

This picture shows two laundresses, one at work the other not able to, because her hands are cracked and sore—she has been using soap containing too much alkali. Read Prof. Leeds's report.

Gentlemen:—The sample of "IVORY" Soap which you sent to me for analysis has been received, and you will find analysis herewith. As a result, the "IVORY" Soap while strongly cleansing, leaves the skin soft and pleasant to the touch instead of harsh, uncomfortable, and liable to chaps, as results from the use of many common laundry soaps, in which the ratio of uncombined to combined alkali is large. The percentage of uncombined fat in the "IVORY" is very small, hence the lather is clean, white and abundant, with entire absence of oil or grease. There are no injurious substances.

The above considerations show the "IVORY" to be a pure soap and excellent for laundry use.

Very Respectfully Yours,

LABORATORY OF CHEMISTRY, ALBERT R. LEEDS, PH.D.  
STEVENS INSTITUTE OF TECHNOLOGY, PROFESSOR OF CHEMISTRY.  
HOBOKEN, N. J.

**A WORD OF WARNING.**

There are many white soaps, each represented to be "just as good as the 'Ivory'"; they ARE NOT, but like all counterfeits, lack the peculiar and remarkable qualities of the genuine. Ask for "Ivory" Soap and insist upon getting it.
