him.

This afternoon the party were entertained at dinner at the home of Father Curran, forty priests being in attendance. Following this another purpose. The taboots are made from inspection was made after which the party journeyed to Bear creek. Roosewelt will return to Wilkes-Barre late tonight and leave the city for New York at 2 a. m.

Montour American PAVING MAY

Excellent progress was made in the laying of brick on East Market street yesterday. The considerable surface covered, together with the neat curb ing set, enables one to form a pretty good idea of what that section of th street will look like when the paving s completed.

The residents along East Market street, who have waited so many years for paving, take great interest in the oreign element of northeastern Penn. improvement and as leisure permits may be seen on the spot watching the progress of the work.

Rumors have become current to the effect that all difficulties have been streets may be paved along with the others, but also a considerable por-

tion, if not all the intervening space on East Market street between Cook's the proposed macadam shall begin. By just what process the extension

of paving is to be accomplished is not explained, but it is hinted that the proceedings at council meeting-probably tomorrow night-may make the matter clear. Now that the work is under way

and is showing up so satisfactorily it would not be strange if the sentiment in favor of paving should grow with him, the result that the entire street may be ultimately embraced in the improvement.

A Mohammedan Festival. Taboots is an Indian festival in connection with the celebration of the month of Moharram, which begins the year of the true Mohammedan. This festival commemorates the death of Prince Hossein, the grandson of Mo-hammed, who met his death in battle after ten days' fighting against King Omar. The word taboot, from which the festival takes its name, means lit-erally a tomb, and it is always built in front of the homes of some rich thin bamboo strips covered with high-ly colored paper, and it is always dec-orated with isinglass, gold and silver paper, glass balls and much red and

green paint. On the ninth day of the festival of Taboots the taboots are car-On the ninth day of the ried in a possession through the streets of the various cities in India. On the tenth day all the taboots are thrown into some river, and thus ends the Mohammedan festival of Taboots.-Boston Herald.

Primitive Fire Fighters.

As late as the end of the sixteenth rentury in London the sole method of extinguishing fires was by means of contrivances known as "hand squirts." These were usually made of brass, with a carrying capacity ranging from stock many mine any more are the sharpy pointed prows of a racing motorboat and their windows are like portholes. The doors are at the sides. Each one has seats for fif-feet in length, one and a half inches in diameter at their largest part and but half an inch at the nozzle. On each dle in one hand and the nozzle in the

> of water which filled the cylinder. The bearers then elevated the nozzle, when the other pushed in the plunger, the skill of the former being employed in directing the stream of water upon the fire. Such primitive contrivances are said to have been used during the great fire of 1666.

BE EXTENDED IN INLAND LAKES

Bering Sea Monopoly of Fur Is Threatened.

NORTHERN STATES AVAILABLE spans the river at this place. It is a

Government Experiments at Washington Prove That Animals Will Thrive In Captivity, Even In Torrid Sum-mer Climate of National Capital. Solves Perpetuation of Species.

Seal farming is the latest enterprise that government authorities suggest practically obviated and that not only that government authorities suggest blocks with litigation resulting there-the two squares between Pine and Mill for New York state folks—the raising from has to be reckoned with. As one of the real fur bearing seals, now taken only on the Pribilof and other islands in the Bering sea.

This may seem a trifle extravagant, but George M, Bowers, commissioner responsible for the care and mainten-of fisheries, is authority for the statement that the government has demonstrated that these fir bearing seals can propagated in the fresh water lakes of New York state.

Christmas Presents Handy. Apparently a Christmas present of **a** sealskin coat by a New York lakeside farmer soon will be largely a matter of telling his wife to go down to the

the next five years the Northumber land county board may be asked to re-"rookery" back of the house and take Mr. Bowers' statement is based on experiments that the bureau of fisher-

ies has been conducting for the last six the bridge. It is believed that in this months. The bureau has had two fur way the commissioners and incidentbearing seal pups in captivity and has demonstrated not only that the pups can be raised by hand, but that they ally the tax payers of Northumberland county will become more familiar with conditions about the bridge and will thrive in fresh water and will stand a sweltering Washington sumderstand the necessity of frequent expenditure.

mer. This experiment by the bureau of fisheries has poked a large hole in the theory heretofore held by naturalists that fur bearing seals will not live in captivity or outside their natural habitat. Means Seals' Perpetuation

What the demonstration by the bu-reau of fisheries may mean in a com-mercial way can hardly be appreciat-ed. The trade in skins taken on the Pribilof islands has amounted to more than \$50,000,000 since the government came into possession of these small bits of barren lands. The United States has received \$9,000,000 alone for the privilege of hunting on these islands, which is \$2,000,000 more than the government paid for all of Alaska. When the United States bought these

islands in connection with Alaska there were 5,000,000 seals on them. Now there are only 170,000, and the government has been obliged to terminate its lease with the Alaska Commercial com-pany with a view to giving the herd an opportunity to multiply 'What I would like to know." observ-

ed one Washington philosopher, whether the women folks will ac sealskins after we get to growing them at home.
